

Flexy Zen

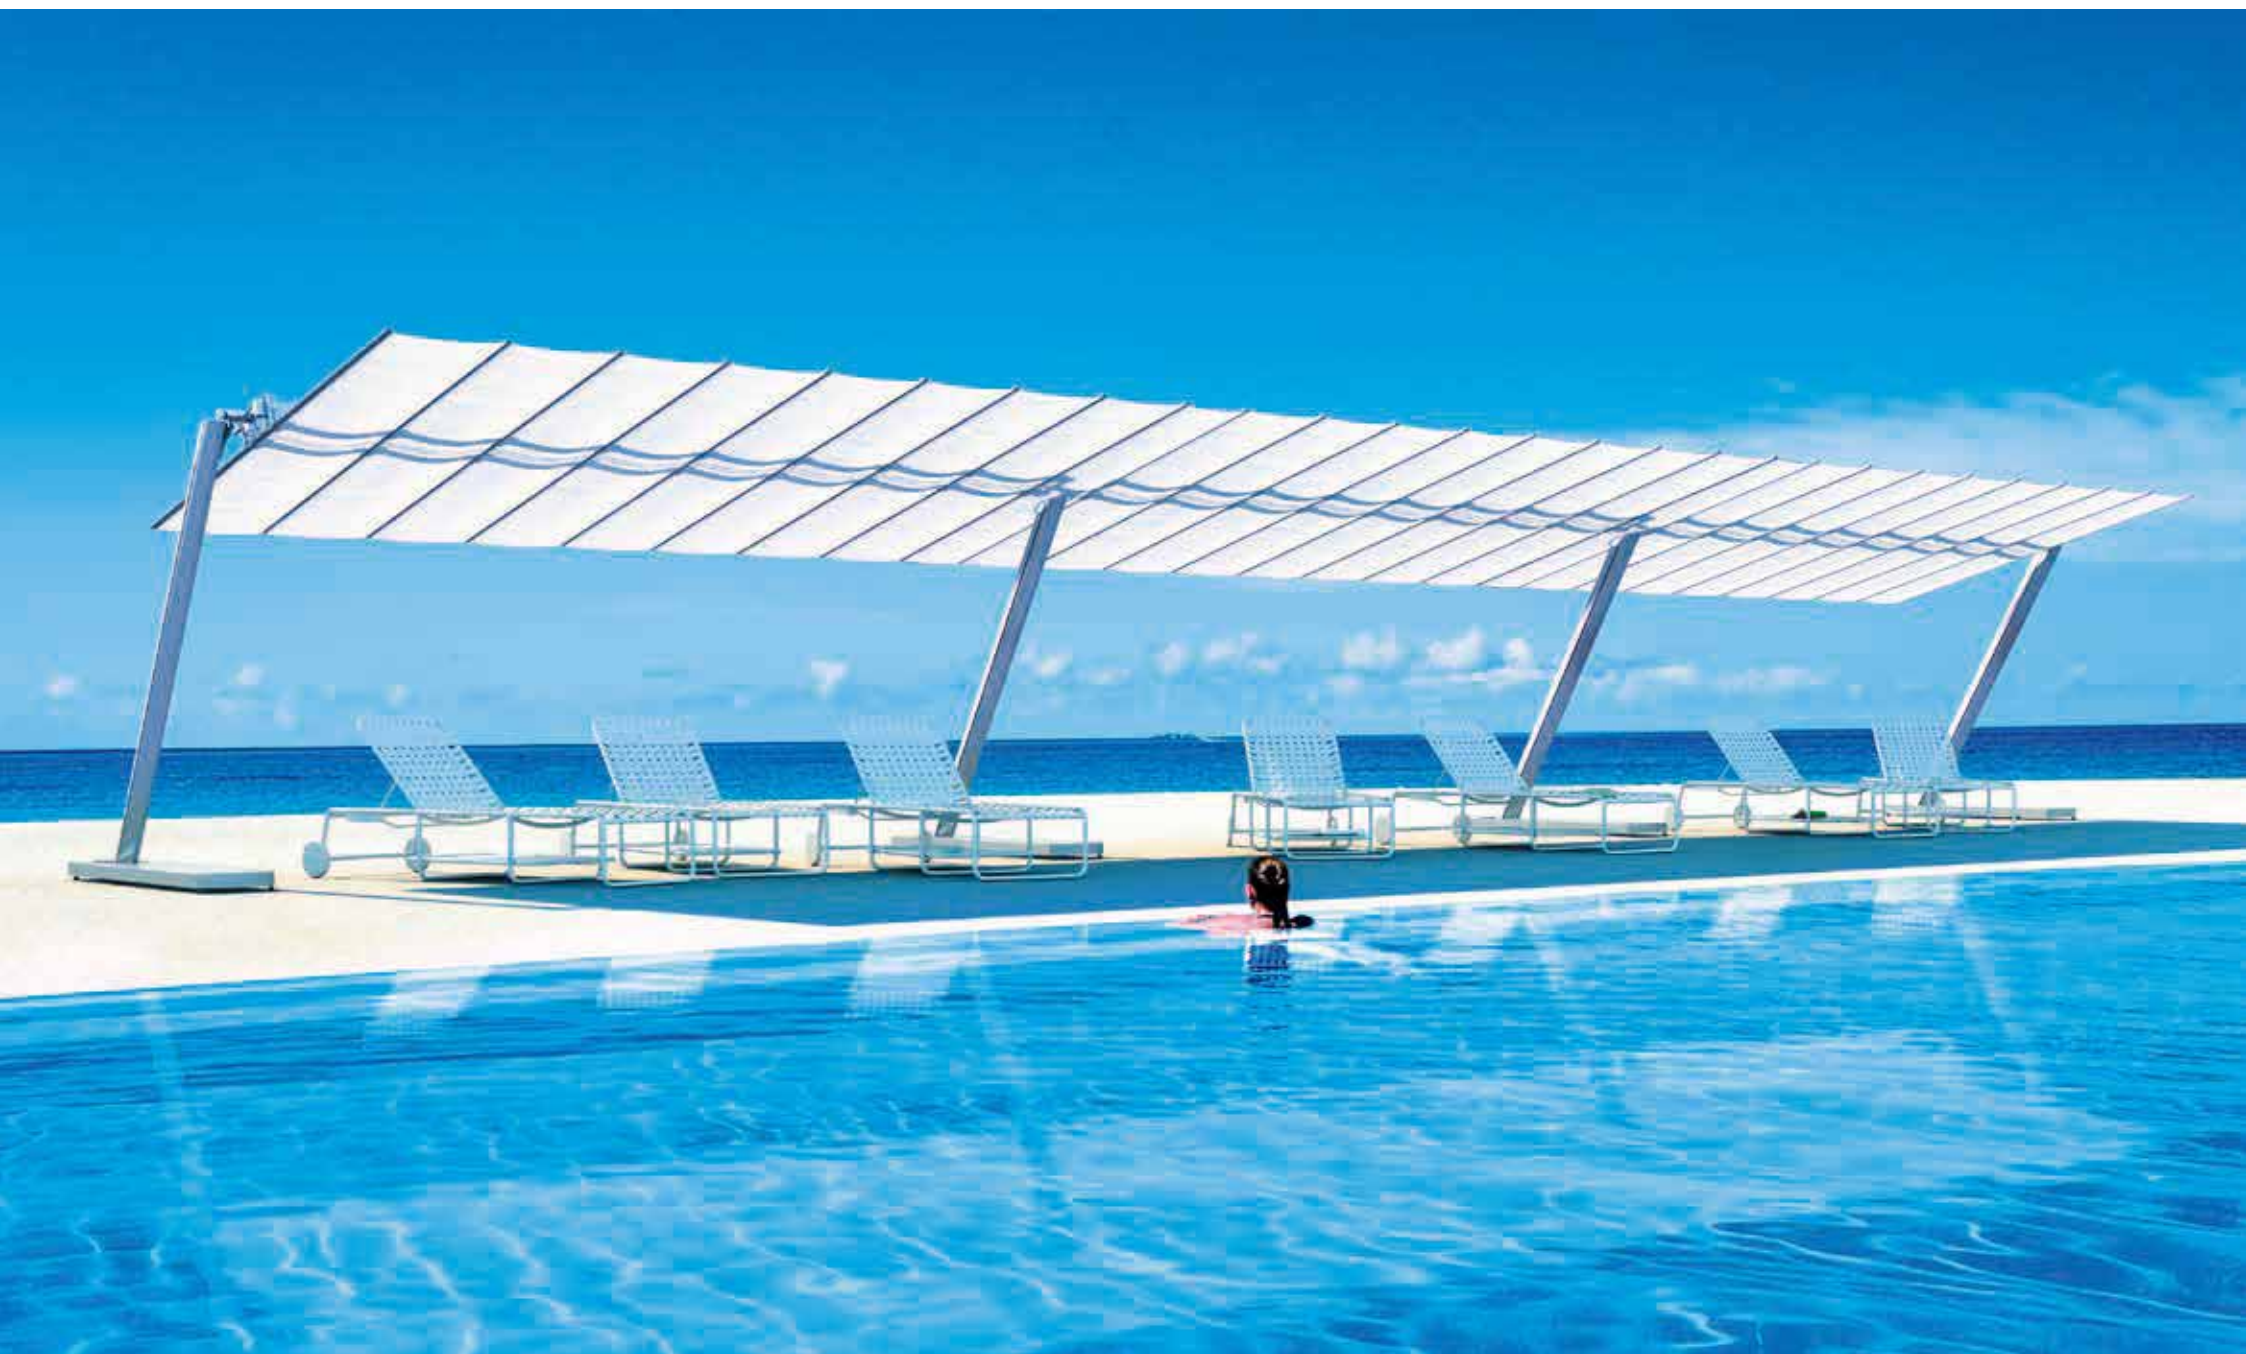

Flexy Zen

Modular system with a modern, minimalist design that allows to cover large areas without central obstruction. The inclined elliptical poles characterize the unique design of the product. Available in 10 different sizes that can be combined with each other, having the possibility to cover large areas. Ideal for contract use (hotels, restaurants...) and residential applications (villas, private gardens). The canopy, which can be easily closed thanks to a winch system, tilts for added shade during the day. It is available with an integrated LED lighting system in the poles. The structure is made of aluminium with stainless steel hardware. The Flexy Zen can be supplied with both freestanding or in-ground mount bases. All FIM products are designed and made in Italy using the finest materials for exterior use to ensure long life even under the harshest environmental conditions.

- Apertura con arganello
- Winch opening
- Ouverture par treuil
- Öffnung mit Kurbel
- Abertura mediante manivela

- Copertura composta da pannelli indipendenti
- Cover made of individual panels
- Couverture par panneaux indépendants
