

Japanese Agricultural Machinery Parts Sourcing Service

Let us investigate if we can source genuine Japanese agricultural machinery parts directly from manufacturers!

You (the user) submit the part details via online form or email, along with the \$10 investigation fee. Provide: [Manufacturer] [Machine Type] [Model] [Part Number] [Quantity] If part number is unknown, describe which part you need. (Photos can be attached for email orders.)

01

We confirm your request and payment. We then investigate part availability and report back whether it's possible or not. If available, we'll provide a quote and invoice to confirm your order.

02

You review the quote and confirm the order by making payment. We confirm your payment and proceed with procurement.

03

We order from the manufacturer and ship the parts via international courier once ready. (Shipment notification email sent.) You receive the parts. (Delivery confirmation email sent around expected date.)

04

*Payments will be processed through the PayPal transaction URL provided in the email.

Access via QR code!
