AR ONE AF 130 MV

RE0000100+ *>> 24/24.5 - 29/29.5 >> 100mm*

Hard Charging, Walkable Freeride Boot.
The AR ONE AF 130 takes everything we love about our flagship AR ONE 130 and packs it into a walkable, freeride-ready boot. Featuring our updated Free/Lock 4.5 walk mechanism, investment-cast tech inserts, and a refined Team liner, it's equally at home lapping the resort or breaking trail in the backcountry.

KEY FEATURES

- Complete Tech Inserts
- Free/Lock 4.5
- Team AF Liner
- Team Elastic Cam 50mm
- Powerstrap
- Frictionless Cuff Pivots
- Locking Cuff Buckle

TECH FEATURES

- Memory Fit
- Natty Flex
- Anchor Fit Heel Pocket
- Fully Replaceable Hardware
- Adjustable Liner Tongue
- Mid Grip

AR ONE AF 110 MV

RE0000098+ *>> 23.5 - 29.5 >> 100mm*

Versatile, Touring Capable Freeride Boot.
The AR ONE AF 110 is an ultra-versatile, powerful freeride boot with touring capability and no-compromise downhill performance. The Hybrid Cabrio Construction, spine-driven 110 flex, and Slingshot Buckle deliver hard-charging performance while the full tech inserts and walk/ski mode allow you to chase pow and steep lines in the backcountry. We're only going up to get down.

KEY FEATURES

- Complete Tech Inserts
- Free/Lock 4.5
- Team AF Liner
- Team Elastic Cam 50mm
- Powerstrap
- Frictionless Cuff Pivots
- Locking Cuff Buckle

TECH FEATURES

- Memory Fit
- Natty Flex
- Anchor Fit Heel Pocket
- Critically Replaceable Hardware
- Adjustable Liner Tongue
- Mid Grip

TOOLCLUB

AR ONE 130 MV

RE0000000+ *>> 24/24.5 - 29/29.5 >> 100mm*

Powerful, Plush Boot For Hard Chargers With 1/2 Tech Inserts

The AR ONE 130 is built to get rowdy. The Hybrid Cabrio Construction creates an unprecedented blend of comfort and performance backed by a powerful, smooth 130 flex. Premium features like the Team Liner, Team Elastic Cam 50mm Powerstrap, Kush Damping Bootboard, and ½ tech inserts make this a favorite of our hard-charging freeride athletes looking for an exceptional handling and versatile boot.

KEY FEATURES

- ½ Tech Inserts
- Team Liner
- Team Elastic Cam 50mm Powerstrap
- Memory Fit
- Kush Damping Bootboard

TECH FEATURES

- Memory Fit
- Natty Flex
- Anchor Fit Heel Pocket
- Power Shift
- Cuff Alignment
- Fully Replaceable Hardware
- Adjustable Liner Tongue
- Mid Grip

AR ONE 120 MV

RE0000002+ *>> 24/24.5 - 29/29.5 >> 100mm*

The No-Nonsense Freeride and All-Mountain Boot

The AR ONE 120 is a focused freeride and all-mountain weapon with powerful performance and exceptional fit. Direct power transfer is driven through the spine by the stout, smooth 120 flex, and the Kush Damping Bootboard and fully-customizable shell and liner absorb vibration and impacts while giving a comfortable fit that snugly secures the foot and ankle without pressure points. Charge harder while staying comfortable all day long.

KEY FEATURES

- Kush Damping Bootboard
- Pro Liner
- Slingshot Buckle
- Memory Fit
- Power Shift

TECH FEATURES

- Natty Flex
- Anchor Fit Heel Pocket
- Cuff Alignment
- Replaceable Critical Hardware
- Mid Grip
- 40 mm Static Velcro Power Strap
- Micro-Adjustable Buckles
- PU Y-Band

AR ONE 110 MV

RE0000008+ >> 23/23.5 - 29/29.5 >> 100mm

Premium Do-Everything Ski Boot With a Medium Flex

The AR ONE 110 is the smooth-flexing, do-it-all boot. Top shelf features like the Team Liner, Team Elastic Cam 50mm Power Strap and the Kush Damping Bootboard give the AR ONE 110 a plush, supportive feel and customized fit that's a favorite of our freestyle athletes. It's the perfect blend of comfort and control to take the sting out of heavy landings and high speed chatter.

KEY FEATURES

- Team Liner
- Memory Fit
- Kush Bootboard
- Team Elastic Cam 50mm
- Powerstrap

TECH FEATURES

- Natty Flex
- Anchor Fit Heel Pocket
- Power Shift
- Cuff Alignment
- Replaceable Critical Hardware
- Adjustable Liner Tongue
- Replaceable Critical Hardware
- Mid Grip

AR ONE 90 MV

RE0000014+ >> 23/23.5 - 29/29.5 >> 100mm

Ultra Comfortable, Smooth-Flexing Performance Boot

The AR ONE 90 is the ultra-comfortable boot with a fully customizable shell and liner for the perfect fit with rock-solid performance. The easy flex initiates intuitively and ramps up support when you need it, while the Hybrid Cabrio Construction with Anchor Fit Heel Pockets and the Slingshot Buckle securely lock the heel in place without unwanted pressure. It's a smooth-handling, easy on and off boot with reliable performance for everyday shredding.

KEY FEATURES

- Slingshot Buckle
- Memory Fit
- Pro Liner
- Cuff Alignment

TECH FEATURES

- Natty Flex
- Anchor Fit Heel Pocket
- Cuff Alignment
- Replaceable Critical Hardware
- PU Y Band
- 40mm Static Velcro Power Strap
- Micro-Adjustable Buckles
- Adjustable Cuff Spoiler

AR ONE 100 MV

RE0000010+ >> 23/23.5 - 29/29.5 >> 100mm

The All-Mountain, All-Terrain Hybrid Cabrio Boot

With a fully-customizable shell and liner for the perfect fit and a smooth, stable mid flex, the AR ONE 100 is a do-it-all workhorse for all conditions. The Slingshot Buckle locks the heel in place with pressure-free tension that wraps around the foot and ankle to deliver reliable, comfortable performance. The AR ONE 100's fuss-free fit and versatile performance works equally well hunting deep pow, charging the steeps or lapping the park.

KEY FEATURES

- Slingshot Buckle
- Memory Fit
- Pro Liner
- PU Y Band
- Cuff Alignment

TECH FEATURES

- Natty Flex
- Anchor Fit Heel Pocket
- Cuff Alignment
- Replaceable Critical Hardware
- PU Y Band
- 40mm Static Velcro Power Strap
- Micro-Adjustable Buckles
- Adjustable Cuff Spoiler

MADE TO BE THRASHED, NOT TRASHED.

AR ONE Boots are made to be skied hard, day in, day out, all season long. Over time, some parts can begin to wear out, which is why we have an extensive collection of replacement small parts available. Repair don't replace. Have more good days on snow.

BOOT LINER DIFFERENCES.

The AR ONE TEAM and AR ONE PRO are premium boot liners designed for exceptional comfort and performance. Both liners are heat moldable for a fully customizable fit, utilize an external PU Y-Band to reduce vertical shear with the shell, and feature pre-molded Anchor Fit Heel Pockets. The AR ONE TEAM LINER has an additional level of fit and finish with a repositionable tongue for instep volume adjustment and use premium face fabrics.

SKIS

This is the Armada FW 26 Ski Collection. It has everything you love and expect from Armada, like the iconic ARV & ARW Series and the innovative, boundary pushing Zero Collection & Signature Series, which now features a slimmed down Whitewalker 108 that brings Sammy's legendary design to more skiers in more locations.

New for this season, we've completely redesigned Armada's freeride ski collection. The AntiMatter Series signals a new direction for Armada that pushes our unique vision of freeride. Working with athletes who inspire us with their mixture of technical ability and aesthetic creativity like Max Palm and Toby Rafford, we've built a lineup that melds true freeride construction, featuring Speedmetal Titanal Laminate, and playful shapes that bridge the gap between directional and twin designs.

ARMADA

HG TECH

CORES

CARUBA CORE

Our lightest weight core material, Caruba delivers premium performance characteristics without the weight penalty. With snappy, resilient ride qualities and versatile construction characteristics, it's ideal for a wide range of uses. Caruba is also our most sustainable core material, regrowing in a fraction of the time poplar and ash wood does.

POPLAR ASH CORE

Lightweight Poplar is combined with higher density full-length Ash stringers to create an impossibly lively ski that has all the power needed for boosting to new elevations.

POPLAR CORE

Stability, power and ease are paramount in this 100% Poplar wood core. For those looking for predictability and smoothness the Poplar Core delivers in all snow conditions.

HYBRID CORE

Wood + Injectzone add performance and dampening to an affordable product.

ROCKER

FREERIDE ROCKER

Rocker in the tip and tail featuring additional taper for maneuverability in soft snow. Positive camber underfoot for edge hold and stability.

ALL-MTN ROCKER

Optimized camber profile for all-mountain use. Rocker in the tip, camber underfoot, and comparatively less rocker in the tail to balance maneuverability and hard snow performance.

FREESTYLE ROCKER

Tip and tail rocker with camber underfoot to provide playful maneuverability and catch-free performance while maintaining pop and snap.

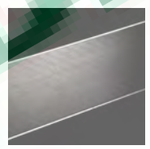

TECH

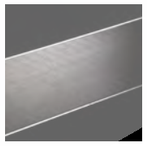

W3DGEWALL
The w3Dgewall is a 3D molded, injected sidewall that's angled where it joins the wood core, creating a mechanical bond in the mold during ski construction for a stronger, more uniform connection between the sidewall and core.

SMEAR TECH
A 3D Beveled base in the tip and tail creates a unique feel in all snow conditions. Less likely to catch in crud, self-centering in deep snow and un-catchable on take-offs, Smear Tech lets you float effortlessly whether sliding forwards, backwards, left or right.

S7 BASE

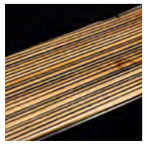

COMP BASE
Sintered UHMW polyethylene with added carbon aids in speed and durability on snow.

TITANAL
This blend of Zinc Aluminum acts as the shock absorber inside the ski, quieting bumps and chatter to give unparalleled stability and confidence at all speeds. When a little extra weight is acceptable we apply 2 full length, full width sheets of Titanal.

LAMINATE MATRIX
A directional layering of fiberglass dictates the flex pattern and torsional rigidity of the ski to create the ultimate lively and forgiving feel with quick response.

CARBON STRINGERS
Used either full length or in specific locations, specially placed Carbon Stringers add pop and stiffness without adding weight.

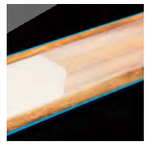

LIGHTWEIGHT EDGE
Light and strong, these heat-treated edges affect the feel of the ski minimally to ensure a snappy, lightweight feel.

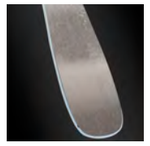

ALL-MOUNTAIN EDGE
Heat treated and built to avoid excess weight while maintaining durability, this edge gives the best balance of durability and feel of our whole collection.

IMPACT EDGE
Oversized and specially heat treated, this edge is built to resist impact damage in the most demanding situations.

TI BINDING DAMPENER
Below the binding, a sandwich of rubber, Titanal and finally more rubber work to dampen vibration that otherwise chatters into your boots and shortens your day. Ski bell-to-bell with extra damping provided.

SPEED METAL
Speedmetal is a strategically shaped Titanal laminate that supercharges AntiMatter skis, blending freeride construction into progressive shapes with lively character.

ASH BINDING INSERT
Ash binding inserts provide maximum strength and binding retention with a more sustainable construction than binding inserts made from other materials.

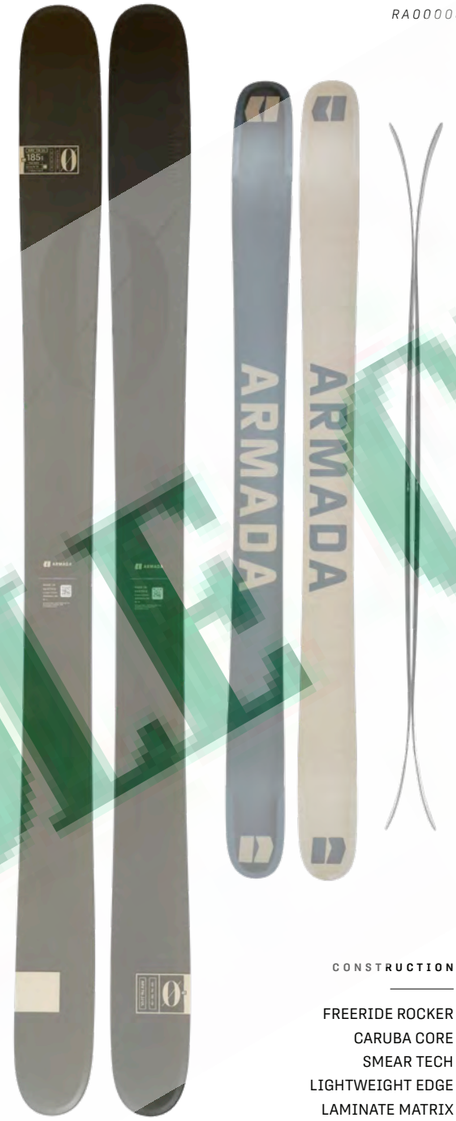

SWIVEL TECH
Extended 3D tip and tail shaping in the base creates a bevel zone with a unique rounding before the vertical sidewall to provide massive float and freeing maneuverability in deep snow.

ZERO COLLECTION

Welcome to the innovation lab. Inspired by the groundbreaking creativity of our athletes and engineers, the Zero Collection redefines the limits of ski design. Each ski in the collection fuses advanced development with pioneering shapes to perform unlike anything else on snow. Reject the status quo.
This is Zero.

ARW

The ARW Series is the most dedicated women's all-mountain freestyle ski family. Since day one, Armada's been committed to developing playful shapes with no-compromise construction that can transition seamlessly from slicing up groomers and chasing pow to lapping the park.

ARW series skis have an energetic, poppy character backed with advanced W3DGEWALL construction that pulls double duty cutting weight while enhancing durability.

PREVIEW

RENTAL

Rental equipment never looked so good.

All of Armada's rental skis feature extra durable, scratch resistant topsheets, thick black bases for easy repair and bombproof edges that can be tuned over and over all to provide the customer with the best experience.

We partner up to provide bindings that are Alpine and Gripwalk compatible, and pre-mount the plates at the factory so initial setup is as easy as it gets.
