CRESSI

ANTONIO CRESSI & MARCO CRESSI

Cressi was founded, and still lives, just steps from the sea in Genoa. We breathe sea air in everything we do, and every one of our products is inspired by the incredible beauty of the waters we see before us. With 150 employees and eight branches, Cressi is a world leader in the production of diving equipment, innovation, and development with exports accounting for 80% of turnover.

BUT THE ONLY ONE STILL RUN BY A FAMILY

In Cressi we have always focused on sustainability by orienting ourselves to the protection of the environment and especially of our seas. We follow the sustainable direction on many fronts, such as in the choice of packaging materials, where we are reducing plastic and replacing it with recycled or recyclable materials. We are also very active in sponsoring events related to cleaning up the seas to ensure that future generations have our same opportunities.

Marco Cressi

We live by the sea, we work with the sea and we love the sea, so it's our responsibility to give it care and respect. Our goal is to replace all plastic packaging with alternative sustainable solutions following our policy. The only way to fight pollution in the sea is to be aware and active, first hand.

Cressi decided to take some concrete actions

CRESSI'S PACKAGING

OUR STORY

1930

1938 Brothers Egidio and Nanni Cressi start to handcraft the first masks and spearfishing guns. These are the origins of Cressi, the oldest scuba diving equipment company worldwide.

1950

1952 Pinocchio Mask, which makes equalization possible. It is a major innovation in the early '50s. It is the most famous and most sold mask in the world's history, and it is still included in the catalogue.

1953 Rondine Fins - Also in the field of fins, Cressi invented the model that has inspired all other manufacturers, the first floating model in the world.

1957 Cressi athlete Mario Catalani wins the first spearfishing World championship and get the gold medal in Jugoslavia.

1970

1970 Equi-vest - In 1970, Cressi was the first manufacturer in the world to produce Equi-Vest, a futuristic jacket that became one with the scuba tank, supplied by a hose that drew air directly from the first stage. This was the first incarnation of the modern BC.

1970 Rondine L long fins - The world leader of molding rubber fins, Cressi developed the Rondine L long fins, which enabled Jacques Mayol to go onto achieve his astonishing freediving records.

1979 Fins range - Alongside the various rubber fin models, a futuristic model was presented with a reinforced nylon blade, called the Rondine Gara, a fin that thirty years down the line is still going strong, and has been adopted by world class freedivers and spearfishermen the world over.

1940

1943

The first Cressi mask, The Sirena, was hand crafted in 1943. It remained in the catalogue, with various updates, for more than 30 years.

1946

The Cressi company is officially founded in Genova, Italy.

1947

In 1947 the first oxygen rebreather was produced; Aro AR47. It was already highly advanced and fitted with sophisticated technical solutions, like the condensation receptacle.

1960

1965

Cressi opened one of the first workshops that specialized in producing optical masks. Thanks to Cressi, even people with visual defects could now get full enjoyment of the underwater universe.

1980

1983

Jacques Mayol, the first man in the world to challenge the 100m barrier. He reached a depth of 105 meters. The episode has gone down in history, the record was obtained in the waters of the island of Elba in 1983.

1988

Apache Arbalète - Cressi produced a complete range of Arbalète spearguns to join the pneumatic guns, called the Apache, which very soon became the Champion speargun in the world.

1989

Cressi athlete Renzo Mazzarri wins the spearfishing world title in Italy.

1990

1990

Cressi continues its international expansion and the products are by now distributed in over 90 countries worldwide.

1999

Cressi Athlete Umberto Pelizzari sets the freediving "No Limits Absolute Variable Weight" World Record in Portofino (Italy) reaching the depth of 150 meters.

2010

2011

The Leonardo dive computer watch is introduced, the first of the PRODUCTS designed in-house by Cressi Elettronica in order to guarantee optimum quality, safety and reliability.

2013

The French freediving champion Guillaume Néry becomes a Cressi PRODUCT endorser. The Giotto dive computer watch is introduced; it processes the data from repeat multi-day dives and dives with gas mixtures and also benefits from the Cressi RGBM algorithm. The Tracina wetsuit for spearfishing is introduced in a new and exclusive camouflage Dark Digital Specter Pat Cressi.

2024

2024

In recent years, Cressi has grown steadily, feeling the responsibility to use its skills and resources to support projects in both the sporting world and environmental protection. In 2024, the company supported and sponsored an innovative underwater art and dance course with acclaimed artist Julie Gautier. In parallel, Cressi sponsored and supplied equipment for the Abyss Cleanup project, a non-profit initiative dedicated to identifying and removing marine litter from the seabed.

2000

2000

Big Eyes was the first mask in the world with raked lenses in an upside-down teardrop shape, an innovative form that gives the diver a complete view of all the equipment worn. They became the most widely copied and imitated mask in the world, a gratifying appreciation of how far ahead Cressi is in the design of its products

2020

2021

Hydrosports is the result of Cressi's experience, consisting of tradition, innovation and quality, since 1946. With its close relationship to the sea environment, the Cressi team has been able to develop this new collection in response to the direct needs it encountered in practice and through water tests on its product

2026

The Cressi company is still entirely owned by the Cressi family, which carries on with the same passion, the work started by brothers Nanni and Egidio Cressi. Its spirit lies in the manufacturing tradition, with a clear preference for the conception and realization of its PRODUCTS in-house, from the initial design through to the smallest details. Cressi focuses on those who love all facets of the aquatic world. The company has never exaggerated with successful PRODUCTS on the market, but has instead always invested in research and development to the benefit of quality and reliability, the evolution of materials.

OUR PARTNERS

CRESSI X

In March 2019 Cressi officially became the partner of **Y-40@ The Deep Joy**, the deepest pool with thermal water. From that moment on, the recreational diving and freediving equipment available at Y-40@ is provided by Cressi. Y-40@ The Deep Joy is the place where everything is possible, where you can live the most amazing aquatic experiences. 4,300 cubic meters of thermal water where there are free diving and scuba diving courses. It's a safe environment for professional exercises and scientific research, in addition to being an amazing film set and area for photographic and advertising services. Y-40@ has an area of 21x18m; the maximum depth is 42.15 meters with different platforms at intermediate depths and caves for technical activities. The deep pool can be visited, it is possible to walk in the transparent tunnel that crosses the structure, discovering the magic of this big human aquarium.

STEVE AOKI

 [steveaoki](#)

Steve Aoki is one of the world's most influential DJs and music producers. Known for his high-energy performances and global reach, Aoki is also a visionary entrepreneur, philanthropist, and pop culture figure, active in fashion, gaming, and digital art.

In 2026 Steve Aoki teams up with Cressi for a bold, limited-edition line inspired by his **Hiro** and **Hyro** characters.

CRESSI X

THE BUCKET LIST FAMILY

We are the Gee family, just your "average" family working from all around the world as Family Travel Journalists! Our story began on the 15th of August, 2015 when we decided to sell everything and leave home for a journey around the world together. We started an Instagram and a YouTube channel called, The Bucket List Family.

It was a difficult decision to reset our lives and sell everything but we're grateful everyday that we took that chance and were brave. We're grateful to each of you for being a part of this journey and we hope you'll keep with us as our little family and this big adventure continue to grow!

 [thebucketlistfamily](https://www.instagram.com/thebucketlistfamily)

CRESSI X
JULIE GAUTIER

A new athletic and artistic discipline inspired by the film AMA

Run, jump, fly, dance underwater, *AQUA DANCE FLOW* offers a new way of practising freediving. The brainchild of the short film *AMA*, which has touched thousands of people around the world, this mode of artistic expression was conceived by Julie Gautier, director, freediver and dancer, and is now available to everyone: freedivers, dancers, synchronised swimmers and the curious. It's also an excellent way to overcome your fears of the water, using games and relaxation. This activity offers a unique experience combining well-being with a physical, sporting and artistic activity.

 [juliegautier.watertale](https://www.instagram.com/juliegautier.watertale)

CRESSI X
Insta360

A brand loved by water sports enthusiasts for its innovative 360° and action cameras that bring underwater adventures to life. Through this collaboration, Cressi supports Insta360's consumer-first approach, equipping users with high-quality snorkeling masks, freediving gear, and scuba products that complement their aquatic journeys. Whether you're swimming in shallow reefs or diving deep into the blue, Cressi gear enhances the experience and Insta360 cameras make sure it's captured and shared in full. Together, we aim to inspire and make water sports more exciting, accessible, and beautifully memorable.

CRESSI BUYER'S GUIDE

2026 COLLECTION

Cressi's legacy of innovation began in 1939 with two brothers who shared a passion for the sea and a gift for technical design and working with their hands. Egidio and Nanni Cressi began by crafting masks and spearguns that would allow them to move and hunt more efficiently in the waters near their home. By 1946 their designs and products had become so popular they founded the Cressi company in Genoa, Italy. Today, although Cressi is a worldwide leader in water sports manufacturing, it is still wholly owned by the Cressi family, and the commitment to innovation is still in the company's DNA. It has a long history of groundbreaking product development, and has often been the first to bring product advancements to the market.

This history of innovation is also made possible by a commitment to manufacture products in Italy at the Cressi facility. An investment in the latest manufacturing equipment and more than 16,000 square meters of roofed space, and the ability to have the designing and manufacturing process happen side by side has led to the absolute highest standards for quality. It also allows Cressi engineers to quickly develop, test and incorporate the latest materials and technologies.

Innovations continue, the results today are the same as they were in the beginning, the most advanced and best made products in the world.

Cressi's experience and the Italian know-how gives life to the new 2026 collection.

**WE MANUFACTURE
QUALITY
SINCE
1946**

In accordance with Directive 1999/44 EC, Cressi guarantees its products against inherent and operating defects. To offer better service to its customers and consumers, and to affirm the efficiency and quality of its manufacturing processes, it has decided to extend the terms of the guarantee as follows:

DIVE COMPUTERS

Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
 Exceptions: Flooding caused by incorrect battery installation, LCD display in the case of damage due to negligence or blows, damage due to leaks of substances from the battery (the guarantee is valid if the computer is new and has not been used), damage caused by dead or non-functioning batteries, damage due to negligence, blows, or to normal wear and tear.

ANALOG DEVICES

Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
 Exceptions: Damage due to negligence, blows, or normal wear and tear.

REGULATORS

Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
 Exceptions: Consumable parts, damage due to negligence, blows, or normal wear and tear.

B.C.d.'S

Two (2) years from the date of purchase (for rental or teaching use: 12 months for operating defects and 24 months for inherent defects).
 Exceptions: Consumable parts, damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, blows, or normal wear and tear.

DRY SUITS

Two (2) years from the date of purchase (for rental or teaching use: 6 months for operating defects and 24 months for inherent defects).
 Exceptions: Consumable parts, damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, improper use, blows, or normal wear and tear.

MASKS, FINS, MOUTHPIECES, GOGGLES

Two (2) years from the date of purchase (for rental or teaching use: 12 months for good operations and 24 months for defects of conformity).
 Exceptions: Alterations in the color of the silicone, all damage due to exposure to the sun or the effect of chemical or environmental agents, damage due to negligence, improper use, blows, or normal wear and tear.

SPEARGUNS, KNIVES, BAGS, WETSUITS, BOOTS, GLOVES, AND ALL REMAINING PRODUCTS AND CONSUMABLE PARTS

Two (2) years from the date of purchase (24 months for inherent flaws).
 Exceptions: Damage due to scratches, punctures, abrasions, or chemical products (including chlorine), all damage due to exposure to the sun, damage due to negligence, blows, or normal wear and tear.

/ COMPUTERS | DIVING DEVICES

DIGI 3 COMPUTER

NEW 2026

ADVANCED DIVE COMPUTER WITH AIR INTEGRATION AND SMART CONNECTIVITY

When you're underwater, your mind should be clear – watching the reef, nailing your buoyancy, or framing the perfect shot. With your dive computer mounted on your regulator hose, you get all critical info at one place. This compact, air-integrated dive computer mounts directly to your first stage via a standard HP hose (up to 300 bar). It monitors real-time tank pressure and calculates air time based on depth and effort. Running on the trusted Bühlmann ZHL-16C algorithm, the DIGI3's user-configurable gradient factors give experienced divers more control over their safety margins. And with automatic altitude compensation, the DIGI3 detects changes in ambient pressure and adjusts the decompression algorithm accordingly, improving safety for altitude diving. A high-

contrast screen uses RGB backlighting to highlight deco stops, fast ascents and other alerts. Passive NFC (patent pending) means you can configure dives, download logs and reset the device straight from your mobile phone without pairing, cables or draining the battery. Designed for intensive use, the DIGI3 features a sealed housing, inductive metallic button (no mechanical wear), self-healing screen protector and shock-absorbing silicone shell. A user-replaceable battery powers up to 500 dives or 3 years of use, and a self-diagnosis system checks the seal after battery changes. Multi-gas support and gas switching will be added via OTA firmware updates. Designed and manufactured in Italy using globally leading technologies, DIGI3 is precise, safe and innovative.

PRODUCT BENEFITS

LIT UP SCREEN

ATTENTION SCREENS

NORMAL SCREEN

- Air-integrated dive computer connects to an HP port on your first stage for real-time tank pressure and air time calculation
- Bühlmann ZHL-16C algorithm with user-configurable gradient factors gives experienced divers more control
- Automatic altitude compensation adjusts decompression settings for diving at elevation
- Adaptive RGB backlight highlights key alerts like deco stops, low tank pressure and fast ascents
- Bluetooth and passive NFC enable fast log download and setup via your phone
- OTA firmware updates will add gas switching and multi-gas support, preconfigured via smartphone
- Rated to 120m with a compact, lightweight (125g) design, self-healing screen protector and tough silicone shell
- Inductive metallic button - no mechanical seals that can degrade over time
- Powered by a CR2450 battery for up to 3 years or 500 dives; stores 256 hours of log data
- Designed and manufactured in Italy using globally leading technologies

RAFFAELLO

REPRICED 2026

THE ULTIMATE IN DIVE COMPUTER FUNCTION AND PERFORMANCE.

The Cressi Raffaello is the most advanced dive computer in our range and brings together 15 years of technical knowledge. With four modes, Air, Nitrox, Gauge and Free, the Raffaello supports up to three Nitrox gas mixes, ideal for extended-range dives. With a 5-second sampling rate, the Raffaello dive computer provides real-time monitoring of key dive parameters, feeding data directly into the advanced Cressi RGBM Algorithm. This powerful combination enables adaptive decompression calculations for safe ascent profiles during multi-day and repeat dives. A flexible deep stop feature and adjustable PPO2 range (1.2-1.6) allow you to tailor your O2 exposure. A bright, easy-to-read display keeps your dive data accessible at a glance and a built-in

compass will keep you confidently on course throughout your dive. With a low-profile design, the Raffaello sits comfortably on your wrist and the long silicone strap ensures a perfect fit, even if you're wearing a drysuit. Thanks to a new low-consumption processor, the Raffaello's long-lasting battery has an expected life of 4 years. Hello off-grid multi-day dives, goodbye searching for a plug socket. The battery is user-replaceable, allowing for quick and easy battery changes that minimise downtime between dives. Optional Bluetooth connectivity ensures that your diving adventures are tracked and stored in the Cressi app. Dive with the freedom to explore and the confidence that your Raffaello is built to keep up.

MADE IN ITALY

22x10x7 cm - 8.6x4x2.7 in

PRODUCT BENEFITS

- 4 operating modes - Air, Nitrox, Gauge, Free/Apnea.
- Manage 3 different Nitrox gas mixes during your dive, for advanced or technical divers who need flexible gas management.
- Features a built-in compass so that you can explore with confidence.
- Large rectangular backlit screen, so you can easily monitor all of your essential data at a glance during the dive.
- Adjustable PPO2 setting (1.2-1.6) to ensure you stay within safe parameters based on your dive plan.
- Audible alarms provide warnings for ascent speed, decompression or PPO2 level violations.
- Decompression can be viewed in classic or ceiling mode, useful for optimising your ascent.
- The ultra-low profile design ensures the computer sits comfortably on your wrist, reducing drag and bulk.
- An impressively long battery life of 4 years, plus simple user-replacement, ensures you're ready for any dive adventure.
- Optional Bluetooth connection for Mac, PC and smart devices. Analyse and store your dive data in the Cressi app.

GIOTTO

REPRICED 2026

A RUGGED, HIGH-PERFORMANCE DIVE COMPUTER DESIGNED FOR VERSATILITY AND SAFETY.

The Cressi Giotto dive computer is ready for your next adventure. With an ergonomic design and stainless-steel finish, the Giotto doesn't just look good; it offers superior impact resistance during even the most adventurous dives. Blending functionality and performance, a clear and intuitive high-definition display keeps your essential dive data visible so that you can focus on your dive. The updated Giotto now benefits from a simple two-button navigation, giving you access to four different operating modes, Air, Nitrox, Gauge and Free. You can manage up to three different Nitrox gas mixes during each dive, perfect for extended-

range diving and thanks to the advanced Cressi RGBM Algorithm, you can safely alternate between Nitrox and air dives, even during desaturation. An additional deep stop option and the adjustable PPO2 setting (1.2-1.6) allow you to customise your oxygen exposure levels while optimising dive performance at various depths. Audible safety alarms will warn you of breaches in ascent speed, decompression limits or PPO2 levels. Optional Bluetooth connectivity means you can log your dives using the Cressi app, which is available for Mac, PC and Android devices.

13x10x11 cm - 5x3.9x4.3 in

PRODUCT BENEFITS

- 4 operating modes - Air, Nitrox, Gauge, Free/Apnea.
- Manage 3 different Nitrox gas mixes during your dive, ideal for dives where longer bottom times or greater depths may be required.
- Access all your dive data on an edge-to-edge, high-definition display.
- Features a stainless steel bezel for increased shock resistance.
- An intuitive menu accessed via two stainless steel buttons so that you can easily scroll through your dive data.
- Adjust your gas mix on-the-go, alternating between nitrox and air dives, even during desaturation.
- Plan dives that stay within no-decompression limits, for simple multi-day dive planning.
- Audible alarms in case of ascent rate, decompression or PPO2 violation.
- Optional Bluetooth connection for Mac, PC and smart devices. Analyse and store your dive data in the Cressi app.

MICHELANGELO

FOR DIVERS WHO SEEK ADVANCED FUNCTIONALITY COMBINED WITH INTUITIVE OPERATION.

The Cressi Michaelangelo is a dependable and user-friendly dive computer. With four operating modes, Air, Nitrox, Gauge and Free, the computer caters for a variety of underwater explorers. You can manage two different Nitrox gas mixes during your dive and safely switch between air and Nitrox modes during desaturation thanks to the advanced Cressi RGBM Algorithm. Additionally, the Michaelangelo's Central Nervous System toxicity display provides real-time insights into your exposure to oxygen, helping avoid the risk of O2 toxicity during the dive. An intuitive menu is accessed via a large single button. Simply scroll and hold to select. All your dive data is displayed on a large backlit screen for easy reading. The Michaelangelo features a

replaceable protective screen cover to protect the display from damage. You can swap the cover as needed, prolonging the lifespan of the computer. With a long-lasting and user-replaceable battery that's easy to find in most supermarkets, the Michaelangelo keeps things simple, you can open the battery compartment with a coin, no special tools required. Enjoy the water between dives without impacting your dive data, simply disable the dive functions to prevent unnecessary logging and alerts during other in-water activities. Plus, with the option to reset all data, it's the perfect dive computer for rentals and schools where the device may be used multiple times a day by different divers.

13x10x11 cm - 5x3.9x4.3 in

PRODUCT BENEFITS

- 4 operating modes - Air, Nitrox, Gauge, Free/Apnea.
- Manage 2 different Nitrox gas mixes during your dive, ideal for extended or deeper dives where you need to switch gases to optimise decompression.
- A replaceable screen cover protects your display and ensures it remains clear and easy to read.
- Structural stainless steel bezel that provides greater impact resistance.
- Simple menu navigation thanks to a large and easy to locate button on the front of the computer.
- Perfect for snorkelling and swimming, you can disable "dive" functions to prevent unnecessary alarms ringing during other underwater activities.
- Total data reset option, ideal for rentals and dive schools.
- Optional Bluetooth connection for Mac, PC and smart devices. Analyse and store your dive data in the Cressi app.

DONATELLO

FOR PEOPLE WHO JUST WANT TO DIVE.

With its streamlined single-button navigation, heavy-duty case and scratch-resistant display, the Cressi Donatello dive computer is perfect for divers seeking straightforward functionality and durability. Designed with recreational and free divers in mind, the Donatello has four operating modes: Air, Nitrox, Gauge and Free. In dive mode, the computer acts as a complete diving data processor. Configure your PPO2 settings within a set range and benefit from the advanced Cressi RGBM Algorithm, enabling adaptive decompression calculations for safe ascent profiles during multi-day and repeat dives. The Donatello supports the management of a single gas mix during your dive, ideal for divers who want the benefit of Nitrox, but

without the need for switching gases. Versatile enough for all water activities, the Donatello is a fantastic freediving computer. It automatically tracks surface intervals and the length of your diving session. Maximum depth and recovery time alarms will ensure you stay within safe parameters. The Donatello is also the ideal backup computer for technical divers, featuring a very strong backlight that allows you to see the screen's data, even in low-visibility environments. With the option to disable alarms, it's a great choice for snorkellers too. A user-changeable battery ensures quick replacements, so you're always prepared for your next dive adventure.

PRODUCT BENEFITS

- 4 operating modes - Air, Nitrox, Gauge, Free/Apnea.
- Manage a single Nitrox gas mix during your dive, for divers who don't need to manage multiple gas mixes.
- Heavy-duty polymer case, bezel and screen, rugged, durable and scratch-resistant.
- Suitable for repeated, multi-day decompression diving.
- Easy to navigate menu structure which is accessed by a single button.
- Audible alarms for any breaches in ascent speed, decompression limits or PPO2 levels, ensuring your safety throughout the dive.
- A dedicated freediving mode, for divers who want the freedom to explore both scuba and freediving disciplines with a single device.
- Optional Bluetooth connection for Mac, PC and smart devices. Analyse and store your dive data in the Cressi app.

LEONARDO 2.0

A SIMPLE NO-NONSENSE DIVE COMPUTER

Built with simplicity and safety in mind, the Cressi Leonardo 2.0 is a dependable dive computer that will manage your dive plan from start to finish. A large edge-to-edge display allows divers to check important dive data quickly, while intuitive single-button navigation ensures that even first-time divers feel comfortable accessing their dive data. The Leonardo 2.0 is Nitrox compatible, and you can manage a single gas mix during your dive. The advanced Cressi RGBM Algorithm calculates time on the surface, no-fly intervals and desaturation, making it the ideal computer for repeated, multi-day decompression diving. A replaceable protective screen cover keeps

the display clear and easy to read for every dive session, while the user-changeable battery minimises downtime, ensuring the computer is always ready to go, dive after dive. The Leonardo 2.0 is a practical, reliable choice for schools and rental operations, offering a full data reset option so that each new diver can start with a fresh profile unaffected by previous users.

COMPUTER WATCHES

/ COMPUTER WATCHES | COMPACT DIVING DEVICES

CARTESIO

A FEATURE-RICH, MULTI-MODE DIVE COMPUTER THAT CAN BE WORN AS A DAY-TO-DAY WATCH.

Designed for underwater exploration and everyday wear, the Cressi Cartesio dive computer combines advanced functionality with a sleek, ergonomic design. Its compact, watch-sized profile and metal bezel make it stylish enough for daily use while being fully equipped for multiple mixed gas diving. With four modes: Air, Nitrox, Gauge, and Free, the Cartesio adapts to a range of diving styles, supporting two Nitrox gas mixes for divers looking to move into technical diving. A high-contrast, back-lit display ensures your dive data is always visible, even in challenging conditions. The scratch-resistant mineral glass screen, heavy-duty case and stainless-steel buttons provide protection from day-to-day use. Equipped with a 5-second data sampling rate, the Cartesio dive computer continuously

tracks your dive parameters, powering the sophisticated Cressi RGBM Algorithm for dynamic decompression calculations. This advanced algorithm supports safer ascent profiles, even across multi-day and repetitive dives. An adaptable deep stop function and adjustable PPO2 settings (1.2-1.6) provide custom control over oxygen exposure limits. A user-replaceable battery means you'll never be without your watch, and an Off mode disables dive sensors so that you can snorkel and swim without affecting your dive data. The Cressi Cartesio is an intuitive and high-performing watch style computer that makes managing your dives effortless for both beginners and experienced divers.

13x10x11 cm - 5x3.9x4.3 in

PRODUCT BENEFITS

- 4 operating modes - Air, Nitrox, Gauge, Free/Apnea.
- Manage two Nitrox gas mixes during your dive, particularly beneficial for divers who are moving beyond recreational diving limits.
- Sleek, ergonomic design, suitable for diving adventures and daily wear.
- Backlit and high-contrast display for easy reading of dive data, even in low-visibility conditions.
- A scratch-resistant mineral glass screen keeps your data visible, dive after dive.
- Adjustable PPO2 setting (1.2-1.6) to ensure you stay within safe parameters, based on your dive plan.
- Audible alarms provide warnings for ascent speed, decompression, or PPO2 level violations.
- Precise and detailed dive profile data, with data acquisition every 5 seconds for scuba and every 2 seconds for freediving.
- Switch between Nitrox and Air modes during desaturation, giving you added flexibility on extended dive trips.
- Optional Bluetooth connection for Mac, PC and smart devices. Analyse and store your dive data in the Cressi app.

NEON

SPECIALIZED
Retailer-Product

FOR DIVERS WHO SEEK SIMPLICITY WITHOUT COMPROMISING ON PERFORMANCE.

Whether you're a scuba diver, freediver or spearfisher, the Cressi Neon is a compact dive computer that's smart enough to wear to the office. Monitoring your dive data is simple and intuitive: a clean, edge-to-edge display allows you to see your stats at a glance and you can switch between 4 different modes: Air, Nitrox, Gauge and Free. Providing real-time data, including dive phase time, ascent speed and a customisable PPO2 range, the Neon's adaptable Cressi RGBM Algorithm supports multi-day decompression diving and features an adjustable deep stop and O2 toxicity monitoring for enhanced safety. You can manage 2 Nitrox gases during a dive and even switch between

Air and Nitrox modes between dives, a feature that is often missing on other similarly priced dive computers. For freedivers and spearfishers, the dedicated Free/Apnea program displays vital metrics like maximum depth, dive count and surface interval timers. The Gauge mode provides depth and bottom time tracking without decompression calculations, ideal for anyone needing a backup computer for technical diving. The Neon's durable build and mineral glass screen ensure lasting protection, while a battery life indicator and user-replaceable battery keep you dive-ready with minimal downtime.

PRODUCT BENEFITS

- 4 operating modes - Air, Nitrox, Gauge, Free/Apnea.
- Manage two Nitrox gas mixes during your dive, ideal for divers wanting to extend their time underwater.
- Built for comfort, the Neon's low-profile design makes it ideal for daily wear and dive adventures.
- A high-contrast, backlit display ensures dive data is visible, even in low-light conditions.
- A scratch-resistant mineral glass screen protects your computer dive after dive.
- Adjustable PPO2 levels (1.2-1.6) support safe, customisable O2 exposure based on your preferences and dive plan.
- Data acquisition every 5 seconds for scuba and 2 seconds for freediving, plus temperature tracking, capturing detailed and accurate dive profiles.
- Switch between Nitrox and Air modes during desaturation, giving you added flexibility on multi-day dive trips.
- Optional Bluetooth connection for Mac, PC and smart devices. Analyse and store your dive data in the Cressi app.

GOA

PERFECTLY SUITED TO THE NEEDS OF RECREATIONAL SCUBA DIVERS AND FREEDIVERS.

Lightweight yet robust, the Cressi Goa dive computer is designed for underwater adventures and daily wear, with a high-contrast, easy-to-read display that provides clear dive data at a glance. You can switch between four modes: Air, Nitrox, Gauge and Free, while benefiting from the reliable Cressi RGBM algorithm that supports safe decompression for multi-day dive plans. The Goa is configured for single-gas management, allowing straightforward use with one Nitrox gas mix (up to 50%) and precise oxygen exposure monitoring through customisable PPO2 settings. With a comprehensive suite of safety features, the Goa offers real-time updates on dive phase time, ascent speed, O2

parameters and an adjustable deep stop feature for added control. For freediving, the dedicated Free/Apnea mode records essential statistics like depth, surface intervals and dive counts. Gauge mode provides in-depth tracking without decompression calculations, ideal for those using it as a backup device. Built to withstand the elements, the Goa features a scratch-resistant mineral glass screen and a durable case. Its replaceable battery keeps downtime to a minimum, with a battery life indicator ensuring you're always dive-ready. The Cressi Goa offers the perfect balance of functionality, simplicity and reliability, the perfect all-in-one dive computer.

KING

SPECIALIZED
Retailer-Product

FOR FREEDIVERS WHO DEMAND PERFORMANCE, SAFETY AND DURABILITY.

The Cressi King is an advanced freediving computer combining intuitive design with sophisticated safety algorithms. Designed to meet the unique demands of freedivers and spearfishers, the King uses Cressi's Taravana Risk Reduction Algorithm, which allows divers to select from eight different recovery settings between dives. The Algorithm takes into account the dive time, depth, water temperature and previous dives and encourages safe surface recovery times to help prevent the onset of Taravana, a serious condition where nitrogen bubbles can form in the bloodstream and tissues. From a setting of twice the dive time (L1) to five times the dive time (L5), this feature enables divers to choose the safety level that best matches their dive

plan and physical condition on the day. Cressi's Oedema Protection Algorithm helps reduce the risk of pulmonary oedema and haemoptysis. It allows divers to set a target maximum dive depth, which in turn sets up a series of progressive warm-up dives. These warm-up dives let the body acclimatise and prepare for deeper dives, optimising blood flow to protect the lungs from strain and minimise the risk of injury. With a marine-grade stainless steel bezel and a tough silicone-polyamide strap, this watch is rated to 120 metres. Additional features, such as customisable depth and time alarms, a hydration reminder, a tide indicator and a logbook function, make this an essential tool for freedivers looking to safely explore their endurance.

TARAVANA PROTECTION ALGORITHM

TIDE LEVEL INDICATOR

BLOODSHIFT PROTECTION ALGORITHM

SINGLE DIP LOGBOOK

- 3 modes - Free, Test, Off
- A marine-grade stainless steel bezel for long-lasting durability.
- A reinforced tear-resistant silicone strap that holds up under intense diving conditions.
- A compact, high-contrast display that is easy to read in any light.
- An advanced algorithm to help reduce the risk of Taravana, offering eight levels of monitoring to increase safety during repeat dives.
- An integrated approach to dive calculations helps minimise the risk of lung strain or oedema, a safety-focused feature for deep and frequent dives.
- Full dive parameter tracking provides essential data including depth, dive time, ascent/descent speeds, surface intervals and session length.
- Customisable alerts for depth, dive time, recovery time and even hydration reminders, ensuring divers stay safe throughout each session.
- Ideal for other water activities, a lock mode prevents unnecessary alarms when snorkelling or swimming, which also extends the battery life.
- A user-replaceable battery and a sleep mode help extend the life of the battery.

NEPTO

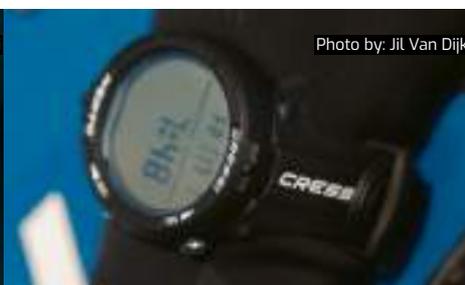

ALL THE ESSENTIALS IN AN EASY-TO-USE FREEDIVING COMPUTER.

Focus on each breath, each movement and each dive with the Cressi Nepto freediving computer. Designed with freedivers and spearfishers in mind, this easy-to-use freediving watch offers core functionality in a compact, streamlined profile that is perfect for daily wear. Using Cressi's advanced Taravana Risk Reduction Algorithm, the Nepto enables divers to select one of eight surface recovery settings. This ensures safe intervals between dives and helps reduce the risk of Taravana, a form of decompression sickness caused by rapid, repeated breath-hold dives. The Oedema Protection Algorithm lets divers set progressively deeper warm-up dives to

gradually acclimatise to deeper depths. This supports lung health and reduces the risk of oedema, which is essential for freedivers and spearfishers looking to responsibly push their limits. From customisable alarms to precise data sampling every 0.5 seconds, this device captures and stores comprehensive dive data. Essential metrics like depth, time and water temperature are easily viewed on the high-contrast, backlit display, which remains legible in low-light conditions. The user-replaceable battery and hydration reminders are added conveniences, making the Cressi Nepto as functional as it is dependable, even during demanding repeat dives.

SEA LION SWISS MADE

AUTOMATIC SWISS MADE DIVE WATCH PARAGGI EDITION

11x11x9.5 cm - 4x4 in

PRODUCT BENEFITS

- Case: bearing design, transparent sapphire-glass back, winding crown
- Diameter: 44 mm
- Material: steel
- Bezel: unidirectional rotatable 60-minutes graduated, anti-scratch anodized aluminium, numerals and graduations engraved, highly legible display with luminescent material
- Winding crown: screw-down, at 16 o'clock
- Crystal: scratch-resistant sapphire
- Waterproof to 300 meters / 1,000 feet
- Movement: automatic, mechanical self-winding
- Calibre: eta 2824-2
- Precision: -2/+2 sec./day
- Functions: centre hour, minute and seconds hands; instantaneous date with rapid setting, stop-seconds for precise time setting
- Winding: bidirectional self-winding
- Power reserve: approximately 48 hours
- Strap: black rubber, soft and comfortable with non-slip texture
- Steel safety buckle

The sea lion is the first cressi gold label limited edition product and identifies a lifestyle belonging to the brand. It is suitable for all water sports, but also for the daily life of water lovers. The watch, 100% swiss made, water-resistant to 300 metres, has a stainless steel case, a sapphire crystal front and a transparent sapphire crystal back. The 120-click unidirectional rotating bezel is graduated to 60 minutes with an anodised aluminium disc, to

provide the diver with an accurate indication of dive times. The self-winding mechanical movement is customized for cressi sub. The winding crown is at 16 o'clock, in steel with the cressi brand engraved, in a functional position if wearing the wetsuit. Thus, the sturdy, comfortable and lightweight rubber strap allows precise adjustment of its length, so that it can be placed on the wrist above any sporting wear

DIGI 2 NEW COLOR 2026

YOUR DIGITAL DIVE GAUGE CONSOLE COMPANION

The Cressi DIGI 2 is a compact, digital dive gauge console with an easy-to-read display that shares all of your essential dive data. Measuring just 50mm x 60mm, the DIGI 2 fits comfortably in your hand. Attach it to an HP port on your first stage, and the device activates automatically when pressurised. The high-contrast 45 x 27 mm screen shows cylinder pressure, dive time, and depth up to 120 metres, along with maximum depth, water temperature, and remaining dive time until 50 bar. A visible alert signals when you hit 50 bar, indicating it's time to begin your ascent. The DIGI 2's battery offers up to 700 dives in one year, with a low battery indicator letting you know when a

new battery is required. The user-replaceable battery is easy to swap, and the DIGI 2 performs a patented self-diagnosis pressurisation test to ensure correct installation. To extend the battery life by up to 3 years, place the Smart Cover over the screen to activate a dormant mode. The cover also allows switching between metric and imperial units. An adjustable hook lets you position the display for hands-free viewing, while the photoluminescent screen coating ensures visibility in low-light conditions. With a tough polyamide housing and a protective silicone shell available in six interchangeable colours, you can match your DIGI 2 to your style or gear.

MADE IN ITALY

35,1x20 cm - 11.8x7.8 in

SELF-DIAGNOSIS FOR BATTERY CHANGE (PATENTED)

PRODUCT BENEFITS

- High-contrast digital display shows cylinder pressure in numerical and graphical formats for ease of reading.
- Cylinder pressure is measured from 0 to 300 bar to within an accuracy of 1 bar, so you can monitor your air supply with precision.
- The gas reserve indicator blinks when cylinder pressure drops below 50 bar to remind you that you have entered your gas reserve.
- The DIGI 1 powers up automatically when connected to the HP port on your first stage and pressurised.
- An incredibly long battery life offers up to 1000 hours of underwater use.
- A low-battery indicator lets you know when the battery needs changing, preventing unexpected interruptions during dive trips.
- A user-replaceable battery means limited downtime, fit a new battery in minutes.
- A patented self-diagnosis function performs a self-check after a battery replacement to ensure the device is operating properly.
- Tracks water temperature between -10°C and +50°C so you can measure the environmental impact on your gas consumption.
- Measures 9.9 x 5.2 x 2.8 cm and weighs just 122 g - 4.30 oz, ideal for divers looking to upgrade from heavier analogue consoles.

THE DIGITAL ALTERNATIVE TO AN ANALOGUE PRESSURE GAUGE

With its high-contrast 45 x 27 mm digital display, compact design and long battery life, the Cressi DIGI 1 brings a new level of digital convenience to monitoring your gas supply. Measuring cylinder pressure from 0 to 300 bar, the DIGI 1 ensures divers can track their gas consumption with confidence. A visible alert will warn you when you hit 50 bar, letting you know that you are entering your gas reserve and should begin your ascent. The DIGI 1 connects to an HP port on your first stage and automatically activates when pressurised. An impressively long battery life offers up to 1000 hours of underwater use. When the time

comes to replace the battery, the low-battery indicator gives you ample warning. Replacing the battery is straightforward, you can do it yourself without the need for special tools and the DIGI 1 performs a patented self-diagnosis pressurisation test after each change to ensure everything is functioning correctly. An adjustable hook lets you position the screen at the perfect angle for hands-free reading, ideal if you're already holding a torch or are using the DIGI 1 to monitor student gas consumption. The screen's self-charging photoluminescent coating keeps your dive data visible, even in low-light conditions.

REGULATORS

/ REGULATORS | HIGH PERFORMANCE STAGES

1ST STAGE

T10 SC CROMO

2ND STAGE

GALAXY ADJUSTABLE

From icy waters to murky lakes, the Cressi T10 SC CROMO GALAXY ADJUSTABLE is a high-performance regulator for divers exploring the most demanding environments. The T10-SC CROMO 1st stage has a hyper-balanced diaphragm that adjusts airflow to match the ambient pressure of the water, even as cylinder pressure drops. This creates a comfortable breathing experience that outperforms most regulators on the market. Its environmentally sealed design keeps water and contaminants out, preventing freezing and protecting against debris ingress in silty waters. Unique to Cressi regulators, the conical shape of the 1st stage filter provides a larger surface area for the efficient filtration of impurities from the cylinder. With more capacity to trap particles,

the filter can handle more contaminants before needing to be replaced. The Galaxy Adjustable 2nd stage excels in the cold and features an internal heat exchanger that keeps the 2nd stage functioning reliably. Adjusting your breathing effort is simple, thanks to the ergonomic adjuster, which is easy to grip - even when wearing gloves. The elliptical design provides a more ergonomic fit against the diver's face. This shape also means that the diaphragm has a larger surface area, reducing the effort required to open the valve during inhalation. This feature is particularly beneficial in high-demand situations or at depth. The GALAXY ADJUSTABLE uses our Safe-Flex hose, which is incredibly flexible compared with traditional hoses.

COMBINATION PERFORMANCE

- Average Cracking effort 3.5 mbar
- Average breathing effort 0.6 J/l

Jacketed hose extremely light and flexible weight: 153 gr

Certification EN250/2014 for cold water

Certification EN250/2014 for cold water

The T10-SEAL CHAMBER 1ST stage is environmentally sealed, protecting it against icing in cold water and against contamination from particulate matter in silty conditions.

PRODUCT BENEFITS

- Cold Water Certified EN 250 A < 10°C"
- The Hyperbalanced Diaphragm 1st stage increases airflow as cylinder pressure drops, for a consistent breathing experience at all depths.
- Environmentally sealed for cold/warm water diving - the 1st stage chamber stays dry, protecting the internal parts from freezing or contamination.
- 2 7/16 HP ports UNF 4 3/8 MP ports UNF
The ports are arranged in a T-shape to optimise hose routing and minimise the space required.
- With minimal inhalation effort, the T10 SC delivers a smooth, natural breathing experience and outperforms most regulators on the market.
- Chrome Plated 1st stage.
- Advanced pneumatically balanced 2nd stage reduces breathing effort at any depth, for an exceptionally smooth breathe during demanding dives.
- Adjustable venturi maximises airflow in dive mode and prevents free-flows when the regulator is on the surface.
- Easy-to-grip inhalation effort adjuster allows divers to customise the breathing effort for optimal comfort and performance.
- Patented elliptical diaphragm increases diaphragm surface area for a smoother and more responsive breathe, without added bulk.
- An internal heat exchanger prevents the 2nd stage from freezing for reliable performance in extreme diving conditions.

Set (DIN) + Hose tot. weight	957 gr

1ST STAGE

T10 SC PVD

2ND STAGE

MASTER

The Cressi T10 SC PVD Master is designed for divers who expect high levels of performance in demanding conditions. The T10-SC PVD 1st stage has a hyper-balanced diaphragm that adjusts airflow to match ambient water pressure for improved breathing performance at depth, even as cylinder pressure decreases. The environmentally sealed design keeps water and debris out to prevent the risk of freezing or contamination. A conical 1st stage filter offers a large surface area for the efficient filtration of impurities from the cylinder. The conical shape means that the filter can handle more contaminants before needing to be replaced. This high-performing 1st stage is finished in a super-tough PVD titanium coating that will

keep your regulator looking good for years. The Master 2nd stage features a premium laser-etched titanium front cover and the elliptical design fits naturally against the diver's face. The elliptical diaphragm has a large surface area, which reduces the effort needed to inhale, especially in high-demand situations or at depth. Cold water performance is further improved by the Master's internal heat exchanger, which uses warmth from the diver's breath, or the surrounding water, to stop ice from forming inside the regulator. A large breathing effort adjuster lets divers easily customise airflow, even when wearing gloves. The MASTER uses our Safe-Flex hose, which is incredibly flexible compared with traditional hoses.

Genova, 2005

Every dive requires reliable equipment that is also practical and easy to use. In the early 2000s, Cressi developed a truly innovative closure system for diving regulators. It was designed to make the second stage, one of the most important parts of diving equipment, easier and safer to use.

The heart of the idea was a frame that easily attached to the body of the regulator and kept the diaphragm, the flexible part that regulates the flow of air, stable. It took just a few simple steps to open and close it, making maintenance quicker too. This design represented an important step in the history of diving equipment. It anticipated modern solutions and demonstrated once again Cressi's focus on innovation and practicality, always with the real needs of divers in mind.

1ST STAGE

MC11 SC

2ND STAGE

ZEN PRO

Become one with the water. Welcome to the Zen of diving. The Cressi MC11 SC ZEN PRO regulator is exceptionally lightweight and compact, you'll barely know it's there on long dives and it delivers exceptional breathing performance, even under ice. The hyper-balanced diaphragm MC11SC 1st stage features Cressi's PressureSync technology, which maintains consistent Intermediate Pressure (IP) throughout each breathing cycle. This innovative design reduces pressure fluctuations in the 1st stage, delivering one of the smoothest and most comfortable breathing experiences available. The environmentally sealed design keeps the first-stage chamber dry, eliminating the risk of freezing and contamination. A high-capacity conical filter with a large surface

area traps more impurities from the cylinder, ensuring cleaner air and reduced maintenance. The ZEN PRO 2nd stage is purpose-built for cold-water performance, featuring a case made from an innovative Thermoconductive Polymer. This lightweight, durable material offers the heat transfer properties of metal, preventing ice from forming inside the 2nd stage. Radial pressure openings evenly distribute water pressure across the diaphragm, reducing free-flows and ensuring the 2nd stage only delivers air when needed, even in strong currents. With a nickel-plated anti-scratch coating and protective bumpers to guard against knocks and bumps, the MC11 SC ZEN PRO is ready for adventure, from temperate reefs to beneath the ice.

Become one with the water. Welcome to the Zen of diving. The MC11 ZEN is a travel-friendly regulator designed for water temperatures of 10°C and above. Its compact, ultralightweight design means you'll barely notice it's there, even on long dives. The balanced diaphragm MC11 1st stage features Cressi's PressureSync technology, which maintains consistent Intermediate Pressure (IP) throughout each breathing cycle. This innovative design reduces pressure fluctuations, delivering one of the smoothest and most comfortable breathing experiences available. A high-capacity conical filter traps more impurities from the cylinder than a standard flat filter, protecting internal

components, providing cleaner air and reducing maintenance needs. The ZEN 2nd stage has special Radial Pressure Openings that evenly distribute water pressure across the diaphragm, reducing free-flows and ensuring the 2nd stage delivers air only when needed, even in strong currents. The risk of a free-flow is further reduced thanks to the adjustable Venturi system, pre-dive mode minimises free-flows at the surface and dive mode optimises performance underwater. With a nickel-plated anti-scratch coating and protective bumpers to guard against wear and tear, the MC11 ZEN is built for warm-water adventurers.

VERSION DIN

Become one with the water. Welcome to the Zen of diving. The MC11 ZEN is a travel-friendly regulator designed for water temperatures of 10°C and above. Its compact, ultralightweight design means you'll barely notice it's there, even on long dives. The balanced diaphragm MC11 1st stage features Cressi's PressureSync technology, which maintains consistent Intermediate Pressure (IP) throughout each breathing cycle. This innovative design reduces pressure fluctuations, delivering one of the smoothest and most comfortable breathing experiences available. A high-capacity conical filter traps more impurities from the cylinder than a standard flat filter, protecting internal

components, providing cleaner air and reducing maintenance needs.

The ZEN 2nd stage has special Radial Pressure Openings that evenly distribute water pressure across the diaphragm, reducing free-flows and ensuring the 2nd stage delivers air only when needed, even in strong currents. The risk of a free-flow is further reduced thanks to the adjustable Venturi system, pre-dive mode minimises free-flows at the surface and dive mode optimises performance underwater. With a nickel-plated anti-scratch coating and protective bumpers to guard against wear and tear, the MC11 ZEN is built for warm-water adventurers.

PRODUCT BENEFITS

- Warm Water Certified EN 250 A > 10°C
- The Balanced Diaphragm 1st stage delivers consistent airflow during recreational and cold-water dives.
- 2 7/16 HP ports UNF 4 3/8 MP ports UNF
The ports are arranged in a T-shape to optimise hose routing while keeping the first stage compact.
- Cressi's PressureSync technology maintains Intermediate Pressure during the breathing cycle for a consistent breathing experience.
- Electroless Nickel Plated 1st stage.
- A simple and dependable downstream system 2nd stage offers reliable performance and a fail-safe design.
- Adjustable venturi maximises airflow in dive mode and prevents free-flows when the regulator is on the surface.
- Radial Pressure Openings prevent free-flows, ensuring the regulator delivers air only when needed, even when swimming against strong currents.
- Large purge button is easy to locate and use, even while wearing gloves.

2ND STAGE

COMPACT PRO

The MC9 SC + COMPACT PRO combines innovative materials with a compact and ultra-lightweight design. The balanced diaphragm MC9 SC 1st stage features Cressi's PressureSync technology, which maintains consistent Intermediate Pressure (IP) throughout each breathing cycle. This innovative design reduces pressure fluctuations in the 1st stage, delivering one of the smoothest and most comfortable breathing experiences available. The environmentally sealed chamber keeps water and debris away from the internal components, protecting lubricants and ensuring reliable performance in cold and warm water conditions. A high-capacity conical filter with a large surface area traps more impurities from the cylinder than traditional flat filters. This

improves air quality and protects the regulator from damage caused by debris entering the 1st stage - an essential feature for travelling divers using rented cylinders. The COMPACT PRO 2nd stage case is made from a Thermoconductive Polymer. This innovative lightweight material transfers warmth from the surrounding water or the diver's breath to the internal components, preventing ice from forming inside the 2nd stage. The adjustable Venturi system allows divers to fine-tune airflow, reducing free-flows at the surface and optimising performance during dives. With its elastomer bumpers, anti-scratch nickel-plated coating and impact-resistant front cover, the MC9 SC + COMPACT PRO is built to last.

COMBINATION PERFORMANCE

- Average Cracking effort 7.5 mbar
- Average breathing effort 1 J/l

Jacketed hose extremely light and flexible weight: 153 gr

Certification EN250/2014 for cold water

The MC9-SEAL CHAMBER 1ST stage is environmentally sealed, protecting it against icing in cold water and against contamination from particulate matter in silty conditions.

1ST STAGE

AC5

2ND STAGE

ZEN

The AC5 + ZEN is a workhorse regulator for dive centres. For use in water temperatures above 10°C, the AC5 1st stage uses a simple unbalanced piston design, known for its ease of maintenance. Large hydrostatic openings ensure that each post-dive rinse is as efficient as possible, essential for extending the regulator's lifespan. Unique to Cressi is the AC5's external 1st stage IP adjustment system. This allows service centres to fine-tune the intermediate pressure while the regulator is attached to the cylinder, providing a quick fix to keep it in use until the next service interval. The high-capacity conical filter, which offers a larger surface area than traditional flat filters, traps impurities before they damage the internal components of the 1st stage.

Compatible with parts from the AC25 and AC2 models, the AC5 shares a single maintenance kit for INT and DIN versions, simplifying and reducing servicing costs. The ZEN 2nd stage adds lightweight performance and comfort to this hard-working setup. Its thermoconductive Polymer case offers all the benefits of metal but without the extra weight, and radial pressure openings evenly distribute water pressure across the diaphragm to reduce free-flows. This combination makes the Zen perfect for new divers using a regulator for the first time. With its simple design, low-maintenance requirements and affordable price point, the AC5 + ZEN is a reliable and cost-effective choice for professional dive centres.

MG BALANCED

The Cressi MG Balanced Octo is a reliable, easy-breathing backup regulator that performs when it matters most. Its pneumatically balanced valve delivers the same breathing performance as a primary regulator and the adjustable Venturi helps avoid free-flows at the surface and when not in use underwater. Certified to Annex B of EN 250:2014 for cold-water diving, the MG Balanced Octo has an internal heat

exchanger that prevents freezing, even during rapid inhalation and exhalation. The patented elliptical shape of the diaphragm increases its surface area and reduces the effort needed during inhalation. Lightweight and ergonomic, the MG Balanced Octo reduces jaw strain, and its highly visible yellow colouring allows for quick identification in an emergency.

PRODUCT	CODE		RRP €
OCTOPUS MG BALANCED REGULATOR	HX880000		179.99 €

ZEN PRO

NEW 2026

Compact and lightweight, the Cressi Zen Pro Octo delivers the same comfortable breathing experience as the Zen Pro 2nd stage, but in high-visibility yellow for easy identification in emergencies. Designed for cold-water performance, the Zen Pro Octo features a Thermoconductive Polymer case, which transfers warmth from the surrounding water or the diver's breath to the internal components. This helps prevent ice buildup inside the Octo, especially during high breathing demand – such as during emergency use. The large purge button is easy to locate and operate when needed. The adjustable Venturi lets divers fine-tune airflow, reducing free-flows at

the surface and during dives. Radial pressure openings evenly distribute water pressure across the diaphragm, further minimising the risk of free-flows and ensuring the Octo delivers air only when needed, even in strong currents. Built with a fail-safe downstream design, the Zen Pro Octo continues to deliver air even in the event of a malfunction, ensuring a reliable backup air source when it matters most. Maintenance is quick and cost-effective, with an ergonomic design that allows for easy disassembly and reassembly without specialised tools, reducing downtime and servicing costs.

resistant purge button that is easy to locate and operate when needed. The adjustable Venturi can be set to pre-dive mode to reduce free-flows, allowing divers to set the sensitivity of the Octo when it's not in use. Built with a fail-safe downstream design, the Compact Octo continues to deliver air, even in the event of a malfunction, ensuring a reliable backup air source when it matters most.

PRODUCT	CODE	RRP €
OCTOPUS COMPACT REGULATOR	HX789000	109,99 €

XS2

"Time-proven and highly affordable, the Cressi XS Octo is ideal for divers looking for a simple, low price point back-up regulator. Its low maintenance and ultra-reliable design also make it a favourite among dive schools and rental centres. Designed for use in water temperatures above 10°C, the XS Octo has an

adjustable Venturi that can be set to pre-dive mode to reduce free-flows, allowing divers to set the sensitivity of the Octo when it's not in use. Built with a fail-safe downstream design, the XS Octo continues to deliver air, even in the event of a malfunction, ensuring a reliable backup air source when it matters most.

MADE IN ITALY

35,1x24 cm - 13.8x9 in

PRODUCT BENEFITS

- Warm Water Certified EN 250 A > 10°C
- A simple and dependable downstream system offers reliable performance and a fail-safe design.
- Large purge button is easy to locate and use in an emergency.
- Adjustable venturi maximises airflow in dive mode and prevents free-flows when the regulator is on the surface.

Certification EN250/2014 A>10° C

MC11 SC

10,5x16x7,5 cm
4.1x6.2x2.9 in

The MC11SC first stage unlocks your next level of diving: You can dive deeper, colder, more streamlined. This first stage is a dry sealed, cold-water suitable hyperbalanced diaphragm system, power-packed into an ultra-compact size. SC stands for sealed chamber and only adds 30grams to the standart, warm water MC11, but additionally keeps its working components dry and clean, preserving lubrication and protecting them from corrosion, while the shockproof technopolymer protection helps to maintain this first stage to look "like new" for many years of diving.

MC11

10,5x16x7,5 cm
4.1x6.2x2.9 in

The MC11 first stage is a hyperbalanced diaphragm system, power-packed into an ultra-compact size, ready for your global underwater explorations. The MC11 stands out in the global regulator market by using our proprietary Cressi PressureSync System, a Cressi innovation that drastically reduces the typical drop in working pressure at the beginning of the inhaling phase. Due to the Cressi PressureSync System, your entire inhalation phase will be even and fully supported by 100% of the working pressure – during every breath you take. With two high-pressure ports, it also offers extra safety by allowing a redundant pressure gauge.

AC5

10,5x16x7,5cm
4.1x6.2x2.9 in

The AC5 is a piston-controlled first stage that represents the workhorse of the diving industry: simple, robust, reliable! At Cressi, all piston first stages feature our proprietary external direct adjustment system, reducing the regular need for replacement parts or shims, thus minimizing service costs over many years. The AC5 boasts an optimized design for maximum flow and a conical filter for improved filtration in both versions, DIN or INT. Enlarged water passage slots allow for perfectly efficient rinsing, better pressure balance, and enlarged tool housing holes for easy maintenance.

AQUAWING MAX

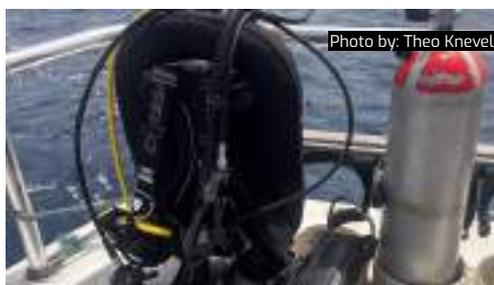

THE HIGH-LIFT WING-STYLE BCD THAT ADAPTS TO YOU AND YOUR ENVIRONMENT.

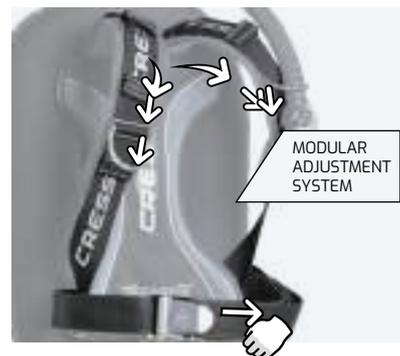

The Cressi Aquawing Max is a one-size-fits-all donut-style BCD. Designed for maximum buoyancy and stability, the Aquawing Max boasts a high-lift capacity and is particularly suitable for cold-water divers using extra weight to compensate for thick wetsuits or drysuits. Featuring Cressi's innovative Modular Adjustment System (MAS), the Aquawing Max is suitable for both men and women thanks to a quick-adjust, continuous weave harness system. Finding your perfect fit is a breeze, simply pull on the waist straps to tighten the shoulder straps. Pull outwards on the shoulder straps to loosen it again. This incredible range of adjustment means you'll always get a snug fit, whether you're wearing a drysuit or a t-shirt. The lightweight anodised aluminium

back plate provides all the stability you need, with integrated quick-release weight pockets attached directly to the back plate in the hip area. Two additional weight pockets on the cylinder band allow you to add trim weights to give the feeling of a steel back plate. An optional 2.5kg back bar is also available, helping counterbalance the forward-leaning tendency of back-inflation BCDs. The back plate cover and shoulder strap lining are made from Cressi's proprietary Air-Net material, a padded fabric that is quick-drying, neutrally buoyant and comfortable. Whether you're a travelling diver looking to reduce bulk, or a cold-water explorer needing the extra buoyancy, the Aquawing Max has you covered.

PRODUCT BENEFITS

- Exceptionally high lift for divers wearing drysuits or carrying extra equipment. Lift: 170 N - 17 kg - 38 lb).
- Highly adjustable, one size fits all.
- Features Cressi's Modular Adjustment System harness for a secure fit that adapts to all body shapes.
- Two integrated quick-release weight pockets (which can be removed using an Allen key) and two back trim weight pockets.
- A quick-release crotch strap for added stability and comfort, preventing ride-up at the surface and during the dive.
- The inflator hose incorporates a shoulder pull dump, providing quick and easy buoyancy adjustments.
- An integrated cylinder grip, made from durable thermoplastic rubber, keeps the cylinder in place and prevents unwanted movement during the dive.
- The padded shoulder straps and backplate cover use Cressi's Air-Net material which is comfortable, quick drying and neutrally buoyant.
- The donut design fits neatly around a single cylinder, creating a streamlined profile with minimal air migration for better trim and buoyancy control.
- Four pre-bent stainless steel D-rings and a useful pocket for storing your Surface Marker Buoy.

AQUAWING PLUS

A MINIMALIST WING-STYLE BCD WITH THE BENEFIT OF AN INTEGRATED WEIGHT SYSTEM.

MODULAR ADJUSTMENT SYSTEM

WEIGHT POCKETS INCLUDED

The Cressi Aquawing Plus is a one-size-fits-all donut-style BCD. Featuring Cressi's industry-leading Modular Adjustment System (MAS), the Aquawing Plus offers a custom fit for both men and women. The continuous weave harness system allows you to fine-tune the adjustment of your harness so that it fits snugly to the shape of your body. Simply tighten the shoulder straps by pulling the waist straps, then loosen them in seconds by releasing the waist buckle and pulling up on the shoulders. This impressive adjustment range means you'll always get a perfect fit, whether you're drysuit diving or t-shirt diving. Compact and streamlined, the Aquawing Plus is exceptionally stable underwater thanks to the donut shape air cell, which allows air to

migrate evenly for consistent buoyancy and precise trim control. A crotch strap ensures the BCD stays in place during your dive, for precise trim and balance in the water. Integrated weight pockets are securely attached to the lightweight anodised aluminium back plate, and weight pockets on the cylinder band allow for further adjustments to optimise buoyancy. An optional 2.5kg back plate bar is also available, helping counterbalance the forward-leaning tendency of back-inflation BCDs. Cressi's innovative Air-Net material lines the shoulder straps and covers the back plate. Soft and padded, the material drains quickly and is neutrally buoyant. The Aquawing Plus is ideal for divers seeking a compact back plate and wing configuration.

EMPEROR

A LUXURIOUS, COMFORTABLE AND HIGHLY ADJUSTABLE HYBRID INFLATION BCD.

50MM PIVOTING BUCKLES

The Cressi Emperor hybrid BCD combines the benefits of jacket-style and back-inflation designs, offering surface stability and a streamlined underwater trim. Designed for comfort, the Emperor features Cressi's patented Self-Pivoting Waistband (SPWB) system. This innovative design connects the waist straps to the jacket with a pivoting mechanism above the hips, allowing the waistband and jacket to move independently and naturally with your body for improved freedom of movement and a secure fit. The shoulder straps have wide 50mm pivoting buckles that adjust as you move your shoulders. This adaptability is further improved by a sliding D-ring connection on the lower strap, making the BCD comfortable to use and easy to put on - even when manoeuvring

around drysuit valves. For a truly individual fit around the shoulders and chest, the adjustable chest strap can slide up or down, allowing you to position it for personal comfort or to accommodate a drysuit inflator hose. The Emperor's semi-rigid padded back plate means the BCD can be folded for compact storage in your dive bag. The soft Air-Net lining adds comfort and promotes quick water drainage, without adding buoyancy. Two large zippered pockets and six steel D-rings provide generous storage and attachment options. Cressi's Flat Lock Aid integrated weight system, rear weight pockets and accessible dump valves make it easy to fine-tune your trim and buoyancy, ensuring a balanced and enjoyable dive.

BACK WEIGHTPOCKETS

FLAT LOCK SYSTEM

PRODUCT BENEFITS

- An impressive high lift capacity (Size M Lift: 21,4 kg - 47 lb)
- Hybrid design combines the benefits of wraparound and back-inflation buoyancy.
- Cressi's quick-release Flat Lock Aid integrated weight system, plus two additional pockets on the rear, help achieve optimal trim.
- An easy-to-reach inflator and two accessible dump valves (top right shoulder/bottom right) for quick buoyancy adjustments.
- The semi-rigid, comfortable backrest can be folded and carried compactly, and an Air-Net lining provides comfort and promotes water drainage.
- Cressi's patented Self-Pivoting Waistband (SPWB) ensures the BCD moves with your body for greater freedom of movement.
- 50mm pivoting shoulder buckles and a lower D-ring connection ensure shoulder straps move with your body for added comfort and range of movement.
- Adjustable chest strap that moves up and down for personalised comfort.
- Two large, zippered pockets provide convenient storage for accessories.
- Six steel D-rings offer secure attachment points for additional gear.

COMMANDER EVO

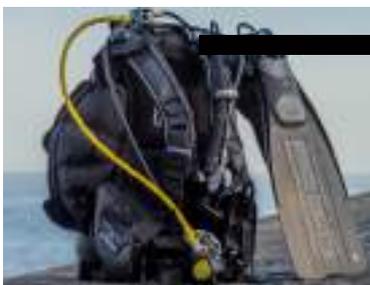

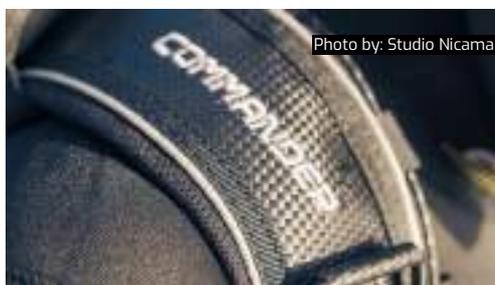

A PREMIUM AND IMPRESSIVELY LIGHTWEIGHT BACK-INFLATION BCD WITH MAXIMUM COMFORT.

The Cressi Commander Evo is a back-inflation BCD that blends the streamlined performance of a rear-mounted air cell with the versatility of a traditional wraparound jacket. The air cell positions buoyancy behind the body, ensuring unrestricted movement even when fully inflated. Compression bungee straps wrap around the bladder for rapid deflation, keeping the unit neat and compact at all times. Unlike a pure wing-and-harness setup, the Commander Evo features a cummerbund-style waist strap with integrated weight pockets. Using Cressi's Flat Lock Aid quick-release design, weights are held securely in place but are easy to release

when needed. Rear weight pockets on the cylinder band allow for fine-tuning your trim. The Commander Evo's ultralight rigid harness includes an integrated carrying handle so that you can lift your BCD and cylinder with the back plate taking the weight, not the shoulder straps. Two large, zippered cargo pockets offer plenty of storage, while eight pre-bent D-rings (4x50mm aluminium and 4x25mm stainless steel) provide useful attachment points. Combining high buoyancy with a lightweight design, the Cressi Commander Evo is perfect for divers seeking freedom of movement and comfort.

ADJUSTABLE WAIST BAND

FLAT LOCK SYSTEM

PRODUCT BENEFITS

- A high lift back-mounted air cell offers buoyancy without restricting movement (Size M Lift: 19.3 kg - 42.7 lb).
- Air cell compression straps ensure quick deflation and a streamlined profile.
- The ultralight rigid harness includes a handle, making it easy to lift and carry your BCD and cylinder without straining the shoulder straps.
- The top of the air bladder is attached using flexible loops, allowing it to adapt comfortably whether you're diving in a wetsuit or drysuit.
- Features Cressi's Flat Lock Aid integrated weight management system for secure, quick-release weight management.
- Two cylinder strap weight pouches help optimise trim and buoyancy.
- Multipurpose zippered pockets provide ample storage for accessories.
- Eight D-rings (4 aluminium and 4 stainless steel) offer plenty of gear attachment points.
- Three dump valves for quick buoyancy adjustments, whatever your position in the water.
- Anatomical inflator with hose retainer for streamlined and intuitive operation.

SCORPION

A PREMIUM AND IMPRESSIVELY LIGHTWEIGHT BACK-INFLATION BCD WITH MAXIMUM COMFORT.

The Cressi Scorpion is a high-lift back-inflation BCD that combines exceptional comfort with a lightweight design. The back-mounted air cell positions all the buoyancy behind the diver, leaving the shoulders and waist area free from inflation. This design eliminates bulk around the torso, providing unrestricted movement and a more natural range of movement. Compression bungee straps around the air cell enable rapid deflation and ensure the BCD remains streamlined during use. The ultralight semi-rigid back plate can be folded during transportation and the inside of the BCD is lined with Cressi's Air-Net material, which is soft, quick draining and neutrally buoyant. Side lumbar pads can be adjusted to create a personalised fit based

on your height and the waist straps feature a tension system. Pull forward on the waist straps and the BCD tucks in for a snug, secure fit around your back. Quick-release shoulder strap buckles make removing the BCD simple. Cressi's Flat Lock Aid integrated weight pockets are positioned vertically at the back of the harness and can be easily accessed from any angle. Two multipurpose zippered pockets and four aluminium D-rings (2x50 mm on the shoulder straps and 2x25 mm on the pockets) provide plenty of storage options for additional dive kit. With its durable construction, the Cressi Scorpion is perfect for divers looking for a lightweight and customisable BCD.

FLAT LOCK SYSTEM

PRODUCT BENEFITS

- A high lift back-mounted air cell provides buoyancy without restricting movement (Size M Lift: 15.2 kg - 33.7 lb)
- Compression straps on the air cell for quick deflation and a streamlined profile.
- Ultralight semi-rigid harness and a soft, padded Air-Net lining add stability and comfort, even if you're only wearing a t-shirt.
- The top of the air bladder is attached using flexible loops, allowing it to adapt comfortably whether you're diving in a wetsuit or drysuit.
- Adjustable lumbar pads and a waist strap tension system ensure a custom fit.
- Features Cressi's Flat Lock Aid integrated weight system for secure, quick-release weight management.
- Three dump valves, including a low-profile inflator hose exhaust valve with a non-return system that prevents water entry.
- Two multipurpose zippered pockets with a separate net inside for storing accessories and holding extra weight.
- Four aluminium D-rings provide additional attachment points for dive kit.

PATROL

A HIGH LIFT BACK-INFLATION BCD DESIGNED FOR MAXIMUM COMFORT AND DURABILITY.

The Cressi Patrol is a lightweight back-inflation BCD, perfect for travelling divers or anyone who prefers a minimal BCD configuration. The rear-mounted air cell keeps buoyancy behind the diver, reducing bulk around the torso and allowing unrestricted movement underwater. Compression straps around the air cell ensure rapid deflation and maintain a streamlined profile throughout your dive. The ultralight rigid backplate features a built-in carrying handle and is covered by soft but neutrally buoyant Air-Net padding for extra comfort. The harness and chest strap can be adjusted by a full size up or down, so if you dive in different water temperatures, the Patrol will fit

perfectly whether you're wearing a rashguard or a drysuit. Cressi's Flat Lock Aid integrated weight system keeps your weight secure while allowing for quick release when needed. Optional cylinder strap weight pockets can be used for additional buoyancy control and improved trim. A convenient hideaway cargo pocket tucks away neatly when not in use and six plastic D-rings keep the Patrol lightweight while providing useful attachment points for accessories. With its durable and comfortable construction, the Cressi Patrol is a reliable choice for divers looking for minimal simplicity in their BCD.

PRODUCT BENEFITS

- A high lift back-mounted air cell provides buoyancy without restricting movement (Size M Lift: 19.3 kg - 42.7 lb)
- Air cell compression straps ensure quick deflation and a streamlined profile.
- The ultralight rigid harness includes a handle, making it easy to lift and carry your BCD and cylinder without straining the shoulder straps.
- The harness and chest strap can be adjusted by a full size up or down.
- Features Cressi's Flat Lock Aid integrated weight system for secure, quick-release weight management.
- Three dump valves, including a low-profile inflator hose exhaust valve with a non-return system that prevents water entry.
- Roll-away cargo pocket for storage of accessories.
- Six lightweight plastic D-rings minimise weight without sacrificing functionality.
- Optional cylinder strap weight pockets for fine-tuning trim.

AQUARIDE

A CLASSICALLY STRUCTURED BCD WITH AN EXCEPTIONALLY FLAT PROFILE.

The Cressi Aquaride is a jacket-style BCD with an innovative feature. Unlike traditional wraparound inflation BCDs, the Aquaride's anatomically shaped shoulder straps are independent of the air cell and don't inflate. This provides a consistent, comfortable fit while reducing pressure on the shoulders when supporting the weight of your cylinder. The waist area is also independent of the air cell, ensuring the BCD doesn't feel tight when fully inflated, offering comfort at any buoyancy level. The ultralight rigid backplate features a built-in handle for easy carrying and is covered with Cressi's Air-Net padding, which is soft, quick-draining and neutrally buoyant. Expanding zippered pockets provide flexible

storage for dive essentials and can be easily accessed thanks to the ergonomic location of the zipper pull. With eight pre-bent stainless-steel D-rings that sit slightly proud of the BCD for ease of clipping off dive kit, the Aquaride has plenty of options for stowing your accessories. There are even dedicated pockets for your gauge and octopus, keeping them visible while neatly tucking away the hose. Cressi's Flat Lock Aid integrated quick-release weight pockets offer secure and streamlined weight storage, while quick-attach rear weight pockets (2kg capacity) allow you to fine-tune your trim. Constructed with durable materials, the Cressi Aquaride is lightweight and comfortable.

TRAVELIGHT

A LIGHTWEIGHT BCD DESIGNED TO BE FOLDED INTO ITS OWN COMPACT TRAVEL BAG.

The Cressi Travelight is the perfect BCD for divers who enjoy the sense of freedom provided by minimal jackets. Weighing just 2.5 kg (size M), the Travelight is ideal for travelling divers, folding down to a compact 135 cm³ (36 x 25 x 15). An integrated strap wraps around the BCD to keep it neatly folded in your luggage and doubles as a crotch strap during dives. The entire BCD packs into its own carry case, the ultimate in space-efficient dive kit. Thanks to its anatomical cut and ultra-light design, the Travelight is exceptionally hydrodynamic. The design of the air bladder enhances lateral air distribution, promoting a balanced and stable trim underwater. The waist strap is independent

of the air bladder and so doesn't inflate, ensuring a comfortable fit without constriction. The Travelight incorporates Cressi's Flat Lock Aid integrated weight system, securing weights with a spring-loaded mechanism for easy insertion and quick-release functionality. Two additional rear weight pockets allow you to fine-tune your trim. Spacious, expanding zippered pockets offer ample storage for accessories, while six pre-bent, lightweight alloy D-rings provide multiple attachment points for additional gear. Lightweight yet durable enough to handle regular use, the Cressi Travelight is an ideal companion for travelling divers looking for comfort and convenience.

FAST FOLDING SYSTEM

FLAT LOCK SYSTEM

PRODUCT BENEFITS

- A wraparound style jacket BCD (Size M Lift:9.1 kg - 20.2 lb)
- The ultra-lightweight design (2.5 kg, size M) is ideal for travelling or minimalist divers.
- Folds into its own carry bag measuring just 36cm x 25cm x 15cm.
- When folded, the BCD can be secured with a wraparound strap that doubles as a crotch strap during dives.
- Hydrodynamic and anatomical cut reduces drag for smooth underwater movement.
- The waist strap is independent of the air bladder so that the jacket will always fit properly without feeling constrictive when inflated.
- Uses Cressi's Flat Lock Aid integrated weight system for secure weight management, plus two rear weight carrying pockets.
- Two spacious zippered pockets with gussets and eight aluminium D-rings for storing accessories.
- Constructed with durable materials that are strong yet lightweight.
- Adjustable padded shoulder straps and a wide comfortable cummerbund.

START PRO ALSO FOR RENTAL

A HIGH-LIFT WEIGHT-INTEGRATED BCD DESIGNED FOR NEW DIVERS AND RENTAL USE.

The Cressi Start Pro is a durable, weight-integrated BCD designed for beginners, dive schools and rental programmes. Built for frequent use, it features a tough 500-denier Cordura exterior and 420-denier nylon interior for durability in demanding environments. The Start Pro's large wings deliver ample lift, while the independent waist strap ensures unrestricted comfort, even when fully inflated. The Fixed Gravity Pocket system secures weights in vertical pockets with a buckle. When released, weights drop out and the pocket remains attached - an effective alternative to ditchable pouches. A lightweight backplate with an integrated carry handle allows easy

transport of a fully set-up rig without stressing the straps. A rubber cylinder grip and tank valve strap provide excellent stability on the surface and underwater. Practical features include two large zippered pockets, six durable plastic D-rings for accessories and three relief valves for precise buoyancy control. The non-return upper dump valve minimises water entry into the bladder, extending its lifespan. A size patch on the shoulder ensures quick identification, making it easy for dive centre staff to find the correct fit quickly. Practical, reliable, and user-friendly, the Cressi Start Pro is a top choice for dive professionals and new divers alike.

PRODUCT BENEFITS

- A wraparound style jacket BCD (Size M Lift:15.2 kg - 33.7 lb)
- High buoyancy levels, ideal for entry-level divers or cold water use.
- Constructed with heavy-duty Cordura Nylon material to handle challenging environments like chlorine pools and saltwater.
- An ultralight rigid backplate with padding and an integrated handle makes lifting and carrying the BCD easy.
- "The Fixed Gravity Pocket integrated weight system with quick-release safety buckle ensures weights can be released quickly."
- Two large, multipurpose zippered pockets and six durable plastic D-rings provide plenty of storage options.
- Dedicated gauge and octopus holders to keep equipment neat, streamlined and easily accessed.
- Rubber pads grip the cylinder securely, preventing movement and improving balance and stability underwater.
- Two dump valves and a non-return upper dump valve to prevent water infiltration.
- Clear size markings on the shoulder strap make it easy to select the right fit quickly and efficiently.

A HIGH-LIFT BCD DESIGNED FOR NEW DIVERS AND RENTAL USE.

GAUGE AND OCTOPUS HOLDER

The Cressi Start is a no-nonsense BCD designed around the needs of dive centres, while also offering a reliable and affordable option for new divers investing in their first BCD. Built with comfort and functionality in mind, the Start features an exceptionally tough 1000-denier Cordura exterior paired with a 500-denier interior. Cordura's abrasion-resistant qualities make it perfect for dive centre BCDs, which are used daily and often inflated to maximum capacity. The waist strap is independent of the air bladder, preventing constriction during inflation, and the chest strap keeps shoulder straps securely in place. The lightweight, compact, semi-rigid backplate features an

integrated carry handle, making it easy to move around once the cylinder and regulators are connected - ideal for instructors who may be handling a lot of student equipment. Other practical design features include high-capacity zippered pockets and integrated octopus and gauge holders to keep your equipment streamlined, organised and within easy reach. For added convenience, size markings on the right shoulder pad allow dive centre staff to identify the correct size quickly. With its affordable price point and durable design, the Cressi Start is an excellent choice for dive schools and beginner divers.

SOLID PLUS

A WEIGHT-INTEGRATED BCD DESIGNED FOR HEAVY AND REPEATED USE.

The Cressi Solid Plus is a superior weight-integrated BCD designed specifically for dive centres and rental programmes. Built to handle frequent use, it features a durable 500-denier Cordura exterior and 420-denier nylon interior, ideal for harsh environments like chlorine pools. Its impressive size-to-lift ratio makes it the perfect BCD for new divers and cold-water operators. Comfort and practicality are central to the design of the Solid Plus, with a lightweight backplate featuring an integrated carrying handle that makes it easier to lift a fully set-up rig. Adjustable shoulder straps with 50mm buckles provide a secure fit, while the chest strap includes an emergency whistle. The waist strap is independent of the air cell, so the

wearer doesn't feel restricted, even if the jacket is fully inflated. The highly visible coloured pad on the back protects the jacket from abrasion caused by the first stage rubbing against an inflated air cell and helps instructors identify students at busy dive sites. The size is also clearly marked on the right shoulder strap for simple stock control. A rubber grip and valve strap keep the cylinder in place and a second cylinder strap can be added for extra stability. Two zippered pockets and dedicated octopus/console pockets keep the diver streamlined, while the integrated Quick Lock System ensures weights can be released quickly. The Cressi Solid Plus is the BCD of choice for professional dive operators.

A TOUGH, RESILIENT BCD DESIGNED FOR DIVE CENTRES AND RENTAL PROGRAMMES

GAUGE AND OCTOPUS HOLDER

The Cressi Solid is a straightforward BCD designed to meet the demands of dive schools and rental operators. Built to handle multiple dives a day, it features a 500-denier Cordura exterior and 420-denier nylon interior for exceptional durability in harsh environments like chlorine pools. The lightweight backplate with an integrated carry handle makes it easy to lift a fully assembled rig. Adjustable shoulder straps with 50mm buckles ensure a snug fit and the chest strap includes an emergency whistle for added safety. The independent waist strap is unaffected by air cell inflation, ensuring the wearer doesn't feel constricted. For stability underwater, the Solid uses a rubber

cylinder grip and valve strap to secure the tank, with an option to add a second strap for extra security. Two zippered pockets provide ample storage, while dedicated octopus and console pockets keep gear organised and visible for instructors and dive guides. A brightly coloured pad protects against abrasion caused by the first stage rubbing against an inflated air cell and improves visibility, making it easy for instructors to spot divers in busy conditions. Size markings on the right shoulder strap simplify stock management. With a high size-to-lift ratio, the Solid is an ideal BCD for cold-water operators and an excellent choice for new divers.

- 1 7/16 HP ports UNF 4 3/8 MP ports UNF
- Large hydrostatic openings make the 1st stage very easy to rinse between dives, efficiently removing salt and debris.
- Gun Metal Chrome Plated 1st stage.
- A simple and dependable downstream system 2nd stage offers reliable performance and a fail-safe design.
- Adjustable venturi maximises airflow in dive mode and prevents free-flows when the regulator is on the surface.
- Radial Pressure Openings prevent free-flow, ensuring the regulator delivers air only when needed, even when swimming against strong currents.
- Large purge button is easy for new divers to use.
- Compact and lightweight 2nd stage weight (without hose): 149 gr

MINI SPG

- Gauge dial is color-coded in red, yellow and green for instant readability.
- Reads pressures to 350 bar
- Rugged mini-gauge has a chrome-plated brass case.
- Compact rubber boot is textured for a sure grip.
- Connection loop up-top is perfect for attaching a clip or bungee.

84,5x58,3 cm - 33.2x22.9 in

START PRO

- A wraparound style jacket BCD (Size M Lift:15.2 kg - 33.7 lb)
- High buoyancy levels, ideal for entry-level divers or cold water use.
- Constructed with heavy-duty Cordura Nylon material to handle challenging environments like chlorine pools and saltwater.
- An ultralight rigid backplate with padding and an integrated handle makes lifting and carrying the BCD easy.
- "The Fixed Gravity Pocket integrated weight system with quick-release safety buckle ensures weights can be released quickly."
- Two large, multipurpose zippered pockets and six durable plastic D-rings provide plenty of storage options.
- Dedicated gauge and octopus holders to keep equipment neat, streamlined and easily accessed.
- Rubber pads grip the cylinder securely, preventing movement and improving balance and stability underwater.
- Two dump valves and a non-return upper dump valve to prevent water infiltration.
- Clear size markings on the shoulder strap make it easy to select the right fit quickly and efficiently.

MC9+COMPACT+COMPACT

- Warm Water Certified EN 250 A > 10°C
- The Balanced Diaphragm 1st stage delivers consistent airflow during recreational and cold-water dives.
- 2 7/16 HP ports UNF 4 3/8 MP ports UNF
 The ports are arranged in a T-shape to optimise hose routing while keeping the first stage compact.
- Cressi's PressureSync technology maintains Intermediate Pressure during the breathing cycle for a consistent breathing experience.
- Electroless Nickel Plated 1st stage.
- A simple and dependable downstream system 2nd stage offers reliable performance and a fail-safe design.
- Adjustable venturi maximises airflow in dive mode and prevents free-flows when the regulator is on the surface.
- Large purge button is easy to locate and use, even while wearing gloves.
- Ultra-compact and ultra-lightweight 2nd stage weight (without hose):135 gr

PD2

- Pressure gauge dial is color-CODEd in red, green and blue for instant readability.
- Reads pressures to 350 bar.
- Mini-depth gauge reads to 70 meters.
- Maximum depth indicator.
- Luminescent face on the depth gauge.
- Depth indications spaced out in first 12 meters (40 feet) for precise readings during safety stops.
- Both instruments built with chrome-plated brass case for maximum durability.
- Compact rubber boot is textured for a sure grip.
- One connection loop, at the top side, for attaching a clip or bungee.
- Weight of console: 420 g (includes hose).

FLASHLIGHTS

/ FLASHLIGHTS | HIGH PERFORMANCE LEDS

ASTRA 2100

LED DIVING LIGHT

Astra 2100 is the underwater torch that transforms every dive into an extraordinary visual experience. Equipped with an advanced CREE XHP50 LED, this torch not only illuminates the dark depths with 2000 lumens of power, but also enhances underwater colors, making every detail bright and vivid like never before. Ideal for underwater explorers, Astra allows you to discover the mysteries of the marine world in all their vibrant beauty. With three lighting modes—100%, 50%, and strobe—suitable for every need, Astra ensures light duration from 4 to 7 hours, allowing for long underwater explorations. The heart of Astra beats thanks to a rechargeable 5000mAh lithium battery, which fully charges in just 3 hours through an innovative magnetic connector. This charging system is designed to withstand sand, salt, and other external agents, ensuring reliability and functionality under any condition. Made from

sturdy and lightweight aluminum alloy, with a reduced weight of 438 grams, Astra is as durable as it is manageable. Its IPX8 certified waterproof up to 100 meters and impact resistance from 1 meter make it the perfect ally for every dive. Our torches are equipped with an advanced protection system against overcharging: the charging circuit automatically interrupts the charge when the battery is full, while the internal protection board prevents the voltage from exceeding 4.20V. Power supplies with safety certifications up to 66W can be used. The torches can also be used on the surface without the need for thermal protection. The battery has a built-in safety valve for gas release, without the need for an external valve. The charger is not included; only the USB-A cable is supplied.

ASTRA 1200

LED DIVING LIGHT

Astra 1200 is a compact and lightweight diving torch that delivers an exceptional visual experience during dives. Equipped with a CREE XPL2 LED, this torch illuminates the underwater world with 1200 lumens, enhancing color perception and making every detail sharp and vivid. It's ideal for marine exploration enthusiasts who want a handy yet powerful torch. It offers three lighting modes—100%, 50%, and strobe—that adapt to various underwater conditions, with battery life ranging from 3 to 5 hours depending on the mode used, thus allowing for extended dives. The Astra 1200 recharges in 4 hours via a magnetic connector that resists external agents such as sand and salt. Constructed from aluminum alloy, it weighs only 240 grams, making it extremely

lightweight and easy to handle. Certified IPX8, it can be submerged up to 100 meters and withstands impacts from 1 meter, ensuring reliability and durability. Our torches are equipped with an advanced protection system against overcharging; the charging circuit automatically interrupts the charge when the battery is full, while the internal protection board prevents the voltage from exceeding 4.20V. Power supplies with safety certifications up to 66W can be used. The torches can also be used on the surface without the need for thermal protection. The battery has a built-in safety valve for gas release, without the need for an external valve. The charger is not included; only the USB-A cable is supplied.

HUNT

SPEARFISHING LED LIGHT

The Hunt torch, specifically developed for spearfishing, combines power and functionality in an ergonomically advanced design. Equipped with a Luminus SST40 LED, it emits a brightness of 1600 lumens and a light beam that reaches over 290 meters (in the air), perfect for environments with limited visibility. The ergonomic design is enhanced by a curved profile that ensures a comfortable and secure grip, further improved by an integrated grip and anti-slip button, ideal for intuitive use even with diving gloves. This allows the diver to activate the light only when necessary, thereby maximizing battery life and minimizing the risk of startling fish. The torch is made from high-quality materials that not only provide robustness and impact resistance up to 1.5 meters but also ensure waterproofness up to 100 meters deep (IPX8). It features a built-in 5000 mAh battery, rechargeable through

an innovative magnetic USB connector. This charging solution is particularly advantageous as it prevents the entry of sand, salt, or dust into the connection components, ensuring greater reliability and ease of maintenance. The torch promises up to 2 hours of continuous operation, making it an essential accessory for every spearfishing enthusiast. Our torches are equipped with an advanced protection system against overcharging; the charging circuit automatically interrupts the charge when the battery is full, while the internal protection board prevents the voltage from exceeding 4.20V. Power supplies with safety certifications up to 66W can be used. The torches can also be used on the surface without the need for thermal protection. The battery has a built-in safety valve for gas release, without the need for an external valve. The charger is not included; only the USB-A cable is supplied.

THANKS TO THERMOPLASTIC RUBBER COATING AND HIGHLY ASYMMETRIC DESIGN

SWITCH WITH 3 POSITIONS
OFF : ON UNSTABLE WITH AUTOMATIC RETURN ; ON

NARROWED LIGHT BEAM
APPROXIMATELY 6° SPOT LIGHT BEAM THANKS TO TIR LENS

ADJUSTABLE ELASTIC STRAP
TO CUSTOMISE THE USAGE ACCORDING TO YOUR NEEDS

NEUTRAL WHITE COLOR TEMPERATURE
SIMILAR TO SUNLIGHT FOR MAXIMUM RETURN OF THE COLORS

LUMIA +

STANDARD LIGHT

NEW WHITE COLOR TEMPERATURE

The LED has a white color temperature similar to sunlight for maximum return of the colors in the underwater environment. The light beam of the LED is narrowed into a spot light beam of about 6° by means of a lens made of ultra-transparent material protected by the polycarbonate optical porthole.

ACTIVE ELECTRONICS

Power is supplied by four AA "Stylus" batteries, either alkaline or rechargeable. The power supply has an electronic management system that eliminates the gap between the different electrical potentials of different types of batteries and ensures an efficiency of 30% higher than the commonly used systems. The active electronics of the flashlight guarantee constant light, even when the battery charge decreases. When the charge drops below the safety threshold value, the lighting level will reduce to warn the user that the batteries are depleted.

TECHNICAL CHARACTERISTICS

Luminous Flux	300 Lumens
Lumen Output	6500 °K CRI>75
Burn Time	3,5 h
Viewing Angle	6°
Illuminance	30000 Lux
Impact Resistance	1,5 m
Ingress Protection CODE	IPX-8 75m
Length	168 mm - 6.61 inch
Head diameter	47 mm - 1.85 inch
Weight	130 gr - 4.58 OZ (without batteries)

Torch with a highly asymmetric design boasts excellent ergonomics and a highly tactile perception of its geometric characteristics. Thanks to this particular design, the switch position is immediately found without needing to use your eyesight. The porthole and body are coated with thermoplastic rubber to extend shelf life and reduce noises from impact when used for fishing. These ergonomic features are a big advantage over aluminium torches with a circular section which do not give feedback on the position of the grip and, in some cases, even require the use of two hands to turn it on.

The switch has three positions: Off, On Unstable with Automatic Return, On. The "On Unstable" position is particularly useful in fishing because it allows flashing by one simple press. The strap with slider spring allows adjustment according to the user's needs, but being elastic can be pulled out in case of emergency. Power is supplied by four AA "Stylus" batteries, either alkaline or rechargeable. The electronics ensure a constant level of brightness even when the batteries are rechargeable and/or not fully charged. Batteries included.

SIGNAL LIGHT

NEW 2026

POSITION INDICATOR LIGHT

Signal Light is a smart mini light designed to ensure visibility and safety during scuba diving. It activates automatically upon contact with water, eliminating the need for manual activation, and emits a bright, constant light that is easily visible even in low-light conditions or during nighttime dives. Thanks to its long battery life, it remains active for the entire duration of the session, signalling the diver's

position to both companions and the surface. Made from pressure- and corrosion-resistant materials, Signal Light is also suitable for extreme marine environments and deep dives. Lightweight and easy to attach to equipment, it is the ideal accessory for those seeking reliability and safety underwater, whether for recreational or professional use.

NEOPRENE SUITS

/ NEOPRENE SUITS | FOR YOUR DIVING EXPERIENCES

GLACIER SPECIALIZED Retailer-Product

PREMIUM HIGH-DENSITY NEOPRENE DRYSUIT FOR SUPERIOR COLD-WATER PERFORMANCE.

The Cressi Glacier is a heavy-duty, high-performance drysuit for the coldest of waters. Providing exceptional comfort and thermal protection, it's made from 4mm high-density precompressed neoprene, which minimises buoyancy shifts at depth while maintaining flexibility. The soft Latex neck collar and wrist seals mould to the shape of your body and create a watertight barrier. They can be trimmed to size for a perfect fit and they're fully replaceable, allowing for easy repairs if damaged. Up to 40 percent of body heat is lost through the head and neck underwater, which is why the Glacier features an additional 1.5mm neoprene Thermal Protection Collar for extra insulation around the neck. The drysuit also comes with a separate 5 mm neoprene

hood for complete thermal coverage. High-wear areas, including the shoulders, upper back, hips and knees, are reinforced with X-DIAMOND material, protecting the suit from abrasion caused by BCD straps, harnesses and rocky shore entries. The side-activated inflation valve is easy to access and operate, while the adjustable shoulder air dump valve ensures controlled descents. For added comfort, the Glacier features soft neoprene socks, and internal braces that support the suit on the surface between dives. Two spacious leg pockets provide plenty of storage for accessories and backup gear. With its custom-fit options, reinforced protection and thermal performance, the Cressi Glacier is perfect for extended cold-water dives.

PRODUCT BENEFITS

- 4 mm high-density neoprene, pre-compressed from 7 mm, ensures maximum thermal insulation and stability at depth, with minimal buoyancy changes.
- Trim-to-fit Latex neck and wrist seals create a watertight, customised fit and can be easily replaced if needed.
- A 1.5 mm neoprene Thermal Protection Collar adds extra warmth around the neck area.
- X-DIAMOND reinforced material on the shoulders, chest and knees protects high-wear areas from abrasive damage.
- An oversized suit entry for easy donning, with a marine brass zip protected by an external flap to prevent damage to the BCD.
- Sitech® side-activated rotating inflation valve and adjustable shoulder air dump valve for reliable and precise buoyancy control.
- Soft neoprene socks designed to fit comfortably inside a rock boot for full protection.
- Two large multipurpose thigh pockets with a zip closure and an internal carabiner provide secure storage for accessories and backup gear.
- Available in male and female versions and includes a cosy neoprene hood, inflator hose and paraffin zip stick.

LIQUID SEAL TECHNOLOGY

A layer of polymer is spread along the seams to protect and seal them, thereby increasing the resistance to wear, the lifetime of the suit, and its insulating power.

Photo by: David Mocholi

Keeps you so dry, we called it the Desert! Designed for cold water explorers, the Cressi Desert is a high-performance drysuit that offers exceptional thermal protection and comfort. Made from 4mm high-density neoprene with a tough SPAN-FLEX outer layer, the material is pre-compressed to minimise buoyancy fluctuations at depth. To ensure total resistance to water, the stitched seams and external lining are reinforced with Cressi's Liquid Seal Technology, a protective elastomer layer that creates an impermeable barrier to water. Internally, an additional sealing strip reinforces the seams, contributing to a double-sealing system that withstands heavy use. The neck and cuff seals are made from 2.5 mm and 3.5 mm neoprene respectively. The material

is smooth on the inside to form a snug seal against the skin. The outside layer is made from super-stretchy ULTRA-SPAN, which makes it easier to get your drysuit on. The shoulders, neck and knees are reinforced with X-DIAMOND material, protecting your suit from damage caused by BCD straps and rocky shore entries. The side-activated rotating inflation valve is easy to operate, while the adjustable shoulder air dump valve ensures controlled ascents and descents. Soft neoprene socks can be used with rock boots or neoprene dive boots. Internal braces keep the suit secure, while a large multipurpose pocket on the right leg offers ample storage for accessories. The Desert ships with a separate 5mm neoprene hood for extra warmth.

PRODUCT BENEFITS

- 4 mm high-density neoprene, pre-compressed from 7 mm, ensures maximum thermal insulation and stability at depth, with minimal buoyancy changes.
- Trim-to-fit Latex neck and wrist seals create a watertight, customised fit and can be easily replaced if needed.
- A 1.5 mm neoprene Thermal Protection Collar adds extra warmth around the neck area.
- X-DIAMOND reinforced material on the shoulders, chest and knees protects high-wear areas from abrasive damage.
- An oversized suit entry for easy donning, with a marine brass zip protected by an external flap to prevent damage to the BCD.
- Sitech® side-activated rotating inflation valve and adjustable shoulder air dump valve for reliable and precise buoyancy control.
- Soft neoprene socks designed to fit comfortably inside a rock boot for full protection.
- Two large multipurpose thigh pockets with a zip closure and an internal carabiner provide secure storage for accessories and backup gear.
- Available in male and female versions and includes a cosy neoprene hood, inflator hose and paraffin zip stick.

DRYSUIT UNDERSUIT

A COSY BASE LAYER FOR MAXIMUM WARMTH UNDER A DRYSUIT.

Photo by: Danny Langborek

PRODUCT BENEFITS

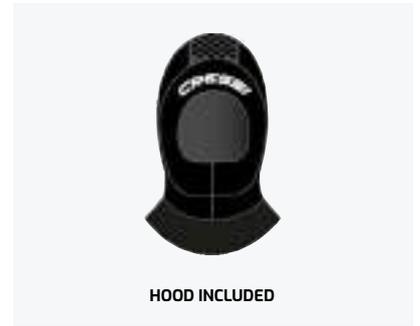

- Made from 550g/yd recycled polyester and recycled spandex, reducing environmental impact.
- The soft and cosy fleece material is breathable and lightweight, helping regulate body temperature while providing consistent insulation.
- Four-way stretch material allows unrestricted movement, while elastic stirrups and thumb loops keep the undersuit in place when donning a drysuit.
- Flatlock seams lie flat against the skin for greater comfort on long dives.
- Available in male and female versions.

The Cressi Drysuit Undersuit is made from recycled polyester and spandex. Warm, comfortable and environmentally considered, this lightweight unisex thermal layer provides essential insulation without adding unnecessary bulk under your drysuit. The moisture-wicking fleece fabric actively draws sweat away from the skin, keeping you dry and comfortable throughout your dive. A long front vertical zip makes the undersuit easy

to get into, while elastic stirrups and thumb loops keep the sleeves and legs in place while putting on a drysuit. Flatlock seams create a smooth, low-profile finish that prevents chafing on pressure points. Like all Cressi drysuits and wetsuits, the undersuit is designed using Italian pattern-cutting expertise for a tailored fit, and is ideal for eco-conscious divers looking for a warm, comfortable base layer.

A PREMIUM 7 MM ULTRA-STRETCH NEOPRENE SEMI-DRYSUIT.

Semi-drysuits are an excellent choice for divers spending extended periods of time in water temperatures between 10°C and 18°C. Designed to provide maximum thermal protection without the bulk of a drysuit, the Cressi Ice Semi-Dry is made from 7 mm ultra-stretch neoprene, delivering warmth and flexibility underwater. The semi-dry concept minimises water circulation within the suit. Double wrist and ankle seals significantly reduce water flushing through the Ice, while the horizontal waterproof MASTER SEAL rear zip is watertight and protected by a neoprene flap. The small amount of water trapped in the suit warms up, helping to maintain body temperature throughout the dive. Special X-DIAMOND reinforced panels protect high-wear areas like

the shoulders, back and knees from damage caused by BCD straps and abrasive surfaces like boat decks. A high-volume thigh pocket on the right leg has two compartments, one with a zip closure, and another with a hook-and-loop fastening for quick access. There are also two useful D-rings for attaching accessories and a handy clip for storing your hood between dives. The Ice includes a separate cosy 5 mm neoprene hood with a smooth-skin face seal for extra thermal insulation around the head and neck – two areas where divers lose the most heat during a dive. Designed using Italian pattern-cutting expertise, the Ice Semi-Dry Suit has a tailored, anatomical fit for complete comfort, insulation and performance in temperate waters.

PRODUCT BENEFITS

- 7 mm ultra-stretch neoprene balances warmth and flexibility for cold-water diving.
- Particularly easy to put on thanks to the stretchy ELASTIC-SPAN outer lining and Elastic Plush inner lining.
- The semi-dry design, with double-lined ankle and wrist sleeves, reduces flushing so you stay warmer for longer.
- A horizontal waterproof MASTER SEAL rear zip keeps water out and is covered by a neoprene flap to prevent the zip from damaging your BCD.
- X-DIAMOND reinforced knees and shoulders protect high-wear areas from abrasive damage caused by BCD straps and rough surfaces.
- A high-volume thigh pocket on the right leg has two compartments, one with a zip closure, and one with a hook-and-loop fastening.
- Two D-rings allow you to clip off accessories and a dedicated hood holder means you'll never mislay your hood during the surface interval.
- Includes a separate cosy neoprene hood with a smooth-skin face seal for improved thermal insulation around the head and neck.
- Available in male and female versions.

AN 7/8 MM WETSUIT WITH INTEGRATED HOOD

One-piece wetsuit 8/7 mm with built-in hood, incredibly easy to put on and take off. The special integrated 'HYDROBARRIER' panel with hood prevents water from entering through the vertical rear YKK zip. The perimeter seal on the facial improves water tightness considerably. The use of the special 'THERMOSPAN' material on the chest and back increases the suit's

thermal properties. The special 'HYDRO SEALING' inner seal in the wrist and ankle cuffs prevents water from entering, while the fused edge finish ensures greater durability of the neoprene. The elastic 'SUPRATEX' material on the knees, shoulders, crotch and back ensures optimal protection against wear and rubbing. Large right pocket with double D-ring.

- Hydro sealing
- Supratex reinforcements
- Air release seal in the hood
- Large pocket with 2 D-rings (40 and 15 mm)

FACILE 8 MM

AN 8 MM WETSUIT WITH INTEGRATED HOOD AND MULTI-THICKNESS PANELS FOR FLEXIBILITY.

The Cressi Facile 8 mm is a one-piece wetsuit with an integrated hood. Designed for water temperatures between 7° C and 12° C, its multi-thickness construction - 8 mm core, 6.5 mm arms and legs and 5 mm around the neck and ears - optimises warmth, movement and comfort. The diagonal positioning of the front entry MasterSeal zip makes the suit much easier to get into than a traditional vertical zip. Pre-bent arm and leg joints follow the body's natural contours, further improving wearability. A special ELASTIC-SPAN outer layer and X-PLUSH lining are stretchy and soft, providing plenty of warmth and a snug, comfortable fit. The Water Stop System features an internal ultra-stretch bib, creating a second layer of thermal protection and minimising water

flushing around the chest area. This helps to maintain your core body temperature, particularly around essential organs. Smooth double-layer wrist and ankle cuffs with zips further reduce water entry and make it easier to get the suit over your hands and feet. X-DIAMOND reinforced panels protect the shoulders, buttocks and knee areas from abrasion caused by BCD straps and rough surfaces. The 5 mm neoprene hood features an Air Free valve, which releases trapped air that has migrated from elsewhere in the suit. Designed using Italian pattern-cutting expertise, the Facile 8 mm has a gender-specific tailored fit for natural comfort. The size of the wetsuit is printed inside the wrist cuffs, ideal for rental and dive school use.

WATER STOP SYSTEM

HOOD, AIR FREE VALVE

Thickness composition

PRODUCT BENEFITS

- 8mm + 6.5mm + 5mm neoprene panels balance thermal insulation, flexibility and comfort.
- The integrated hood features an Air Free valve to retain warmth while allowing trapped air to escape.
- An Internal Water Stop System uses a 3 mm ultra-stretch bib around the chest to reduce flushing and maintain core warmth.
- Double-layer wrist and ankle cuffs with zips reduce flushing so you stay warmer for longer.
- A long diagonal front-zip ensures easy donning and removal.
- Pre-shaped arm and leg joints and 6.5 mm inserts follow natural body contours for improved range of movement.
- Constructed from double-layer neoprene, with an ELASTIC-SPAN outer and X-PLUSH lining which increases flexibility and ease of movement.
- X-DIAMOND anti-abrasion reinforcements on the shoulders and buttocks, along with elastic polymer knee pads, provide durability in high-wear areas.
- Available in male and female versions.

FACILE 5 MM

A 5 MM WETSUIT WITH INTEGRATED HOOD AND MULTI-THICKNESS PANELS FOR FLEXIBILITY.

WATER STOP SYSTEM

PRODUCT BENEFITS

- 5 mm + 3 mm neoprene panels balance thermal insulation, flexibility and comfort.
- The integrated hood features an Air Free valve to retain warmth while allowing trapped air to escape.
- An Internal Water Stop System uses a 3 mm ultra-stretch bib around the chest to reduce flushing and maintain core warmth.
- The double-layer wrist and ankle cuffs are made of a smooth hydro-sealing material to keep water out.
- A long diagonal front-zip ensures easy donning and removal.
- Pre-shaped arm and leg joints follow natural body contours for improved range of movement.
- Constructed from double-layer neoprene, with an ELASTIC-SPAN outer and soft X-PLUSH lining which increases flexibility and ease of movement.
- X-DIAMOND reinforcements on shoulders, buttocks, and knees, with elastic polymer pads on knees and elbows, ensure durability in high-wear areas.
- Available in male and female versions.

The Cressi Facile 5 mm is a one-piece wetsuit with an integrated hood. Designed for water temperatures between 16° C and 24° C, its multi-thickness construction - 5 mm core and 3 mm arms and cuffs - optimises warmth, movement and comfort. The diagonal positioning of the front entry MasterSeal zip makes the suit much easier to get into than a traditional vertical zip. Pre-bent arm and leg joints, which follow the body's natural contours, further improve wearability. A special ELASTIC-SPAN outer layer and X-PLUSH lining are stretchy and soft, providing plenty of warmth and a snug, comfortable fit. The Water Stop System features an internal ultra-stretch bib, creating a second layer of thermal protection and minimising water flushing around the chest

area. This helps to maintain your core body temperature, particularly around essential organs. Smooth double-layer wrist and ankle cuffs with zips further reduce water entry and make it easier to get the suit over your hands and feet. X-DIAMOND reinforced panels protect the shoulders, buttocks and knee areas from abrasion caused by BCD straps and rough surfaces. The 5 mm neoprene hood features an Air Free valve, which releases trapped air that has migrated from elsewhere in the suit. Designed using Italian pattern-cutting expertise, the Facile 5 mm has a gender-specific tailored fit for natural comfort. The size of the wetsuit is printed inside the wrist cuffs, ideal for rental and dive school use.

COMFORT 7 MM

A PREMIUM 7 MM ULTRA-STRETCH NEOPRENE WETSUIT.

The Cressi Comfort 7 mm is a one-piece wetsuit designed for water temperatures between 10°C and 18°C. Made from high-quality 7 mm neoprene, this cosy and exceptionally stretchy wetsuit offers superior insulation and comfort. The outer lining is 100% super-elastic ULTRA-SPAN and the X-PLUSH inner lining is soft and quick-drying, improving thermal retention before, during and after the dive. The neck collar has a 120° preformed cutaway, allowing for a more natural fit that reduces pressure on the neck when looking down to adjust equipment or check gauges. Double-sealed wrist and ankle cuffs feature smooth GlideSkin inner sleeves that sit comfortably against the skin. zips on the wrists and ankles further reduce flushing and improve ease of entry.

A high-quality YKK zip runs vertically on the back of the suit. X-DIAMOND reinforcement fabric protects high-wear areas, including the shoulders, shins and buttocks, without restricting flexibility. The knee and tibia areas have elastic Tatex® anti-wear reinforcements, offering protection from abrasive surfaces, without compromising stretch. A high-volume thigh pocket on the right leg has two compartments and an integrated D-ring for securing accessories. A dedicated hood holder keeps your hood secure between dives. With its ergonomic cut and 100% stretch neoprene, the Cressi Comfort 7mm offers a tailored, anatomical fit for all-day warmth and comfort in temperate water.

PRODUCT BENEFITS

- Premium 7mm high-stretch neoprene construction delivers excellent insulation and flexibility.
- Double cuffs with zips on the wrists and ankles minimise water entry for better thermal protection.
- A special sealing system on the collar reduces water flushing for improved comfort.
- A soft, comfortable Elastic-Plush inner lining retains warmth, while an ELASTIC-SPAN outer layer improves flexibility and ease of movement.
- Reliable and high-quality YKK vertical back zip.
- Protective knee patches provide durable protection in high-wear areas.
- A high-volume thigh pocket on the right leg includes two compartments and an integrated D-ring for accessories.
- Features a useful hood holder for secure storage between dives.
- Available in male and female versions.

COMFORT 5 MM

A PREMIUM 5 MM ULTRA-STRETCH NEOPRENE WETSUIT.

Thickness composition

Photo by: Marcello Pastonesi

The Cressi Comfort 5 mm is a one-piece wetsuit designed for water temperatures between 16°C and 24°C. Made from high-quality 5 mm neoprene, this cosy and exceptionally stretchy wetsuit offers superior insulation and comfort. The outer lining is 100% super-elastic ULTRA-SPAN, while its X-PLUSH inner lining is soft and quick-drying, improving thermal retention before, during and after the dive. X-DIAMOND reinforcement fabric protects high-wear areas, including the shoulders, shins and buttocks. The knee and tibia areas have elastic Tatex® anti-wear reinforcements, offering protection from abrasive surfaces, without compromising stretch. The anatomically considered collar

design has a 120° preformed cutaway, allowing for a more natural fit that reduces pressure on the neck when looking down to adjust equipment or check gauges. A high-quality YKK zip runs vertically on the back of the suit and a large thigh pocket on the right leg has two compartments and an integrated D-ring for securing accessories. A dedicated hood holder keeps your hood safe between dives (hood sold separately). With its ergonomic cut and 100% stretch neoprene, the Cressi Comfort 5mm offers a tailored, anatomical fit for all-day warmth and comfort in temperate to warm water.

PRODUCT BENEFITS

- Premium 5 mm high-stretch neoprene construction delivers excellent insulation and flexibility.
- A soft, comfortable Elastic-Plush inner lining retains warmth, while an ELASTIC-SPAN outer layer improves flexibility and ease of movement.
- Reliable and high-quality YKK vertical back zip.
- Heavy-duty protective knee pads provide protection in high-wear areas.
- Features a useful hood holder for secure storage between dives.
- Available in male and female versions.

FAST 7 MM SPECIALIZED Retailer-Product

A 7 MM ULTRA-SOFT NEOPRENE WETSUIT.

The Cressi Fast 7mm is a stylish one-piece wetsuit for water temperatures between 10°C and 18°C. Made from 7mm double-lined neoprene, it stands up well to compression at depth, ensuring maximum heat retention throughout the dive. Super-stretchy ULTRA-SPAN neoprene panels on the arms allow for freedom of movement above and below the water. The combination of ULTRA-SPAN neoprene and pre-shaped panels on the legs improves flexibility around the calves, allowing the muscles to move freely without restriction for a more efficient kick cycle. The Fast 7mm has an ergonomically shaped neck with a 120° forward-angled design that follows the natural positioning of the neck for a comfortable fit. A

wide and high hook-and-loop closure secures the collar tightly to prevent flushing as you move your head. The Cressi water-stop system wrist and ankle cuffs feature an inner 'ring' seal that keeps water out and warmth in. The high-quality YKK back zip features a wide GlideSkin panel underneath, creating an extra seal that minimises water entry and improves thermal protection around the back. The knees are reinforced with an anti-abrasion coating, protecting against contact with rough surfaces, without compromising neoprene flexibility over the knee area. With its tailored Italian design and performance-focused construction, the Cressi Fast 7mm is ideal for divers wanting a practical wetsuit for cooler water temperatures.

Photo by: Balls Pyramid

PRODUCT BENEFITS

- 7 mm double-lined neoprene construction provides excellent insulation and compression resistance at depth.
- Water-stop system with inner ring seals reduces water entry at the wrists and ankles for superior thermal protection.
- Reliable and high-quality YKK vertical back zip with a water-stop panel underneath adds an extra barrier to minimise flushing along the spine area.
- Ultra-soft neoprene on the arms and around the calves improves flexibility and comfort as you move.
- Pre-shaped legs follow the body's natural posture for efficient kicking.
- Anti-abrasion reinforcement on the knees protect high-wear areas without restricting flexibility.
- Available in male and female versions.

FAST 5MM

A 5 MM ULTRA-SOFT NEOPRENE WETSUIT.

ANTI-ABRASION REINFORCEMENT

The Cressi Fast 5mm is a stylish one-piece wetsuit for water temperatures between 16°C and 24°C. Made from ultra-soft 5mm double-lined neoprene, it stands up well to compression at depth, ensuring maximum heat retention throughout the dive. Super-stretchy ULTRA-SPAN neoprene panels on the arms allow for freedom of movement above and below the water. The combination of ULTRA-SPAN neoprene and pre-shaped panels on the legs improves flexibility around the calves, allowing the muscles to move freely for a more efficient kick cycle. The Fast 5mm has an ergonomically shaped neck with a 120° forward-angled design that follows the natural positioning of the neck for a comfortable fit. A wide and high hook-and-loop closure secures

the collar tightly to prevent flushing as you move your head. Cressi's water-stop system wrist and ankle cuffs feature an inner 'ring' seal that creates a second barrier, keeping water out and warmth in. The high-quality YKK back zip features a wide GlideSkin panel underneath, creating an extra seal that minimises water entry and improves thermal protection around the back. The knees are reinforced with an anti-abrasion coating, protecting against repeated movement and contact with rough surfaces, without compromising neoprene flexibility over the knee area. With its tailored Italian design and performance-focused construction, the Cressi Fast 5mm is ideal for divers wanting a warm and practical wetsuit for temperate to warmer water temperatures.

FAST 3 MM SPECIALIZED Retailer-Product

A 3 MM ULTRA-SOFT NEOPRENE WETSUIT.

Photo by: Marcello Pastonesi

The Cressi Fast 3mm is a stylish one-piece wetsuit for use in water temperatures above 22°C. Made from ultra-soft 3mm double-lined neoprene, it's durable and provides plenty of thermal insulation. Super-stretchy ULTRA-SPAN neoprene panels on the arms allow for freedom of movement above and below the water. A combination of ULTRA-SPAN neoprene and pre-shaped panels on the legs improves flexibility around the calves, allowing the muscles to move freely without restriction. The Fast 3mm has an ergonomically shaped neck with a 120° forward-angled design that follows the natural positioning of the neck for a comfortable fit. A wide and high hook-and-loop closure secures the collar tightly

to prevent flushing as you move your head. The high-quality YKK back zip features a wide GlideSkin panel underneath, creating an extra seal that minimises water entry and improves thermal protection around the back. The knees are reinforced with an anti-abrasion coating, protecting against repeated movement and contact with rough surfaces, without compromising neoprene flexibility over the knee area. With its tailored Italian design and performance-focused construction, the Cressi Fast 3mm is ideal for warm water adventurers wanting a comfortable and practical wetsuit.

PRODUCT BENEFITS

- 3 mm double-lined neoprene construction provides excellent insulation.
- A reliable and high-quality YKK vertical back zip with a water-stop panel underneath adds an extra barrier to minimise flushing along the spine area.
- Pre-shaped legs follow the body's natural posture for efficient kicking.
- Anti-abrasion reinforcement on the knees protect high-wear areas, without restricting flexibility.
- Available in male and female versions.

FAST 1 MM NEW 2026

A 1 MM ULTRA-SOFT NEOPRENE WETSUIT.

The Fast wetsuit combines elegance, warmth and versatility. Made of 1 mm double-lined Neoprene®, it effectively resists compression at depth, ensuring maximum heat retention. Highly flexible, it is perfect for scuba diving, snorkelling, surfing, windsurfing and other water activities. The trousers' anatomically pre-shaped cuts improve flexibility, facilitating finning. The YKK® back zip features the Acquastop® sealing system, with smooth neoprene and an inner sub-zip to minimise water infiltration. The design of the neck

closure has been significantly improved to reduce water ingress, with a wider and longer flap to prevent seepage when the neck is tilted underwater. The neck is anatomically designed and preformed to 120° for maximum comfort. The knee area and shoulder straps are reinforced with wear-resistant Tatex® elastic, providing adequate reinforcement without limiting the elasticity of the neoprene and facilitating wetsuit positioning. The nylon lining both inside and outside is particularly elastic, optimising the flexibility of the neoprene.

PRODUCT BENEFITS

- One-piece wetsuit made of 1 mm double-lined neoprene.
- Ultraspan neoprene on the arms and calves for extra flexibility.
- Pre-shaped legs for improved movement.
- YKK back zipper with under-zip lining for added comfort.
- Anti-abrasion knee reinforcement for durability.

FISTERRA SPECIALIZED Retailer-Product

AN ULTRA-DURABLE TWO-PIECE 8 MM & 5MM NEOPRENE WETSUIT WITH AN INTEGRATED HOOD.

Originally developed to meet the needs of professional divers in cold water, the Cressi Fisterra is a robust two-piece wetsuit with superior insulation for extended dives. Available in 8 mm (water temperatures between 7°C and 12°C) and 5 mm (water temperatures between 16°C and 24°C) versions, the suit consists of a one-piece jacket with an integrated hood and button fastening at the crotch, paired with full-torso dungaree-style trousers. This layered combination is highly watertight, delivering exceptional thermal insulation around the core of the body, thanks to eliminating zippered openings. Made from low-compression neoprene, the Fisterra maintains its thickness at depth, ensuring consistent insulation

throughout the dive. The stretchy X-PLUSH inner lining is soft and warm, and it glides comfortably over the skin, making the wetsuit easy to put on and remove. A heavy-duty nylon exterior, combined with Supratex® knee and shin pads and elbow reinforcements, protect high-wear areas from abrasive damage, ensuring long-term performance. Popular in commercial fishing settings, the Fisterra's heavy-duty yet flexible construction allows a full range of body movement, making it ideal for bending, crouching and reaching. With its Italian-tailored fit and incredible thermal performance, the Cressi Fisterra is the ultimate wetsuit for demanding environments.

Photo by: Marcello Pastonesi

PRODUCT BENEFITS

- Low-compression 8 mm & 5mm neoprene resists compression at depth, ensuring consistent thermal protection for professional or long-duration diving.
- A very watertight and highly thermal wetsuit that combines a one-piece jacket and high trousers with dungarees.
- An integrated 8 mm & 5mm hood on the jacket provides thermal insulation for the head and neck, preventing heat loss.
- A heavy-duty nylon outer lining is durable and provides abrasion resistance in tough environments.
- The Elastic X-PLUSH terry loop inner lining is warm, soft and glides against the skin for supreme comfort and ease of wearing.
- Supratex® knee and shin reinforcements protect high-wear areas from abrasion.
- Unisex design.

MEDAS

A CLASSIC TWO-PIECE 5 MM + 5 MM NEOPRENE WETSUIT WITH AN INTEGRATED HOOD.

The Cressi Medas 5mm is a two-piece wetsuit for water temperatures between 16°C and 24°C. A classic 5 mm + 5 mm combination, the suit consists of a ziped jacket with an integrated hood, paired with full-torso dungaree-style trousers featuring a front-zip. This combination of layers is very watertight and offers outstanding thermal insulation around the core of the body. Designed with Italian pattern-making expertise, the anatomically shaped panels and pre-formed arms and legs mirror the body's natural posture, providing exceptional comfort and a true-to-size fit. A seam-free underarm prevents chafing during movement. The male version is available in

black and blue and has a diagonally ziped jacket that is secured in place with a buttoned crotch closure. The female version features a black and turquoise colourway and has a swimsuit-style jacket with a diagonal zip closure. Smooth GlideSkin neoprene micro-cuff seals at the wrists and ankles minimise water entry and the edges of the hood around the face and neck feature smooth neoprene inserts to reduce leaks. Powertex® knee and shin reinforcements provide abrasion resistance without restricting movement. With its anatomical cut, attention to detail and excellent thermal properties, the Cressi Medas 5mm is one of the most widely used wetsuits globally.

PRODUCT BENEFITS

- 5 mm neoprene provides thermal protection in temperate water conditions.
- A very watertight wetsuit that combines a 5 mm ziped hooded jacket and 5 mm full-torso dungaree trousers with a front-zip.
- Smooth GlideSkin neoprene micro-cuff seals at the wrists and ankles mould to the body and minimise water entry.
- Smooth neoprene inserts around the face and neck areas further minimise leaks.
- "A RIRI® 8 pitch diagonal front zip with metal pull is durable and easy to use for quick donning and removal."
- Anatomically pre-shaped arms and legs provide maximum comfort during use.
- Powertex® knee/shin pads protect high-wear areas without restricting flexibility.
- With anatomically shaped panels, the jacket on the male version uses a clip closure, while the female version has a swimsuit-style design.
- Available in male and female versions.

DIVER ALSO FOR RENTAL

A TRADITIONAL DURABLE NEOPRENE WETSUIT WITH AN INTEGRATED HOOD.

Photo by: Marcello Pastonesi

PRODUCT BENEFITS

- Double-lined neoprene offers excellent thermal protection in cooler water temperatures.
- Double seal cuffs at the wrists and ankles reduce water entry for better thermal protection.
- A smooth neoprene seal runs along the face edge of the hood, limiting leaks and increasing comfort.
- The front zip and ankle zips make the wetsuit very easy to put on and take off, ideal for anyone completing multiple dives a day.
- Pre-shaped legs follow the body's natural posture for efficient kicking.
- Anti-wear knee pads provide durable protection in high-contact areas.
- Available in male and female versions.

The Cressi Diver is a one-piece neoprene wetsuit with an integrated hood for the whole family, featuring male, female and junior-specific fits. Available in two thicknesses, the 7mm version is suitable for water temperatures between 10°C and 18°C, while the 5mm version is suited to 16°C to 24°C. This makes it ideal for summer diving in the Mediterranean or winter diving in the tropics. The Diver offers fantastic freedom of movement and comfort while finning, thanks to pre-shaped legs that follow the body's natural posture. The long front zip extends from the waist to the right

cheek, making the wetsuit quick and easy to put on and take off. A smooth neoprene seal around the edge of the hood sits snugly against the face, reducing leaks and improving thermal performance. Reinforced anti-wear knee pads provide added durability, while double-lined wrist and ankle cuffs create a watertight seal. The ankles also feature zips, making the suit even easier to put on and remove. Ideal for temperate to warm waters, the Cressi Diver is a top choice for dive centers and instructors needing a warm, quick-drying suit for multiple dives per day.

ENDURANCE

A DURABLE FRONT-ZIP NEOPRENE WETSUIT FOR THE WHOLE FAMILY.

The Cressi Endurance is a front zip wetsuit designed for warm water adventures. Available in two thicknesses, 3 mm for adults and 5 mm for juniors, it is suited to water temperatures above 22°C, making it perfect for snorkelling and paddling. Constructed from durable double-lined neoprene, the Endurance has reinforced X-DIAMOND ultra-resistant neoprene panels in high-wear areas such as the shoulders, waist, back and knees. This provides superior

protection against abrasion from BCD straps and weight belts, without impacting flexibility. A heavy-duty YKK front-zip makes the Endurance easy to put on and remove, while ankle zips further simplify entry and exit. Designed using Italian pattern-making expertise, the Cressi Endurance is an ideal wetsuit for warm-water use. Its long-lasting durability makes it a great choice for dive centres and rentals.

PRODUCT BENEFITS

- Provides warmth and exposure protection for warm water activities with 3 mm (adult) and 5 mm (junior) double-lined neoprene.
- A heavy-duty, high-quality YKK front zip allows for easy donning and removal.
- Zips on the ankle cuffs make it easier to get in and out of the wetsuit.
- Ultra-resistant X-DIAMOND reinforced material on the shoulders, waist, buttock and knees provides ultimate protection for high-wear areas.
- Designed to withstand intensive use, ideal for dive schools and rentals.
- Available in male and female versions.

The Cressi Morea 3 mm is a very comfortable wetsuit for warm-water activities. Made from premium 3mm ultra-stretch neoprene, it's an excellent choice for snorkelling, swimming, and watersports in temperatures above 22°C. The lower arms and leg areas are constructed using ULTRA-SPAN neoprene for maximum stretch where it's needed most. A rubberised neoprene chest panel creates less drag in the

water, making it easier to move efficiently while snorkelling. Reinforced knee patches help prevent wear and tear in high-contact areas. A high-quality rear zip with a hook-and-loop neck closure provides a secure fit, while a second tab lower down keeps the zip pull neatly in place during use. With male, female and junior sizing, the Cressi Morea is ideal for families enjoying the water together.

PRODUCT BENEFITS

- 3 mm neoprene provides light insulation and all-day comfort.
- Incredibly stretchy ULTRA-SPAN premium neoprene panels on the arms and legs create a second-skin fit for maximum flexibility.
- A rubberised neoprene chest panel reduces drag and improves hydrodynamics while snorkelling.
- Anti-wear knee pads enhance durability in high-contact areas.
- A high-quality back zip is smooth and reliable.
- Suitable for snorkelling, swimming and other warm-water activities.
- Available in male, female and junior fits.

VELVET NEW 2026

DIAGONAL FRONT-ZIP 3 MM NEOPRENE WETSUIT.

One-piece wetsuit 3 mm in double-lined ultra-stretch nylon with front/diagonal zip for easy wearing. Special internal 'HYDRO SEALING' seal

in the wrist and ankle cuffs prevents water from entering.

Thickness composition

PRODUCT BENEFITS

- 3 mm neoprene thickness
- Flat lock seams (FLS)
- Hydro sealing

A FRONT-ZIP 2.5 MM NEOPRENE WETSUIT.

PRODUCT BENEFITS

- Durable 2.5 mm double-lined neoprene provides warmth and UV protection during warm water activities.
- Aquastop seals at the wrists, ankles, and under the zip reduce flushing for improved thermal performance and comfort.
- Front-zip entry with a reliable high-quality YKK zip.
- Pre-shaped legs support a natural body posture for improved efficiency when finning.
- Anti-wear knee pads enhance durability in high-contact areas.
- Suitable for snorkelling, swimming, windsurfing and other warm-water activities.
- Available in male and female fits.

The Cressi Lui/Lei is a 2.5 mm warm water wetsuit offering insulation and UV protection for any water-based sport. Its double-lined neoprene makes it much more durable than competitor wetsuits in this price category. Available in separate anatomical cuts for men (Lui) and women (Lei), the wetsuit features pre-shaped legs that follow the natural lines of the body for maximum freedom of movement and efficient kicking while snorkelling. The front zip entry makes the wetsuit easy to put on and remove, adding convenience for

active water sports enthusiasts who are in and out of the suit multiple times a day. The high-quality YKK zip is reinforced with an Aquastop under-zip lining, which minimises water entry and adds an extra layer of thermal protection. Aquastop seals at the wrists and ankles help avoid flushing, keeping warmth in. With its tailored fit and front-zip convenience, the Cressi Lui/Lei is an ideal wetsuit for windsurfing, kitesurfing, snorkelling, diving and surfing in water temperatures above 22°C.

SKIN

A FRONT-ZIP 1 MM SKIN SUIT WITH UV 50+ PROTECTION.

Photo by: N/A

PRODUCT BENEFITS

- 1 mm polyester and spandex material provides light insulation for warm-water activities.
- Full-body coverage and UV 50+ protection safeguard against sun and wind exposure.
- Ultra-stretch fabric conforms to the body for a second-skin fit that reduces drag in the water.
- Heel straps keep the suit securely in place during use.
- A long front-zip makes it quick and easy to get in and out of the suit.
- Lightweight and versatile design is ideal for travel and layering under a neoprene wetsuit.
- Suitable for snorkelling, swimming, windsurfing and other warm-water activities.
- Available in male and female fits.

The Cressi Skin is made from an ultra-stretch polyester and spandex material that naturally conforms to the body. This close-fitting design reduces drag in the water, whether you're swimming, snorkelling or diving in tropical oceans. Providing UV 50+ sun protection, the Skin safeguards against sun exposure on the surface, while the 1mm material offers just enough warmth to keep you comfortable during longer snorkelling trips.

A long front zip makes the Skin easy to put on, while heel straps keep the suit securely in place throughout your dive or swim. With its second-skin fit, the Skin can also be layered under a neoprene wetsuit for extra thermal insulation in cooler water. Lightweight and versatile, the Cressi Skin is an essential travel companion for warm water adventurers.

SHELL JACKET

A 5 MM HOODED ULTRA-STRETCH NEOPRENE OVERSUIT.

The Cressi Shell Jacket is a short-sleeved hooded oversuit, designed to be worn over a wetsuit for extra insulation in cooler waters. Made from ultra-stretch neoprene in varying thicknesses, it offers additional thermal insulation while maintaining flexibility. 5 mm neoprene panels on the back and chest provide warmth around the core, while the 3.5mm neoprene in the underarms and inseam areas ensure freedom of movement. The smooth neoprene seal around the edge of the hood sits comfortably

against the face and helps limit water ingress. The long front zip extends from the waist to the right cheek, making the Shell Jacket quick and easy to put on and remove. For added durability, high-wear areas like the shoulders and neck are reinforced with X-DIAMOND anti-abrasion material, protecting the oversuit from damage caused by BCD straps. With its flexible fit and Italian tailoring, the Cressi Shell Jacket is an ideal layering piece for divers wanting to extend their time in the water.

HOOD VEST

A 2.5 MM HOODED NEOPRENE VEST.

Photo by: PADI

The Cressi Hood Vest is a sleeveless neoprene base layer with an integrated hood. It can be layered under a wetsuit for extra insulation in cooler waters, or worn alone in warm conditions. Made from ultra-stretchy neoprene, 2.5mm panels on the back and chest provide warmth around the core, while the 5mm hood keeps the neck and head insulated. A smooth neoprene seal around

the edge of the hood sits comfortably against the face and helps limit water ingress. The flatlock-stitched seams lie smoothly against the skin, preventing chafing for all-day comfort during extended dives. Tailored using Italian pattern-cutting expertise, the Cressi Hood Vest is an ideal layering piece for divers wanting to extend their time in the water.

SHORT VEST

A 2.5 MM NEOPRENE BASE LAYER VEST WITH SHORTS.

REPRICED 2026

The Cressi Shorts Vest is a sleeveless neoprene base layer with integrated shorts, designed to be worn under a wetsuit for extra insulation in cooler waters. Made from 2.5mm ultra-stretch neoprene, it provides warmth around the body's core while maintaining flexibility and comfort. The left shoulder features a dungarees-style hook-

and-loop closure system, making it very easy to get in and out of the suit. Flatlock-stitched seams lie smoothly against the skin, preventing chafing during dives. With its ergonomic fit, the Cressi Shorts Vest is an ideal layering piece for divers wanting extra insulation without restricting movement.

MALMO ROCK BOOTS

REPRICED 2026

HARD SOLE NEOPRENE BOOTS 3 mm

The 3 mm neoprene Malmo boots offer reliable protection, outstanding performance and maximum comfort. A hard sole provides excellent grip on slippery surfaces and protection from stones and underwater obstacles. Aesthetically similar to trainers, they are the perfect combination of style

and functionality. Wear-sensitive areas are reinforced with hard-wearing PU, ensuring durability. The practical lace-up allows for a quick and secure closure, while their unbeatable comfort allows you to concentrate only on your activities.

KORSOR

REINFORCED SOLE NEOPRENE BOOTS 5 mm

Boots designed to be used with open heel fins, are made of soft nylon-lined neoprene 5 mm, ideal for cooler waters. Reinforced pu protection for instep and heel provides resistance against wear and tear. The notch for holding fin strap is integrated into the heel. A practical ykk zipper opens at the ankle for easy donning. Water

seepage is reduced to the minimum thanks to a protective thin flap hydro seal under zip. The Cressi personalized ankle strap has a Strap in the inner part. A rigid, non-slip and hi-grip moulding covers the entire sole.

STRAP ANKLE STRIP

ISLA

NEOPRENE BOOTS 3 mm, 5 mm, 7 mm

These boots are suitable for any kind of water sports to keep the feet warm. The back of the heel has a special design that fits perfectly with open heel fins for scuba diving. The small boss is used to prevent the slipping of the fins strap. Both the toe and the heel are reinforced with long-lasting rubber and provide protection against wear and tear. They are made from soft, double-lined neoprene and

have a practical zip from the sole to the ankle, making them easy to slip on and off. Water seepage is reduced to the minimum thanks to a thin flap seal under the zip, which acts as an effective barrier against any water that may seep through the zip. A strong non-slip molding covers the entire sole.

RESILIENT PRO WITH GRIP

NEOPRENE SOCKS WITH GRIP AND REINFORCEMENT 3 mm

SAND STOP

ANTI-SLIP GRIP SOLE

REINFORCED POINTE

The Resilient PRO Neoprene Socks are made from soft, 2mm double-lined neoprene. Designed with a unique cut to eliminate irritating seams on the sole and top of the foot, they provide superior comfort during aquatic and land activities. The glideskin neoprene

around the ankle prevents slipping, enhancing fit and comfort. The toe and sole areas are reinforced with durable nylon, increasing the sock's lifespan. The sole features a rubberized grip, ensuring excellent traction at all times.

TROPICAL

LIGHT GLOVES 2 mm

Five fingered gloves 2 mm thick neoprene, made from two different soft and light materials. The palm and finger area uses a light grey napa that becomes extraordinarily soft upon contact with the water. However, the upper part of the glove and the wrist area are made from very thin, supple neoprene. A large

area that corresponds to the upper side of the wrist allows for instant adjustment, both before and during the dive. These are particularly suitable gloves when you need the very best touch sensitivity in the fingers. The palm also offers good resistance to abrasions.

CAR SEAT COVER

CAR SEAT - WATER PROTECTION

20x28x9 cm - 7.8x11x3.5 in

The Cressi hydro-repellent seat cover is the perfect solution to protect your car seats after engaging in water sports activities. Designed with functionality in mind, this seat cover ensures that your seats stay dry and protected. The universal fit design ensures compatibility with most car seats. The seat cover is equipped

with adjustable straps on the sides, allowing you to securely fasten it and ensure a tight and snug fit. It features multiple pockets that offer convenient storage for various items. Keep your car seats dry, protected, and organized with this versatile and practical solution.

SEA SOUL

SALTWATER AND FRESHWATER FRIENDLY SHAMPOO+SHOWER GEL

Cressi Sea Soul is a natural and eco-friendly shampoo & shower gel that not only nourishes your hair and skin but also helps protect our precious seas. Formulated with care, this product is perfect for use on boats. Carefully crafted using natural ingredients to ensure a gentle and refreshing cleansing experience. It contains the goodness of Irish moss and aloe vera, known for their moisturizing and soothing

properties. These ingredients help hydrate and revitalize your hair and skin, leaving them feeling soft, healthy, and rejuvenated. What sets Sea Soul apart is its commitment to environmental sustainability. This formula is created to minimize its impact on aquatic ecosystems, making it an excellent choice for those who care about protecting our seas. Available in two formats: 250ml, 500ml

FINS

/ FINS | TO DIVE FURTHER, TO DIVE FASTER, TO DIVE BETTER

ORIGIN HD

HIGH DENSITY FIN

In 1950, long before technical diving was a concept, Cressi revolutionized the scuba diving world with the introduction of the vented RONDINE COMMANDO fins. These fins were originally designed for the U.S. Military Underwater Demolition Team (UDT) and saw extensive use in the 1960s. Today, the ORIGIN fins carry forward this historic legacy with a modern technical upgrade. The heavy-duty

requirements of technical diving align perfectly with these durable, abrasion-resistant fins made from a single material. Staying true to the original designs and patents, they offer either a positive or negative rubber versions. The ORIGIN HD is a high density material which is slightly negative, perfect for the use with drysuits and mid- to heavy gear.

LOW DENSITY FIN

In 1950, long before technical diving was a concept, Cressi revolutionised the world of scuba diving with the introduction of the RONDINE COMMANDO ventilated fins. These fins were originally designed for the US Army Underwater Demolition Team (UDT) and were widely used in the 1960s. Today, ORIGIN fins continue this historical legacy with modern technical improvements. The high demands of

technical diving are perfectly matched by these durable, abrasion-resistant fins made from a single material. Remaining authentic to the original designs and patents, they offer both positive and negative rubber versions. ORIGIN LD is a low-density material that is slightly buoyant, perfect for wet suits and medium to lightweight equipment.

THECNICAL FEATURES

- Ultra-compact and robust for the toughest environments
- Ergonomic foot pocket with spring-loaded straps for ease of use with cold hands or thick gloves.
- The ventilated fins are short and wide, giving a very strong forward thrust.
- Ideal for webbing, frog kicks, helicopter turns and general manoeuvrability.
- Two attachment points for access to the dive site or vertical storage
- Self-adjusting spring straps as standard
- The angled buckle holds the spring straps in the optimum position on the heel piece.
- Simple pin design makes it easy to replace straps if necessary.

THOR EBS

ELASTIC BUNGEE SYSTEM SCUBA FINS

FINS WEARABILITY:

Brand new design for this extremely effective and yet very easy to use fin. The special arched profile of the fins combined with the two central ribs promote a significant flow convection effect, known as "spoon effect", which stabilises and boosts propulsion. Two lateral holes discharge the negative forces

typically associated with this area and at the same time make for enhanced stability. The blades are moulded from two different materials for improved reactivity. These fins are perfect for scuba diving, whether you are an experienced diver or a novice.

ARA EBS

ELASTIC BUNGEE SYSTEM SCUBA FINS

The main feature of this fin is its polypropylene blade that provides an excellent response. And weight is no longer a problem. These fins provide more thrust power to a diver's kicking, which results into an excellent effort/performance ratio. Special grooving for water channelling moulded on the surface provides outstanding stability and direction. The thermorubber foot pocket (with varying levels of hardness) is very comfortable to

wear and a proper fit is ensured by ergonomic design. The heel strap, an exclusive Cressi design, is a special round bungee cord band that perfectly adjusts to all foot sizes and shapes and provides a comfortable, practical and manageable fastening. It features a special ample slot for easy don and doff even when wearing thick gloves for cold-water diving.

NEW PACKAGING AVAILABLE FROM JANUARY 2026

TECHNICAL FEATURES

Cressi has developed this special strap to meet the needs of the most demanding divers, who need a comfortable fastening for their foot but one that is still practical and manageable. Its special amply sized slot makes it very easy to put on, even when wearing thick gloves or three-fingered gloves for winter water.

The wrapping section is highly flexible, making adjustments unnecessary, and as a result it's much easier to get all your equipment right in the first few meters of your descent and the fin stays in place against your foot despite the increase in hydrostatic pressure.

REACTION EBS

ELASTIC BUNGEE SYSTEM SCUBA FINS

FINS WEARABILITY: NEOPRENE BOOTS

Cressi's most technically advanced fin, the Reaction uses a completely new polypropylene blade material that is more reactive, flexible and trim than previous designs. It kicks easily yet powerfully and is suitable for divers of every experience level. The longer blade efficiently transfers energy from the computer-designed foot pocket, and

like other Cressi fins, the blade extends from the top of the foot pocket to maximize its effective surface area for more thrust. Other innovations include new locking strap buckles and anti-slip material for better traction out of the water.

FROG PLUS

SCUBA FINS

FINS WEARABILITY:

The Frog Plus utilizes Cressi's patented three material injection molding process. The three materials consist of a nice comfortable rubber on the foot pocket that extends up the side rails of the blade. The second material is the revolutionary new dual density techno polymer which forms the blade, and in conjunction with the third silicone based material creates a

channeling effect. Cressi's latest addition to its extensive line of world renowned fins is the Frog Plus open heel scuba diving fin. The Frog Plus features many of the great characteristics of a traditional paddle fin along with introducing a revolutionary new blade material that is both extremely durable and nearly indestructible.

- Below blade foot pocket.
- Blade profile with decreasing thickness
- Reinforced liner in the upper area
- 360° rotating buckles
- Oversized heel strap
- EBS buckle system

PRO LIGHT

SCUBA FINS

MADE IN ITALY

FINS WEARABILITY:

A highly advanced design for this fin that is moulded from two materials with very different characteristics: a strong polypropylene for the blade and soft elastomers (thermo rubber) for the foot and protective inserts. The result is an extremely light and well-balanced fin, of average size, with surprising reaction time and a formidable thrust. The side stringers that extend all along the blade and two flaps situated along the end of the blade itself make the fin very directional. The blade originates from the upper part of the foot pocket, with a 20% increase in useful

surface area compared to a traditional fin of the same length. The foot pocket is computer designed and guarantees ideal transmission of the leg-fin thrust. The lightness and perfect balance of the materials, together with the extremely modern design, make Rondine Pro Light a generous fin that provides exuberant performance without too much physical effort. These fins are perfect both for beginners and for professionals and are very common amongst instructors and technical divers.

FREE FROG

FULL FOOT FIN

MADE IN ITALY

FINS WEARABILITY:

BARE FOOT	NEOPRENE SOCKS

The Free Frog is back! The fin has been remade with the new molding technology. The foot pocket has been improved to fit better to most different foot shapes. The Free Frog enjoys the exclusive characteristics of the Cressi diving fins maintaining the spirit of the legendary Frog. It features a below blade foot pocket in order to have a bigger surface that increasing the kicking thrust.

It is manufactured in a variant of low-modulus polypropylene that, combined with a particular structure, combines great flexibility, softness, and resistance to a demanding use (even as in rent and school in a diving center), durability and an unprecedented aesthetics in fins projected with this philosophy.

REACTION PRO

FULL FOOT FINS

FINS WEARABILITY:

REACTION PRO is a great all around fin for scuba, snorkeling and freediving. The REACTION PRO is a full foot pocket style fin, with a longer blade and built in runners to effectively direct water flow down the blade. REACTION PRO is constructed using multiple materials bonded together with a patented three material molding process to provide comfort and

suppleness in the foot area and strength and rigidity in the heel and blade area, where the foot pocket is beneath the blade for added power and efficiency. The soles are completely covered in thermo-rubber to give them exceptional grip on boat decks. Can comfortably be worn with or without neoprene socks.

GARA TURBO CARBON XLD

SUPERIOR PERFORMANCE CAMOUFLAGE FINS - HIGH FLEXIBILITY BLADE

FINS WEARABILITY:

The blades are made with an ultra performing carbon fibre of incredible strength and flexibility. The fabrication of this carbon fiber is done with an high vacuum 100% industrial procedure, to obtain an exceptional compactness of the carbon fibre. Average carbon fibre used for fin blades in the industry has 3.000 fibers per thread. Our Carbon has 12.000 fibers per thread. Four times as much. Four times the resistance. Four times the flexibility and elasticity, kick

response compared to other carbon blades on the market. Each thread in this carbon fiber is very very small. So small that the TOTAL DENSITY of the blade is an incredible, and unmatched, 20.000 fibers per square millimeter.

Dedicated to those divers who prefer a very soft and smooth fin. It is indicated if your fishing sessions include long sessions and if you cover long distances.

NEW PACKAGING AVAILABLE FROM JANUARY 2026

TECHNICAL FEATURES

- 29 degree angled interchangeable carbon blade
- Modular detachable fin
- Superior performance
- Superior comfort
- Self adjusting foot pocket

INCLUDED GARA MODULAR INSOLE

The new insole for Gara Modular fins is recommended for use with thin boots in temperate waters, because it improves the kick performance. The semi-rigid material of the insole is completely recycled. The insoles are supplied as a pair (right and left foot) and can be cut into their shape in three different sizes, according to pre-printed guidelines.

- Down-size Gara Fins foot pocket preformed sole
- Easily adjust size
- Non- corrosive plastic construction

NEW PACKAGING AVAILABLE FROM JANUARY 2026

Following the Impulse project we have successfully transferred the same design parameters for S-shaped undulating deformation to this innovative fin. This particular movement permits a notable accumulation of elastic potential energy in the blade, which is released in the return kick.

transforming into thrust. The thermoplastic rubber used for the water channelling rails is extremely flexible and soft so as not to undermine the intrinsic characteristics of the blade.

GARA MODULAR SPRINT

SUPERIOR MANEUVERABILITY

SPECIALIZED
Retailer-Product

FINS WEARABILITY:

BARE FOOT

NEOPRENE SOCKS

WATER RAILS SYSTEM

The new Gara Modular Sprint fin is a shorter version of the Impulse fin, which proved to be hugely popular with freedivers worldwide, both amateurs and the most demanding professional freedivers. This is also confirmed by the large number of articles dedicated to it by specialized journalists in sector magazines. Sprint is designed to meet the needs of freedivers and spearfishers who practice this sport in wintertime and when a fin as long as Impulse is not necessary. Both fins have been designed using expensive finite element software programs that allow highly complex and equally high-performance sections to be defined.

The blade of Sprint, like the Impulse blade, is made of a single thermoplastic elastomer,

although it would be more correct to refer to an angled sublayer and an overlay. The sublayer follows the shape and dimensions of almost the entire fin. It has a uniform thickness and a flexible longitudinal propulsion wing of variable length. In contrast, the so-called overlay covers the propulsion wing selectively and has a thickness that slopes from the maximum value to zero longitudinally towards the tip of the blade. As a result, the fin offers a new way of storing and releasing elastic potential energy, greatly assisting movement of the freediver's legs and thus guaranteeing a net improvement in propulsive output. When disassembled, the blade and foot pocket occupy the space of a normal snorkeling fin.

GARA TURBO FLEX

AGILITY AND HIGH PERFORMANCE COMPACT FINS

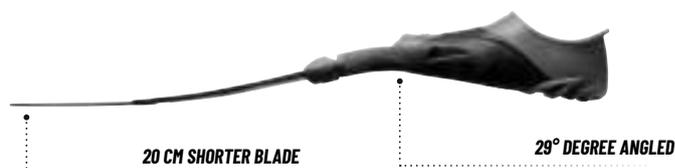

FINS
WEARABILITY:

BARE
FOOT

NEOPRENE
SOCKS

20 CM SHORTER BLADE

29° DEGREE ANGLED

The Gara Turbo Flex fin is a lightweight, high-performance evolution of the Turbo Sprint, designed for freedivers and spearfishers. The thin, lightweight blade, made from elastomeric technopolymers developed by Cressi, ensures excellent propulsion with reduced effort, also thanks to the combination with semi-rigid spars that release energy while the fin is in use. The thermoplastic rubber boot, patented and

certified by Cressi as 'Full Contact', guarantees a very precise and flexible fit, thanks to its bi-material construction. The 29-degree angle between the liner and the fin optimises power transmission. The Turbo Flex, while extremely lightweight, offers superior and durable performance, ideal for those looking to get the most out of their equipment.

GARA 3000 LD

SOFTER LONG BLADE

GARA 3000 LD is CRESSI's entry-level long blade fin designed with softer blades, which make the GARA 3000 a perfect choice for the beginning diver or those not familiar using long blade fins. The GARA 3000 is constructed with durability in mind and long soft plastic blades that can effectively transfer power with minimum effort, which make this fin very comfortable and easy on the legs for the beginner or during long duration dives.

The GARA 3000 is an extremely comfortable and is a full footpocket style fin. This fin is also constructed using CRESSI's unique three material molding process where different compounds are bonded together to provide flexibility in the foot area and while being able to deliver power thru the blade due to the stiffness that the multi compound molding process can provide. Can comfortably be worn with or without neoprene socks.

GARA 2000 HF

STIFF LONG BLADE

GARA 2000 HF is a staple in the diving industry, and is the first fin in the industry to be manufactured using a three material molding process. Due to its lightweight and durability, it is an excellent choice for those looking for a fin that can provide the ultimate in performance while deep freediving and spearfishing, and those looking for obtaining maximum depths. The GARA 2000 has the stiffest blade in the CRESSI line and is an extremely comfortable full footpocket style fin, with long firm blades

with built in stringers and runners to effectively direct water flow down the blade aiding in efficiency. This fin is constructed using multiple compounds bonded together to provide comfort and suppleness in the foot area and strength and rigidity in the heel and blade area. Can comfortably be worn with or without neoprene socks.

GARA PROFESSIONAL LD

LONG DISTANCE

FINS
WEARABILITY:

BARE
FOOT

NEOPRENE
SOCKS

The Gara Professional LD is a high performance fin, requiring minimum effort to load the long blades. They are more forgiving than other long blade fins for untrained legs, making this an excellent choice for deep free divers and spearfishers of all levels. They are ideal for long distance swimming, while ultimately providing the power and efficiency needed for deep free-diving and spearfishing. Due to the multi compound bonding process used during

the manufacturing process, the Gara Pro LD is an exceptionally soft full footpocket style fin, which provides comfort during prolonged use on those long days in the water. Gara Pro LD delivers maximum power with minimum energy through its long firm blade that runs over the footpocket. Can comfortably be worn with or without neoprene socks.

DIVING MASKS

/DIVING MASKS | YOUR WINDOW TO THE DEPTHS

CRESSI

420 UV BLOCK LENSES

These UV420-coated colored lenses protect your retina from harmful High Energy Visible (HEV) light, present on both sunny and cloudy days. The UV420 optical coating provides excellent eye protection and superior sight definition during diving. With 95% UV ray tolerance, these lenses reduce the risk of long-term eye damage and cataracts. Their 92% light transmittance ensures clear, unobstructed vision underwater, enhancing your ability to see vivid colors and fine details.

380 UV BLOCK LENSES

These UV 380-coated colored optical coating lenses ensure excellent eye protection with a tolerance of 80% against harmful UV rays. Designed to provide good visual clarity during diving, these lenses offer different light transmittance levels: 86% for yellow lenses and 74% for blue lenses. Ideal for underwater adventures, they enhance eyesight definition and provide a comfortable viewing experience in various lighting conditions.

MASK LENS COATING

SPECTRA SILVER LENSES

Experience the advanced semi-reflective lens technology designed for scuba divers and spearfishers. These lenses offer 60% UV ray tolerance and 40-50% light transmittance, providing optimal light adjustment and reducing glare for clear, comfortable vision. Protect your eyes from harmful UV rays and enjoy enhanced visual clarity, making it easier to spot marine life and underwater features. Dive confidently with superior eye protection and sight definition.

ANTI-FOG COATING LENSES

Cressi's Anti Fog Lens Coating Technology is a new, innovative method to allow the snorkeler or the diver to enjoy the mask right from the beginning.

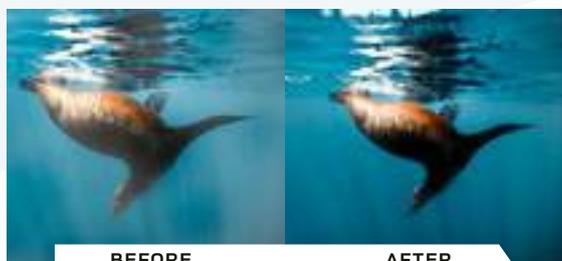

The new Anti Fog lens is possible thanks to an exclusive coating method based on an invisible film that attaches to the lens during mask production.

QUANTUM

NEW REVOLUTIONARY ANTI-FOG SYSTEM

The major innovation with the Quantum mask is that as well as offering enhanced downwards vision it avoids the fogging phenomenon through the internal thermoregulation of the warm, damp air exiting the nose. This air is channelled by a system of membranes set in the moulding around the eyes and nose and deviating the flow towards the rubber skirt rather than the lenses.

The external part of the skirt features a cooling system composed of two small heat exchangers that act as radiators. The effect is that the temperature inside mask drops, coming closer to the external temperature and the droplets of humidity are trapped before the air reaches the lenses, preventing them from

fogging up. Despite the presence of the small internal membranes deviating the air flow and the external heat exchangers, the body of the Quantum mask is nonetheless compact and represents the most advanced design offered on the underwater vision market. The lenses are not treated chemically and it should be remembered that when the mask is new, as is the case with all masks, we advise you to clean the lenses carefully with toothpaste or dishwashing detergent, or simply use Cressi Antifog to clean away all volatile materials and dust that may have collected on the glass. It is also always useful to use saliva as a surfactant before every dive.

NAXOS

NEW COMPACT ANTI-FOG SYSTEM

The Naxos mask is compact and smaller in size than a classic diving mask, but this unique feature does not reduce the field of vision, and thanks to new internal ribs, it adapts perfectly to any anatomy of the face. Naxos, like Quantum, not only offers increased downward vision but also avoids the phenomenon of fogging by thermoregulating the warm, moist air escaping from the nose inside the mask. This is channelled by a system of membranes in the mould around the eyes and nose, which deflect the flow towards the rubber walls and not towards the glass. On the outside of the walls is a cooling system consisting of two small heat exchangers that function like radiators. The effect is that

the temperature inside the mask is lowered, bringing it closer to the outside temperature, and that moisture droplets are trapped before the air reaches the glasses, thus preventing them from fogging up. The lenses are not chemically treated, so it should be remembered that when the mask is new, as is recommended for all masks, it is best to clean the lenses thoroughly with toothpaste, dishwashing detergent or simply use a lighter to burn off all volatiles and impurities deposited on the glass. And it is also always useful before each dive to use saliva as a surfactant.

PRISMA

NEW REVOLUTIONARY ANTI-FOG SYSTEM SIMMETRIC OPTICAL MASK

The Prisma is much more than a mask; it is a reliable companion for exploring the underwater world in full clarity. The Prisma is equipped with the Cressi patented FOG-STOP system, which drastically reduces fogging through the internal thermoregulation of the warm, damp air exiting the nose. The external part of the skirt additionally features a cooling system made of soft heat exchangers that act as radiators. This effect drops the temperature inside the mask, bringing it closer to the external temperature, and traps the droplets of humidity before the air reaches the lenses, preventing fogging. What makes the Prisma additionally unique is

its ease of adjustment: The micro-adjustment buckle is connected to a soft connection point at the frame, making it easy and smooth to adjust the strap tension without any skirt deformation, which often causes water ingress. Thanks to the combination of two different frame materials and Cressi's innovative patented soft skirt construction, the mask folds easily to fit in your BCD or cargo pocket. The Prisma offers the possibility to fit optical lenses for both negative and positive correction, allowing anyone to fully enjoy the wonders of the underwater world without compromising vision.

ZEUS

FOG REDUCER SYSTEM

Zeus is the perfect mask for diving. This mask has a particular tapered structure deriving directly from the highly popular Nano-mask patent. The same IDF-INTEGRATED DUAL FRAME TECHNOLOGY SYSTEM allows you to join the silicone skirt to the lens frame without major interruptions of the curvature continuity. The result is a mask with an extremely hydrodynamic shape and, visibility being equal, a significantly smaller size. The field of view

obtained is particularly wide, laterally and in the lower zone. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. The new micrometric adjustable buckles with a larger button allow a more easily regulation also wearing dive gloves. The new strap is made of two different silicone colors.

FOG REDUCER SYSTEM

INNER NOSE POCKET - NEW PATENT PENDING

A patented membrane surrounding the inner nose pocket which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

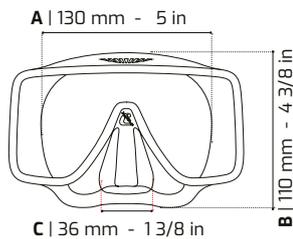

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.

- Silicone skirt bonds directly to the lens for lower weight and reduced drag
- Quickly adjustable buckles mounted on the skirt
- High-quality flexible silicone that gently and securely adheres to the face

Z2

HIGH QUALITY FRAMELESS MASK

The Cressi Z2 diving mask is made through an advanced molding manufacturing process to achieve a state-of-the-art frameless structure. Z2 provides a wide, distortion-free field of view, allowing divers to enjoy a clear, panoramic view of their surroundings. Made from high-quality silicone, it fits snugly over the face, providing lasting comfort even during prolonged dives. Its frameless construction

makes it remarkably lightweight and easy to handle, allowing for convenient carrying and unparalleled convenience in diving activities. Reliable, high-performance and comfortable, the Cressi Z2 mask is the ideal choice for avid divers who want a high-level diving experience.

BIG EYES EVOLUTION CRYSTAL

WITH CRYSTAL SILICONE SKIRT

The ultimate in comfort and performance, the Big Eyes Evolution Crystal combines the best of Cressi technologies.

Raked lenses, with Cressi's inverted tear-drop shape, are placed close to the eyes for an exceptional field of view, and the Crystal Silicone skirt delivers excellent light

transmission while resisting discoloration and fogging.

The Crystal Silicone skirt also seals gently against the skin with a very open angle that accommodates a wide range of facial shapes.

THE SILICONE REVOLUTION

crystal®

CRYSTAL silicone® is an exclusive CRESSI material that revolutionizes swim mask skirt clarity.

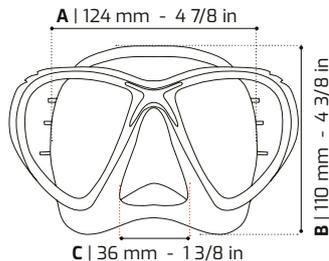

It offers incredibly clear vision and features long-lasting advanced technology components within the pure silicone skirt which prevents premature discoloration, reduces fogging, and guarantees many years of CRYSTAL clear viewing.

TECHNICAL FEATURES

- Raked lenses provide excellent field-of-view
- Inverted tear-drop lenses improve downward visibility for managing BC-mounted gear
- Low internal volume allows for effortless clearing
- Crystal Silicone resists aging and prevents skirt discoloration and fogging
- Ribbed skirt design provides support where needed for a soft, flexible fit
- Micrometric adjustable buckles allow precise headband adjustments
- Swiveling buckles connect to flexible, indestructible elastomer tabs for total durability and comfort
- Accepts optical lenses

BIG EYES EVOLUTION

OUTSTANDING FIELD OF VIEW

The Big Eyes Evolution's signature inverted tear-drop lenses are raked inward and provide outstanding field of view with very low internal volume. A redesigned skirt now uses internal ribs to provide the ultimate in fit and support. Fully flexible, easy adjust buckles are attached

using Cressi's double injection molding technology for both comfort and extreme durability.

TECHNICAL FEATURES

- Raked lenses provide excellent field-of-view
- Inverted tear-drop lenses improve downward visibility for managing BC-mounted gear
- Low internal volume allows for effortless clearing
- Dual-density silicone skirt flexes for a perfect seal along the face and full support around the frame
- Ribbed facial skirt provides support where needed for a soft, flexible fit
- Micrometric adjustable buckles allow precise headband adjustments
- Swiveling buckles connect to flexible, indestructible elastomer tabs for total durability and comfort.
- Accepts optical lenses

A1

WIDE VIEW ANTI-FOG MASK

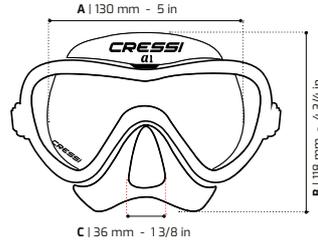

BLACK/GRAPHITE

BLACK/YELLOW

BLACK/BLUE

18.6x10x11 cm - 7.3x3.9x4.3 in

PLEASE NOTE:
DO NOT ALLOW THE INTERNAL SIDE OF THE LENSES OF THIS PRODUCT TO COME INTO CONTACT WITH CHLORINE

The A1 has been designed with an attractive style, it boasting high performance for scuba diving and freediving. It features a single-lens, tempered glass lens with special treatment, making it completely anti-fog! The lenses are inclined and they have an inverted teardrop shape, increasing the downwards visibility. This allows better control of the scuba diving equipment. The skirt and the strap are made of a soft

silicone ensuring a high-adaptation fitting most of the different face shapes. The top of the internal skirt features a double edge that increases drastically the sealing. The buckles are connected to the frame with a soft and elastic flap, not only for a flexible fit but also to reduce drag and the risk of break.

CLEAR VIEW ON EVERY DIVE INCLUDING THE FIRST

Cressi's Anti Fog Lens Coating Technology is a new, innovative method to allow the snorkeler or the diver to enjoy the mask right from the beginning. The new Anti Fog lens is possible thanks to an exclusive coating method based on an invisible film that attaches to the lens during mask production.

TECHNICAL FEATURES

- Attractive style with high-performance capabilities
- Anti-fog tempered glass lens
- Increased downwards visibility for better equipment control
- Soft silicone skirt
- High adaptability
- Reduced drag and risk of breakage.

HONEY

NEW 2026

SPECIALIZED
Retailer-Product

FEMALE-FOCUSED ERGONOMICS FOR TOP COMFORT AND PERFORMANCE

Designed with particular attention to the female fit, Honey is a classic frame mask that combines elegance, practicality, and high-level performance. Its compact structure fits perfectly on narrower faces, offering a comfortable and secure fit even during extended use. Equipped with a single lens made of ultra-clear glass, Honey delivers a bright, sharp view with a wide field of vision despite its reduced size. The monolens design eliminates visual interruptions, enhancing underwater

spatial awareness. Made with premium-quality materials, Honey features a soft silicone skirt that ensures a snug, pressure-free seal on the face, and a robust frame built to last. The micrometric buckles, integrated directly into the frame, allow for quick and precise strap adjustments—even when wearing gloves. Reliable, durable, and designed to maximize both comfort and visibility, Honey is the ideal companion for women seeking a technical mask with clean design and the trusted Cressi quality.

LIBERTY TRISIDE

THREE WINDOWED MASK

The Liberty Triside features a wide mono front lens with 2-sided lenses to ensure a panoramic view without interruption. The result is a mask that allows maximum light and feels as open as the ocean itself. All lenses are tempered glass for the best clarity. The skirt is made in hypoallergenic silicone to ensure comfort and a perfect seal.

It is a breeze to adjust the length of the strap thanks to the two buttons on the buckle, which can also be used while wearing gloves. The frame is colored with a paint effect that makes the mask elegant and beautiful to see, which can be coordinated with your equipment.

PENTA+

UNPRECEDENTED TOTAL VISION

The Penta+ is the restyling of the popular Penta mask. It has four lenses and also introduces to this sector all the exceptional characteristics of the Matrix and the Lince. The Cressi patented system of raked lenses with an "inverted drop" shape offers incredible downward visibility, ideal for having under control the scuba diving equipment. The clear side windows are made of scratch-resistant material, more strong than glass or polycarbonate. Thanks to them, the mask offers unprecedented lateral visibility

and great luminosity for total vision with no compromises. The skirt and the strap are made of hypoallergenic silicone, a very soft material compared to the low-quality PVC, that ensures a perfect seal and comfort. The buckles are embedded in the frame to offer instant adjustment of the strap length, even with one hand. It offers a very low internal volume, a record weight of only 175 g (6.2 oz).

ATOM

ULTRA LOW VOLUME MASK

MADE IN ITALY

BLACK

GREEN

BLUE METAL

WHITE

18.6x13.4x8.6 cm - 7.3x5.2x3.3 in

Photo by: William Drumm

Atom is a radical mask, with incredible low internal volume, thought and built for free-diving. It is a frameless mask. Construction material has been reduced to the minimum. Inside the silicon facial a stiff core is co-stamped with the two lenses, giving just the right rigidity to the mask. This semi-rigid core substitutes the usual external plastic frame and allowed us to reduce the internal volume of the mask in an unseen way until today. Another feature of Atom is the ergonomic

shape of the nose. Two small cavities, carved by the nostrils, facilitate the action of compensation. This makes the mask extremely stable during the dive. Atom will not move when you compensate pushing. Atom is the perfect mask for the expert free-diver and spear-fisher, who wants the maximum performance from its gear.

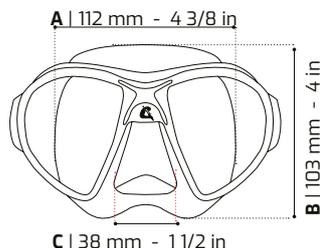

TECHNICAL FEATURES

- Ultra low-volume mask, designed for facilitate the action of compensation
- Rigid co-stamped stiff core
- Ergonomic shape of the nose
- Ideal for expert free-diver and spear-fisher

CALIBRO

FOG REDUCER SYSTEM

Cressi's next generation diving masks are all equipped with the IDF-INTEGRATED DUAL FRAME TECHNOLOGY which offers exceptional field of view, and the new Calibro is no exception. The mask is designed so that the integrated face and frame allow for an extremely hydrodynamic and compact shape and a particularly wide lens, maintaining the mask extremely close to the face. Cressi's Calibro combines minimal internal volume with a phenomenal field of view due to

the raked angle of the frame. The buckles are, as always, directly integrated into the rigid skirt through a solid but flexible rubber attachment that allows you to adjust and place the mouthpiece without shifting the mask. Thanks to its matte coating the mask's components all match, enhancing the underwater experience since it prevents reflections in the water that may disturb marine life. Calibro is the perfect mask also for free-diving since it is designed to provide the diver with a feeling of total freedom and comfort.

FOG REDUCER SYSTEM

INNER NOSE POCKET - NEW PATENT PENDING

A patented membrane surrounding the inner nose pocket which acts as a barrier and traps any moisture escaping from the diver's nose involuntarily when breathing through the mouth. The result is that not only is the moisture channeled away from the lenses, thus avoiding the fogging up of them, but it also reduces the need to compensate for pressure.

To further improve the anti-fog effect, Cressi suggests, the first times that the dive mask is used, to spray some anti-fog solution or to apply some saliva on the inside of the lenses and then to rinse them with water.

NANO

NEW IDF TECHNOLOGY INTEGRATED DUAL FRAME

Mask for advanced freediving and spearfishing, designed to offer an extremely hydrodynamic and compact shape to help divers cut through the water and aid movements in small spaces. The internal volume is minimal and does not

require intentional equalizing. The swiveling buckles feature micrometric regulation. Angled tempered glass lenses. Anatomical strap.

TECHNICAL FEATURES

- Raked lenses provide excellent field-of-view
- Extremely low internal volume on par with the best free diving masks
- Silicone skirt shaped to provide a wide sealing surface for a leak-free fit
- Micrometric adjustable buckles allow precise headband adjustments
- Overmolded frame is easy to grip
- Inverted tear-drop lenses improve downward visibility for managing BC-mounted gear

BIG EYES

EXCELLENT FIELD-OF-VIEW

The mask that began a revolution remains one of the most duplicated designs today. Its inverted tear-drop lens shape and raked lenses provide 30% greater field of view than typical twin-lens masks. The high-grade silicone

skirt's unique shape positions the lenses comfortably close to the eyes and provides an excellent seal.

SUPEROCCHIO

CLASSIC LOW VOLUME MASK

20x11.7x12 cm - 7.8x4.6x4.7 in

TECHNICAL FEATURES

- Minimum internal volume
- Suitable for deep freediving
- The size of the skirt is reduced, and the mask adapts easily to many facial shapes
- The two separate lenses, placed very near the eyes, offer great visibility in every direction
- Made in Italy

A huge classic in Cressi masks, it continues to be a favourite among fans even though it has been in production for many years. It's a small mask with minimum internal volume, very well suited for deep freediving. The size of the skirt

is limited, and the mask adapts easily to many facial shapes. The two separate lenses, placed very near the eyes, offer great visibility in every direction.

SNORKELS

/ SNORKELS | FREEDOM TO BREATHE NATURALLY

ITACA ULTRA DRY

ADULT SIZE

18x53 cm - 7x20.8 in

The features at the top end an internationally patented dry guard, which prevents water entry while using it on the surface in any position. The new mechanical device has three movement joints, whose counterweight ensures immediate opening of the upper valve whether you dive or emerge from the water. The lower part is equipped on the inner side with a smooth flexible corrugated section, which keeps the aerator away from the mouth while using any breathing apparatus.

The mouthpiece, made of soft silicone, has an angle studied in a particularly ergonomic way, with a reduced bite size for prolonged use without gum fatigue. The mouthpiece body consists of two pieces, with an inclination that ensures better and faster water drainage. A lower purge valve enables instant clearing when needed. The transparent tube has a side reinforcement in coloured rubber.

CORSICA

ADULT SIZE

18x53 cm - 7x20.8 in

CORSICA is a highly technical snorkel designed specifically for deep freediving and spearfishing. The soft bendable large diameter tubing makes it extremely comfortable to properly position behind the head while maintaining ease of breathing on the surface. When diving, the mouthpiece tucks neatly under the chin for the

ultimate in hydrodynamics. The anatomical hypoallergenic silicone mouthpiece provides extreme comfort during long durations in the water. The CORSICA is available in either black or green and is an excellent choice for the discriminating diver who is looking for the best equipment.

MOBY 7

WHEELED BAG & BACKPACK

DETACHABLE POCKET

Introducing the ultimate travel companion, the Moby 7. Made of durable 450D Ripstop fabric, this trolley offers superior strength and longevity, just like its renowned predecessor, the Moby 5. Front pockets, made of water-repellent material, offer convenient options for storing essentials. The trolley features heavy-duty PVC-coated mesh fabric on the top and bottom sides for exceptional durability. Equipped with heavy-duty wheels, this equipment transport system allows for effortless manoeuvrability. The YKK plastic zip ensures a smooth and reliable closure. For added convenience, a

detachable lower pocket with a concealed hanging strap and thermoplastic side loops for attaching the shoulder strap is included. The inner, lined pocket securely holds the padded shoulder strap. In addition, the Moby 7 has a small front pocket with a semi-dry zip, perfect for storing valuables. As additional equipment, a folding mesh bag with drawstring closure is included, which can be conveniently stored in the small front pocket. The Moby 7 is the epitome of functionality, durability and style for the modern traveller.

DETACHABLE POCKET

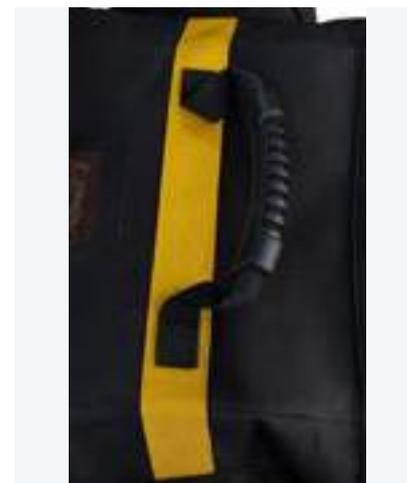

DIMENSIONS

Volume	115 L
Weight	4.9 kg 10.8lbs

MOBY 5 PRODUCT UPDATE

WHEELED BAG & BACKPACK

DIMENSIONS

Volume	115 L
Weight	4,9 kg 10.8 lbs
Main compartment	76 x 40 x 28 cm 30 x 15.8 x 11 inch
Upper front pocket	34,4 x 23 x 8,5 cm 13.5 x 9.05 x 3.3 inch
Lower front pocket	34 x 38 x 8,5 cm 13.4 x 15 x 3.3 inch
Fin pocket	73 x 25 x 7 cm 28.7 x 9.8 x 2.8 inch

It is made from a new 300/400 denier material that is light yet very strong. The main compartment opens on three sides allowing easy access. There are two large bellows pockets to the front with zip closures, two side pockets for fins and a small upper pocket that holds an address tag. There are also two adjustable, padded, straps for carrying on the back that can be placed in special pockets when the backpack is being forwarded. The reinforced

pull handle is telescopic and fully retractable. The wheels have a large diameter and can be removed and easily replaced in the event of breakage. There are two carrying handles: a reinforced one at the top and one with Velcro closure at the bottom. The back of the bag houses supporting rods to keep the Moby 5 in a vertical position. All the zips are very strong YKK.

ROBUST AND SPACIOUS WHEELED BAG

DIMENSIONS

Volume	110 L
Weight	2.9 kg 6.4 lb
Main compartment	85 x 47 x 33 cm 33 x 18 x 13 inch

The Cressi Moby 2 is a spacious trolley specifically designed for the transportation of your scuba diving equipment. It boasts dimensions of 85x47x33 cm and a generous capacity of 110 liters. Thanks to its adjustable shoulder straps and robust wheels, the Cressi Moby 2 ensures comfortable and reliable transportation. The trolley is equipped with

padded straps that effectively distribute the weight on your shoulders, providing added comfort during transport. Additionally, the Moby 2 features a convenient drainage system pocket, which is ideal for carrying items that are still wet. As part of the Cressi product range, the Moby 2 is just one of several options available.

JUMBO

WHEELED BAG & BACKPACK

DIMENSIONS

Volume	140 L
Weight	4,5 kg 10 lbs
Dimensions	80 x 50 x 35 cm 31.5 x 19.7 x 13.8 inch

TECHNICAL FEATURES

- Made of 600 Denier twisted polyester fabric, with PVC water-repellent coating
- YKK Zippers
- Adjustable shoulder straps for carrying as a backpack

The Jumbo bag is designed for very demanding divers who want to organize transport of all the equipment they need for their dives during their holiday travels or free time. The ample volume (140 liters) and internal partitioning makes luggage easy to prepare. The two side pockets, with the fin logo inside, can hold a pair of large fins, up to size XXL. The two front pockets are handy for packing accessories, like towels, t-shirts and sunglasses.

The top pocket protects the two-position telescopic handle and also conceals a special small pocket inside for a personal details card. The spacious inside compartment has room to organize all technical equipment up to size XXL (e.g. a complete 7 mm hooded wetsuit, jacket, boots, gloves, mask, mouthpiece, regulator,

etc.), securing it with two special straps. The system of buckles on the outside allows the bag to be compacted further, by pulling on the straps according to how much is packed in it. The large wheels are highly resistant and easily replaceable, as they are attached with screws and locknuts. The shoulder straps can be easily concealed in the back pocket and pulled out when needed. The new adjustment buckles on the shoulder straps allow rapid adjustment, even with the bag on the back.

SEA HORSE

VOYAGER ROLLING BACKPACK - IDEAL FOR LIVEBOARD

**FOLDABLE
TROLLEY BAG**

The Sea Horse rolling backpack is ideal for those looking for practicality and robustness in one. Constructed from 900D/600D polyester fabric, this bag provides excellent strength and durability, making it perfect for use in marine environments and adverse conditions. Equipped with YKK zips, it ensures a secure and reliable closure.

One of the distinctive features of the Sea Horse is its ability to be rolled up for easy transport and storage. This makes it particularly useful for boat travelers, where space is often limited. The bag is also equipped with shoulder straps that, concealed in a dedicated pocket, allow it to be quickly transformed into a backpack, offering unparalleled versatility.

Particular attention has been paid to cleanliness and comfort: a small wipe, housed in a special pocket, allows the wheels to be covered when the bag is carried on the shoulders, thus avoiding soiling clothes. In addition, a special pocket is designed for carrying fins, making the Sea Horse also ideal for snorkeling and diving enthusiasts. With the Sea Horse, every trip becomes a comfortable and stress-free experience, thanks to its clever design and sturdy construction.

DIMENSIONS

Volume	152 L
Weight	3.85 kg 8.5 lbs
Dimensions	81 x 57 x 33 cm 32 x 22.5 x 13 inch

TECHNICAL FEATURES

- Strong and durable bag with wheels, made of 900D/600D polyester
- YKK Zippers
- The bag can be rolled up for transport and storage
- Shoulder straps inside their pocket for use as a backpack
- Small towel in its pocket to cover the wheels when carrying on the shoulders, so as not to soil clothes
- Special pocket for carrying fins

GAVONE

NEW 2026

THE WATERPROOF BAG DESIGNED FOR AFTER DIVING

DIMENSIONS

Volume	50 L
Dimensions	65x35x40 cm

When you return from a dive, a freediving session or a day of snorkelling or surfing, you need a spacious, durable and, above all, waterproof bag to store your wet gear without getting everything else wet. Gavone is the answer to this need. Designed for water sports and made from high-quality materials, it is the perfect choice for those looking for functionality, protection and practicality in a single accessory. Made from durable waterproof tarpaulin, the Gavone bag keeps moisture perfectly inside, preventing residual water from your equipment from ending up in your car, on other luggage or on the floor. This material has been chosen for its ability to withstand the stresses of the marine environment: sand, salt, sun and daily wear and tear do not compromise its functionality. The large internal capacity makes it ideal for carrying everything you need: full wetsuits or shortsies, long fins, masks,

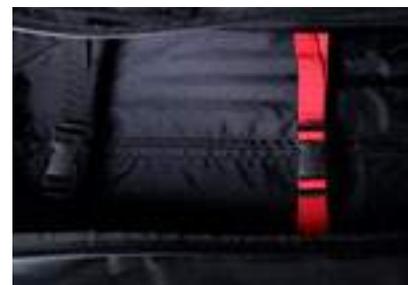

snorkels, gloves, boots and even small weights. The rigid upper edge is an often overlooked detail, but one that makes all the difference: it keeps the bag in shape when opening and closing, making it easier to insert or remove equipment, even with just one hand. To close the bag securely and compactly, there is a strap with a clip, which allows you to roll up the edge and lock it with a single movement, preventing any water leakage or accidental opening. The long, durable, double and well-stitched handles allow for versatile transport: you can carry it comfortably by hand or wear it on your shoulder for longer or more uncomfortable journeys.

Maintenance is as simple as use: just rinse to remove sand, salt and dirt. The smooth surface of the Tarpaulin prevents residue build-up and is ready to be reused in no time.

WHEELED BAG - FITS LONG BLADE FINS

Inside straps

With wheels

Semi rigid case

DIMENSIONS

Volume	120 L
Weight	3,45 kg 7,60 lbs
Dimensions	95 x 40 x 35 cm 37.4 x 15.75 x 13.78 inch

TECHNICAL FEATURES

- Waterproof bag
- Made of Polyester
- External pocket
- Side handles and shoulder straps

The Tuna bag has a rigid bottom, thanks to the structure that supports the rubber and anti-breakage wheels. It is designed to carry diving equipment more comfortably. The material is water-repellent, even if not watertight. All metal components are made of rustproof stainless steel. The capacity is 120 litres. It is equipped with a large internal mesh pocket with zip

and a small external pocket with zip. Three inner straps are attached to the bottom of the structure to secure the equipment. At the top end there is a handle for towing and another handle is at the bottom end. In the middle of the bag, two more handles can be joined with a padded strap.

GORILLA BACKPACK

NEW 2026

DIVING XL BACKPACK

DIMENSIONS

Volume	80 L
Weight	n.a.
Dimensions	120 x 40 x 30 cm 47.2 x 15.7 x 11.8 inch

GORILLA BACKPACK XL is the evolution of the legendary Gorilla, the Cressi bag for professional use, which maintains the technical, constructional and assembly characteristics, but in backpack format.

It is made of tough PVC laminated Tarpaulin heat-sealed; it is practically 100% waterproof and, therefore, very practical for not wetting the boot of the vehicle.

The new padded and ergonomic backrest, as well as the shoulder straps, ensure greater comfort when travelling. The chest strap prevents the shoulder straps from sliding outwards during movement while the lumbar belt stabilises the weight towards the body's centre of gravity, improving balance and preventing the backpack from swaying during movement.

swaying the backpack during movements. These details are especially appreciated when travelling by scooter. Its large size allows you to put your freediving fins inside, a special pocket, providing optimum protection for your fins.

A waterproof front zip allows easy access to the contents, including the bottom, thus avoiding the annoying task of emptying the backpack to pick up an item placed on the bottom of it. A small pocket, also with a waterproof zip, allows you to store small items such as documents, chavi etc.

Two rifles can be attached to the sides of the backpack using special straps. Base with a heat-sealed reinforcement plate to prevent perforations due to contact with the ground.

PIOVRA DRY

LONG BLADE FINS BACKPACK WITH WATER REPELLANT MATERIAL

Cressi's Piovra Dry fin bag is designed for diving and spearfishing enthusiasts. The first compartment, made of 600D polyester with PVC lamination, can hold spearfishing equipment, including wetsuit, long fins (up to 100 cm), bathrobe, etc. In the outer pocket, made of tarred PVC, you can store mask, snorkel, belt, knife, and various accessories. This pocket can also be used to store the catch, thanks to the waterproof inner lining. Side

fastening systems for two rifles, secured by two elastic bands. Side handle. The zip of the main compartment has eyelets for padlocking. The new padded and ergonomic backrest, as well as the shoulder straps, offer more comfort when travelling. The bottom of the backpack is made of 600D polyester with an abrasion-resistant PVC lamination surface, giving your bag more durability.

PIOVRA DRY FINS BACKPACK	XVB990250	119,99 €

HELIOS NEW 2026

DESIGNED FOR THOSE WHO ENJOY FREEDIVING AND SPEARFISHING

DIMENSIONS

Volume	60 L
Dimensions	115x30x20 cm

The Helios backpack was created to meet the specific needs of underwater fishermen and freedivers, offering a practical, durable and organised solution for transporting equipment. Every detail has been designed to ensure maximum functionality in marine environments, where reliability and comfort make all the difference. Made from high-strength polyester, Helios is designed to withstand demanding conditions, such as exposure to salt, moisture and abrasion. This material not only guarantees durability over time, but also effectively protects the contents from impact and external agents. The heart of the backpack is its large main compartment, equipped with a sturdy nylon zip. It is spacious enough to hold long fins, light wetsuits, belts, gloves and other essentials for your trips out to sea. The internal layout allows for rational organisation, so you can keep everything tidy

and easily accessible.

On the outside, a practical zip pocket offers additional space for your mask, snorkel, knives or small tools, separating more delicate or frequently used items from the rest of your equipment. Another strong point is the double side attachment system for spearguns: two adjustable elastic straps on both sides allow you to secure your equipment in place, preventing unwanted movement during transport. This solution is particularly useful for those who want to have their hands free without compromising the safety of their equipment. The adjustable shoulder straps make it comfortable to carry even on longer journeys or over uneven terrain. The ergonomic, compact and well-balanced design reduces fatigue and improves stability, even when the backpack is fully loaded.

Volume	60 L
Weight	1.12 kg 2.47 lbs
Dimensions	39.5 x 23.5 x 66 cm 15.5 x 9.25 x 26 inch

TECHNICAL FEATURES

- Ideal for Gara fins
- High-frequency welding
- 2x gun holder
- 100% Dry Bags

The Dry Gara Backpack is waterproof, ideal for carrying your equipment comfortably. It is made of durable PVC laminated Tarpaulin heat-sealed by high frequency of 5 tenths of a thickness: almost 100% watertight and, therefore, very practical not to wet the boot of the vehicle.

Adjustable anatomical shoulder straps, with 40 mm straps, adjustable chest strap, and waist strap. Heat-sealed padding. Capacity of 60 liters, ideal for complete equipment adding, also, the longest fins for diving or apnea. Two straps on each side that allow the transport of two spearguns.

MAVERICK DRY GUN BAG

NEW 2026

DESIGNED FOR THOSE WHO ENJOY SPEARFISHING

TECHNICAL FEATURES

- Materials: Waterproof tarpaulin
- YKK zipper – length 133 cm
- Dimensions: 179 x 30.5 x 20 cm

Designed to ensure maximum protection and practicality, this bag is ideal for safely transporting spearguns.

The new high-strength Tarpaulin material makes it even more waterproof and durable, perfect for the most demanding marine conditions.

Equipped with an adjustable shoulder strap and reinforced handle, it is comfortable to carry

even when fully loaded.

The 133 cm YKK zip ensures a wide and smooth opening, while inside there is a Velcro pocket for small accessories

and a compartment for speargun shafts.

The design is enhanced by exclusive tentacle graphics, evoking the underwater world with personality and character.

MALAGA NEW 2026

28 L TRAVEL BACKPACK - CABIN APPROVED HAND LUGGAGE

**STORE YOUR
VALUABLES
AND
TECHNICAL
EQUIPMENT**

DIMENSIONS

Volume	28 L
Weight	n.a.
Main compartment	42 x 29 x 18 cm 16.5 x 11.4 x 7 inch

The Malaga 28L backpack is the embodiment of engineering efficiency applied to luggage design, a masterpiece of functionality that redefines the standards of versatility and protection when travelling. Its intelligent architecture is articulated through five carefully designed pockets, where every detail responds to a specific need: a padded pocket carefully wraps a laptop up to 16", while a hidden compartment jealously guards sensitive documents and valuables, ensuring security and confidentiality. The beating heart of the backpack is the main compartment: opening like a modern hard-shell suitcase, it allows for meticulous organisation and can hold up to 7 days' worth of clothes and belongings in a surprisingly compact space. The dimensions have been designed to comply perfectly with "Cabin Approved" standards. Its minimalist,

essential design is expressed through a soft-touch, water-repellent fabric that elegantly combines durability and tactility. Its extreme flexibility allows it to be compressed to almost nothing when not in use, a detail that makes it unique among contemporary backpacks. Malaga 28L is more than just an accessory: it is a smart companion that moves with ease between professional and urban contexts. It is not just a backpack, but a manifesto of conscious movement. Designed for the travelling professional, the discerning traveller, anyone who sees travel as an art to be interpreted with elegance, functionality and a touch of innovation. A silent ally that transforms every journey into an experience of efficiency and comfort, where every detail tells a story of continuous research and meticulous attention to detail.

LYOS NEW 2026

THE WATERPROOF CARRY-ALL

DIMENSIONS

Volume	4 L
Dimensions	25x16x10 cm

From boat decks to mountain hikes, your travel essentials need protecting from the elements. The Cressi Lyos was born from that simple need, our team wanted a compact, waterproof pouch to stash small but valuable items in wet, salty, or sandy environments. Made from tough waterproof material with heat-sealed seams and waterproof zips, Lyos easily handles spray, humidity and sandy beaches. While it's not designed for complete submersion in water, it delivers unbeatable protection in splash zones

and damp kit bags. The main compartment has space for larger items like mobile phones and power banks, while a front zip pocket gives you quick access to smaller items like car keys, cert cards or a multitool. A reinforced side handle makes the pouch easy to carry, or it can be attached to a carabiner for clipping off on deck. Small and super versatile, Cressi Lyos is a minimalist and stylish way to protect your important tech and accessories from whatever nature throws at you.

PRODUCT UPDATE

40 L ADVANCED FEATURES BACKPACK

40-liter backpack designed by the Cressi team. It has a double-zip "U" shaped front pocket with a padded compartment for a tablet or large (17") laptop. Interior zippered mesh compartments provide additional organization. Also included is a vertical-zippered front-facing pocket for any documents that need extra protection. Small loops stitched to the exterior outer edge can be used to latch lighter gear. A zippered elastic side-pockets makes accessing small items easy.

There are two carrying handles, one on the top and one on the side, to make carrying easy and comfortable. There are also two shoulder straps, making it possible to wear as a backpack. The straps are padded to provide comfort and reduce stress on the shoulders and back. The bag features a fully adjustable/removable sternum strap to help support the load while being worn as a backpack.

ROATAN

HEAVY DUTY MESH BAG 123 L

The Roatan mesh liter bag is perfect to keep all your scuba diving gear together. Made with high-density polyester, this mesh bag makes carrying your gear easy. The bag is equipped with two access points - a drawstring on the top and a full-length zipper on the side - to make retrieving equipment easy, even if wet. The bag can be worn like a backpack, with padded, adjustable shoulder straps and chest strap. It

can also be carried with two reinforced handles, one on the side and one on the top. Included is a semi-dry front pocket with a zipper closure. A drain in the reinforced PVC bottom ensures that any water empties out, making this a perfect option to rinse your gear after use.

FLOATS

/ FLOATS | THE BEACON IN THE BLUE

SIGNAL BOARD BUOY

Red for excellent visibility, it uses two casings: an outer skin made of abrasion-resistant material ensures excellent protection for the two inner inflatable chambers, which are white. A mesh cover makes the bottom abrasion-proof and ensures effective drainage so that the buoy retains its light weight at all times. The upper part is fitted with multipurpose pockets and a big expanding container. A mesh bag made of

adjustable elastic straps will carry additional objects. A zipper along the centre gives access to the two air tubes, which are kept separate for fail-safe buoyancy. A casing for the pole of the flag required by regulations is provided in the centre of the front section of the float. Also Red, the line is about 20m long and is fitted with two plastic snap hooks. This buoy comes with a convenient whistle: an additional safety device.

PRODUCT	CODICE		RRP €
SIGNAL BOARD BUOY	TA611902		99,99 €

35.5x52x8.5 cm - 13.9x20.4x3.3 in

SPYDER BOARD BUOY

The buoy is double chamber type with an inner tube and an external protective cover. It is made from abrasion-resistant 420D nylon. Fluorescent red colour makes it highly visible. Holds 3 rifles. Buoy dimensions: 80 cm x 30 cm. The buoy has a double internal chamber to increase your safety. If one is pierced, the

buoy will always be on the surface thanks to the other chamber. The three pockets are very practical for storing various accessories. A stabilising lead makes this buoy very stable even with the sea formed and with the top compartments occupied by heavy objects.

PRODUCT	CODICE		RRP €
SPYDER BOARD BUOY	TA611900		79,99 €

TORPEDO BUOY

The PVC used for this mono-camera buoy is very thick (0.35 mm) and is highly resistant to stress from sea activities. High-quality heat welded connections. The torpedo shape is very convenient for swimming because it eliminates any hydrodynamic resistance. It has a super slip tray finish, so that the buoy is the minimum resistance to the angler's progress.

It is also very comfortable for rifles that can be positioned lengthly. Pole with "Diver Underwater" flag and 25 m rope.

ELITE MARKER BUOY

REPRICED 2026

The Elite Marker is a brightly coloured open-cell buoy designed for divers seeking reliability and practicality. Equipped with a plastic wind inflator and an open end for inflation via the diver's octopus, this buoy guarantees ease of use. It can be easily attached to a finger reel and deployed from below or at the surface; it has reflective

strips on the top for easy identification. Deflation is quick and easy, thanks to the quick release valve, which also prevents over-inflation upon release from depth. The buoy can be stowed away thanks to the attached bungee and fits comfortably in most divers' pockets.

PRODUCT	CODICE		RRP €

COMPACT ELITE MARKER BUOY

The Compact Marker is a versatile and easy-to-use buoy designed for marking surfaces. Thanks to its self-sealing properties, this tall buoy offers remarkable flotation capabilities while maintaining a compact size. If you find yourself far from the shore or boat, this buoy is the perfect tool to capture attention on the

surface, while an innovative overpressure valve prevents overinflation. In addition, the valve can be used to release air from the Compact Marker when needed. This buoy guarantees efficiency and reliability for any marking requirement.

PRODUCT	CODICE		RRP €

TANKS

STRONG AND RELIABLE TANKS

Cressi tanks are made of high quality and safety standards. They come in 5 different capacities: 5, 10, 12, 15 and 18 litres. On the other hand, the valves are made by Cressi-sub and were the first easy to assemble and disassemble valves to appear on the market. They are strong and reliable and are made from really top quality materials. The inner air passages were carefully studied in the design so as to guarantee top performance even, and above all, with the top performance regulators.

The valve design ensures an excellent grip, facilitating opening and closing of the tank. A brand new, exclusive slot system means you can check whether the faucet is open or closed at a glance (yellow = faucet closed, red = faucet open).

The regulator connection incorporates a threaded insert, which means it can equally be used for both INT bracket or DIN connection. The valves are modular you can easily change from a single connection valve to dual connection valve and vice versa. The Cressi-sub valves passed the strict tests imposed by European standards with flying colours thus receiving the prestigious CE certification.

Backpack two-piece

SERPENT

SILICONE MARSEILLAISE WEIGHT BELT WITH METAL BUCKLE

Crafted from 100% High Grade, tear-resistant Silicone, the Serpent belt boasts a 200kg tensile strength, ensuring durability in tough underwater conditions. With higher stretch and flexibility than rubber, it provides a more comfortable fit. Its UV, saltwater, heat, and chemical resistance extends its lifespan, outperforming rubber alternatives. The belt is softer

and less abrasive on diving suits, featuring a heavy-duty stainless steel quick-release Marseillaise buckle with a roller for secure and easy adjustments. With 9 holes spaced 4cm apart, it accommodates all diver sizes. Measuring 4.5cm wide and 4.5mm thick, it's perfect for diving, freediving, and spearfishing.

PRODUCT	CODE		RRP €
BLACK	TA629050		39,99 €
WHITE	TA629030		39,99 €

ULTRA

MARSEILLAISE RUBBER BELT WITH METAL BUCKLE

The Ultra Marseillaise weight belt is a high-quality, rubber diving accessory designed with a focus on comfort and security. With a thickness of 4 mm, this belt is engineered to withstand the rigors of underwater activities. Its standout feature is the Marseille-style stainless steel buckle, which is known for its robustness and ease of use. This buckle has a pivoting pin that slots into regularly spaced holes along the belt, ensuring a secure fit that can be quickly released in an emergency. The belt's rubber material

is specially formulated for elasticity, allowing it to automatically tighten during a diver's descent as abdominal compression occurs and the thickness of the diving suit decreases. This ensures that the belt remains snugly fitted to the diver's body throughout all phases of the dive, providing a consistent and reliable means of carrying weights. The Ultra Marseillaise belt's design prioritizes the diver's safety and comfort, making it an essential tool for divers who demand the best in underwater gear.

CRESSI SPEARFISHING NEW COLLECTION

With this catalogue, we would like to highlight our origins, which have distinguished us over the years. Today, with the same passion as then, we follow the needs of our customers, from the beginners to the most ambitious athletes, sure of providing products suitable for all needs, always focusing on technology and results.

In these 80 years the company has always preserved its DNA, which is well represented by Cressi logo. The "C" logo with the mermaid, in the origin with the speargun, is recognisable all over the world as a prestigious brand of watersports and spearfishing.

Our goal is to provide a complete vision of our products Dedicated to all those who make spearfishing their passion.

The work undertaken over the years carries out a constant renewal of products with strict testing and always new technologies, placing us at the top for reliability, performance and durability.

All this takes in thanks to a continuous dialogue between our designers, who are always ready to make the best improvements, and our ambassadors, expert testers who have made the sea their home.

The philosophy of the Cressi family is always the same, first of all the technique and then everything else... this catalogue is an excellent example.

CRESSI SPEARFISHING & SUSTAINABILITY

Spearfishing has become **the most sustainable fishing method** for many reasons. One of the biggest is that it has the most selective catch, by species, size, and quantity.

It also has the least problems for the environment, no by-catch, it doesn't need any bait, almost no gear loss, virtually no non-targeted species impact, and no harm to the surrounding **underwater environment**.

When using the Cressi gear and taking only high percentage shots, there is a low non-retrieval rate. **By following all fishing regulations and laws, and shooting only fish that are good to eat, and always eating your catch.**

Cressi cares to preserve the planet reducing its environmental impact.

WE CARE!

Egidio and Nanni Cressi first founded the Cressi company to service the growing sport of spearfishing, and the Cressi name has been associated with the sport ever since.

Cressi-sponsored athletes have **won 12 world spearfishing titles** in that time, and **15 Italian championships**.

The company offers an **extensive line of gear**. These include pneumatic and band-powered guns, masks, a lot of models of freediving fins and a wide range of accessories, such as bags, shafts, reels and so on.

Italy

ff Stefano Bellani

Since I was young, in my free time I was always out at sea, in the blue waters of Corsica, fishing tunas and amberjacks. Constantly looking for new places to explore and to practise my passion. People calls me a real champion. I'm proud to have the opportunity to share my underwater world.

KRISTIAN CORRIAS

Italy

ff Kristian Corrias

I'm very connected to the sea, it gives me sense of freedom even when it's rough and seems to want to push me away. I've always had the passion for spearfishing since I was a teenager. I waited impatiently for the specialized magazines to admire the champions of the time and read their stories.

STJEPKO KESIC

Croatia

ff Stjepko Kesić

I'm part of the Cressi team and won my first title as Croatian National Champion in 2019. Then I won my second title in 2020, a two days championship was held in the area of half island Istra and it was organized by the Club Delfin from Pula, it was a very satisfying experience.

DARIO MACCIONI

Italy

cc dariomaccioni

Being part of the Cressi Team makes me proud, above all because since I was 8 years old my favourite brand for its colours, logo and the champions that represented it is Cressi Sub. My life is dedicated to my family and to spearfishing. I continue my competitive career giving my best with the hope that it will last as long as possible.

GIULIO CAVALIERE

Italy

cc giulio.knight

The fascination with the sea has been very strong since I was a child. I remember the excitement of handling mask and fins for the first underwater adventures and the Cressi brand that made people dream and gave them confidence. Over the years, freediving soon became a must and a priority, a lifestyle in the true sense of the word.

LUCA DELLA SANTA

USA

cc lucads13

I was raised on the beaches of North Carolina and South Florida, where my love for the ocean began. Growing up, I was fishing, diving, or surfing any chance I could get. With my love for the ocean and wanting to experience it in different ways, I have continued to share the passion for the sport.

STEFANO KONJEDIC

Italy

cc stefano_kojednic

Freediving, Spearfishing, and Finswimming instructor. Diver of the Italian Navy. European champion with World record and vice-champion, of freediving and finswimming. For many years he has competed for the Italian national swimming team. He gave vent to his passion for diving and spearfishing. In 2023, he entered the world of competitions, achieving several podiums at regional competitions; he was called for the Italian Championships in September 2023.

RENZO MAZZARRI

Italy

cc renzomazzarri.com

Renzo Mazzarri is an Italian freediving fisherman. He is the only one to have won **three consecutive world championships** in both individual and team fishing (1987 Turkey, 1989 Italy, 1992 Spain). He is capable of fishing at depths of more than 35 metres. In his career, he has collected a countless number of victories. In 1990 he received the Trident d'Or as the best diver of the year.

RICCARDO MOLTENI

Italy

Riccardo Molteni

Three times world champion in the Spearfishing Champions League with his adventure partner Mazzarri, Riccardo Molteni boasts an outstanding career.

A world-traveller and admirer of the deep sea around the globe, in his stories he always manages to highlight the beauty of his experiences and also the inevitable risks involved, which are impossible to overcome without a pinch of madness and a lot of passion.

ANDREA SETTIMI

Italy

and_set_sea

A lifestyle and family tradition that I have experienced since I was 12 years old. The emotions and peace that I constantly feel underwater give me the strength to look ahead and set myself new goals. I love everything about freediving, from the difficulties to the satisfaction, and I always try to learn from it. The sea seems always to understand me.

LUIGI PURETTI

Italy

luigi_puretti_fisherman

Luigi Puretti is a freediver, athlete, and certified instructor. The sea has always been part of his life, a deep connection that led him to turn his passion into a career. He spent the early years of his life in Germany, but every summer he returned to Salento, where he discovered the irresistible charm of the sea. After various work experiences, including a period as a Navy officer, he chose to devote himself entirely to freediving, in search of a more independent and free life.

ANTONINO PIRAS

Italy

Antonino Piras (Nino)

When I was 12 years old the most important thing for me was to jump into the sea to see everything that was inside. I've turned this passion into my sport and I consider myself extremely lucky cause my passion has also led to my job as Cressis agent, which gives me satisfaction in being the team manager of this wonderful group of athletes.

FRANCESCO PIRAS

Italy

pirasf

My love for the water has been transmitted from father to son. Organising fishing expeditions is my greatest passion. I practice in all seasons and with different techniques. I live underwater all year round. In September 2016, in the waters of Taranto, I won the Italian Championship of Apnea Fishing Qualification (second category).

SANTI LÓPEZ CID

Spain

Probably the most prestigious and recognised Spanish spearfisherman in the world. He has won 7 European Championships and 4 World Championships. He started spearfishing in Mallorca, when he found a speargun, a mask and a snorkel hidden in some bushes. Many call him "the magician" for his magical performances in championships that have left the other competitors speechless.

SPEARFISHING

SPEAR SUITS

/ SPEAR SUITS | PROFESSIONAL HUNTING WEAR

POSIDONIA

CAMOUFLAGE TWO-PIECE WETSUIT 5, 7 mm

This new camouflage suit uses a special digital printing system that allows for very high resolution images to create an exclusive camouflage. Cressi's new 'Cryptic Camouflage Technology' is based on a real image of the fish (in this case the anglerfish with its dominant colours) to create a camouflage that is very similar to the original and then modified to create a unique and repetitive effect. The wetsuit consists of two parts (jacket and trousers) of 5, 7 mm. The materials used are:

highly elasticised camouflage on the outside, split neoprene on the inside. The cut is derived from the Tracina model, now recognised as a very wearable model. The new chest reinforcement is designed to ensure a strong grip when loading rifles. The new reinforcement on the knees offers additional protection against chafing without compromising the elasticity of the materials.

INSPIRED BY THE LIVERY OF THE PELAGIC

FISH A special digital printing system has been used for this new camouflage wetsuit, allowing high-resolution images to be obtained and thus create an exclusive camouflage design. The new "Cryptic Camouflage Technology" of Cressi is based on a real image of a fish (a dolphin fish in

this case, with its dominant colours), to create camouflage that is very close to the original and then altered to obtain a repetitive effect that is one of a kind. The wetsuit is manufactured in two separate 5 or 7 mm pieces (jacket and pants). The materials used are: highly-elastic camo on the outside, open-cell neoprene on the inside.

NEREA

NEW 2026

5 mm TWO-PIECE WETSUIT FOR WOMEN

Chest reinforcement

TECHNICAL FEATURES

- 5 mm neoprene thickness
- Glued seams, not pass-through (GBS)
- Designed for women for spearfishing or freediving
- Face seal, wrists and ankles
- Internal sternal panel
- Abrasion-resistant YKK strap
- Knee pads in ultra-resistant material

Two pieces (jacket + pants) wetsuit 5 mm nylon exterior and open cell interior. Specifically designed for women for spearfishing or freediving. Seals on the face, wrists and ankles ensure a better watertight seal. The special internal sternal reinforcement panel allows for speargun loading. The jacket fastens with a new

YKK strap system in which the hook part does not damage the fabric. The knee pads, thanks to the special abrasion-resistant material and ultra-resistant ink screen printing, are highly resistant to normal wear and tear during use.

TOKUGAWA

MONOPIECE WETSUIT 3 mm

DESIGNED FOR BLUE WATER SPEARFISHING

Tokugawa, named after the Japanese feudal shogunate, is a one-piece 3 mm thick wetsuit, perfect for spearfishing, freediving and swimming, as well as for open water and pool training. The unique camouflage of this wetsuit is appropriate for different aquatic environments, from the blue waters of the Caribbean Sea to the greener tones of North American waters. The wetsuit's graphics provide the ultimate in camouflage for all environments.

Tokugawa, which is made of elastic, flexible, comfortable and soft neoprene, has an anatomically designed cut specific to Cressi wetsuits, with preformed arms and legs that improve wearability and movement in the water. The chest and the knee pad reinforcements are designed specifically for spearfishing. The Dura Stretch nylon lining improves the wetsuit's elasticity, comfort and durability.

SPIDER PRO NEW 2026

NEOPRENE GLOVES WITH LIQUID SEAL

- 2MM

One of the most notable features of these gloves is the PowerTex lined palms and fingers, a material offering a similar level of protection to Kevlar. But the upside here is that PowerTex maintains flexibility so you can still handle those finer tasks. This will protect your hands from any abrasive or sharp surfaces while you're diving without costing you comfort. To further the durability of the gloves, the seams have all been reinforced with liquid seam

sealing. Not only will this improve durability by preventing any further tearing if you do cut a stitch or cut the fingertips off for technical diving applications, it will also provide improved thermal retention. With the same patterning and naturally conforming cut used in the original Spider Glove, you'll be pleased with the durability and comfortable fit of the Spider Pro Gloves.

XL	2 mm	PG101205		59,99 €
2XL	2 mm	PG101206		59,99 €

TECHNICAL FEATURES

- Designed to perform in Australia's harsh conditions
- PowerTex lined palms and fingers
- Protects hands and ensures the durability of the gloves
- Same protection as kevlar but maintains flexibility
- Reinforced seams with liquid seam sealing
- Improves the durability of the glove
- Ensures water sealing for thermal retention
- Glove holds integrity even after being damaged
- It uses the same construction shape and patterns as the original Spider Glove

HEX

CUT RESISTANT GLOVES

Cressi designed a glove that provides high comfort and dexterity while being cut puncture and impact-resistant, making it ideal for lobstering and spearfishing. The wrist velcro closer will always keep the glove in place,

regardless of normal use expansion from water weight. Cressi's Dyfiber material offers maximum strength with minimum weight. It features the ANSI level 4 for cut resistance and level 3 for puncture resistance.
