Document Title: Product Specification of Ni-MH 2/3AA650 Revision: 4.2

1 SCOPE

This specification governs the performance of the following Nickel-Metal Hydride cylindrical cell and its stack-up battery.

Model: 2/3AA650

Cell Size: 2/3AAcrew cut $(13.9\pm0.1\times28.1\pm0.5)$ mm

2 . DATA OF STACK UP BATTERIES

All data involve voltage and weight of stack-up batteries are equal to the value of unit cell multiplied by the number of unit cell which consisted in the stack-up batteries

Example: Stack-up batteries consisting three unit cells

Nominal voltage of unit cell=1.2V

Nominal voltage of stack-up batteries = $1.2V \times 3=3.6V$

5. CONFIGURATION. DIMENSIONS AND MARKINGS

Please refer to the attached drawing.

6 EXTERNAL APPEARANCE

The cell/battery shall be free from cracks, scars, breakage, rust, discoloration, leakage or deformation.

7、WARRANTY

One year limited warranty against workmanship and material defects.

8 CAUTION

- [1]Reverse charging is not acceptable.
- [2] Charge before use. The cells/batteries are delivered in an uncharged state.
- [3]Do not charge/discharge with more than our specified current.
- [4]Do not short circuit the cell/battery Permanent damage to the cells/batteries may result.
- [5]Do not incinerate or mutilate the cells/batteries.
- [6]Do not solder directly to the cells/batteries.
- [7] The expected life may be reduced if the cells/batteries are subjected to adverse conditions as: extreme temperature, deep cycling, excessive overcharge/ over-discharge.
- [8] Store the cells/batteries in a cool dry place. Always discharge batteries before packing.

Notes:

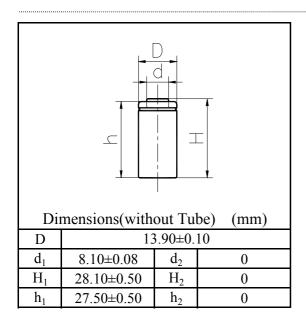

[1] T₁: Ambient Temperature.

- [2] Approximate charge time from discharged state, for reference only.
