\*Regardless of expiration dates, quality of product will depend on the conditions under which it was stored.

## High electrolytic alkali ionized water

High electrolytic alkali ionized water, which removes oil, is a super alkali ionized water produced by an electrolytic cell of the water with the latest technology. Its superior detergency produces high ion activity power and dismantles protein or sebum. The water has widely been used for many years and has been used in the medical care and food industry with its sterilizing and humidity-retention powers.
